REGAL OR ROYAL LILY

NEW PHLOX NEWBIRD

One of the newest varieties recently introduced from Holland. It has a rich amaranth red color, and its well filled stems of flowers are of immense size and very compact. It blooms very freely and keeps a long time when cut. We know of no phlox that is better than this one. Its color alone makes it one of the most choice plants for the garden. Price strong blooming size plants, 35c each 3 for \$1.00.

NEW PHLOX NEWBIRD

HOOSIER
BEAUTY

HOOSIER BEAUTY GLOWING CRIMSON

The flowers are a glowing velvety crimson with darker shadings, making the flower of an indescribable beauty. It is very fragrant, and the flowers are produced on long, strong stems. The bush is remarkably vigorous and sturdy in growth. "A Rose for those who desire the darkest to be had in Roses." Strong 2-year plants, 65c each; 3 for \$1.85. Large 3-year size, \$1.25 each.

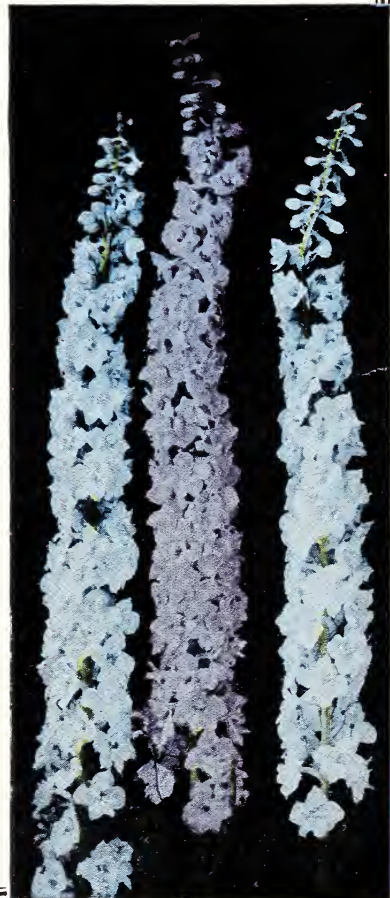

GLADIOLUS E. J. SHAYLOR

Tall, very strong plant and large blooms; a beautiful ruffled pure deep rose pink. Extra choice. (This variety has recently been awarded a certificate of merit in London.) 20c each. \$2.00 dozen.

DELPHINIUM NEW ENGLISH HYBRIDS Imported Strains

Perhaps no other flower has in recent years undergone the transformation and improvement as has the Delphinium. These superb new varieties, in all shades of blue, lavender, violet and purple, are truly wonders of the Floral Kingdom. We offer these in a mixed lot containing all the above colors, some of them truly wonderful. Large blooming size clumps 50c each; 3 for \$1.40; 6 for \$2.50.

GENERAL INFORMATION

PLEASE READ BEFORE PLACING ORDER.

WE GUARANTEE all stock shipped from our nurseries to be true to name and label, of size specified, best quality, good, clean and healthy, first class stock. We also guarantee our stock to reach you in good condition. If at any time found not to conform to the above guarantee we will gladly replace the stock, free of charge, or refund the purchase price. It is mutually agreed and understood, however, between the purchaser and ourselves, that we cannot be held responsible for a greater amount than the original purchase price of the stock.

ADJUSTMENTS—It is our chief aim to deliver to our customers a full measure of satisfaction. We exercise the utmost care in filling your orders, but in the rush of the season errors will sometimes occur. Please advise us at once of any such error and we will promptly and cheerfully correct it.

PRICES—The prices quoted in our catalog this year cancel all previous price lists. All stock except where noted is quoted F. O. B. our nurseries at Tippecanoe City, Ohio. Only the very best quality stock will be furnished you at the prices quoted herein. Buy direct from us and save money.

REMITTANCES—Charge accounts increase operating expense and this in turn increases the cost of the stock, so remittances should accompany the order. If you cannot send the full remittance with your order, send part of it and we will send the stock to you in the proper season, the balance of your bill C. O. D. Remittances should be made to us by draft, money order or check. If remittance is made in any other form it is best to register the letter to guard against its being lost in the mail.

LOCATION—Our nursery grounds are located in the heart of the Miami Valley, and we have excellent shipping facilities. The Baltimore and Ohio Railroad and The Dayton and Troy Electric Ry. connect with our nurseries and we are only 14 miles north of Dayton and one mile East of the Dixie Highway. Call and see us, we are glad to have you at any time.

An aerial view of our nurseries, showing our packing sheds, offices, seed rooms, and part of our trial grounds. Each year, many millions of plants and trees are packed in these buildings, and shipped all over the United States and foreign countries.

If You Are Interested in Trees and Plants, It Will Pay You To

VISIT OUR NURSERIES

We extend you a cordial invitation to visit our nurseries. We are near the intersection of the National and the Dixie Highways and paved roads lead to our doors. We will be glad to show you our hundreds of acres of growing plants, our propagating beds, our large stock of perennials, Evergreens, Vines, Shrubs and Trees. We will do our best to make you feel welcome and to make your trip as interesting and profitable as possible. If you live in the vicinity of Lima, Columbus, Cincinnati or Richmond, the round trip will be an easy and delightful days outing, and if you are interested in plants of any kind, we know it will save you money.

So figure on seeing us any day this summer and we will do our best to make your day interesting and profitable.

We feel that no one in the nursery business is in position to offer you better stock, better service, or better value for your money.

**EVERY
CUSTOMER
MUST
BE
SATISFIED**

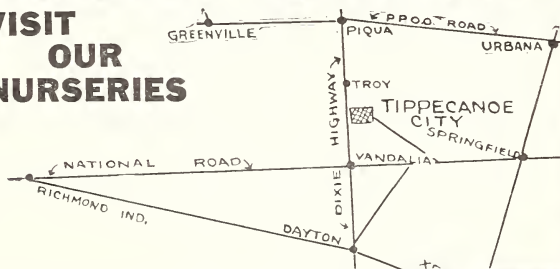

The packing sheds shown above contain about seventy-five thousand square feet of floor space, nearly two acres. If your order is for one plant, or a car load, the stock is all taken under roof out of the wind and sun, so as to reach you in good growing condition.

In these buildings each winter we graft many hundreds of thousands of fruit trees, shrubs and evergreens. They also house our seed rooms where we send flower and vegetable seeds to customers all over the United States and many foreign countries. In the trial grounds shown in the picture we test out all new varieties thoroughly before offering them in our catalog. Everything possible is done to protect the customer, and when better nursery stock can be grown, we intend to be among the first to grow it. No matter whether your wants are large or small, we solicit your business, and we will do whatever we can to satisfy each customer.

OVER 70 YEARS IN THE NURSERY BUSINESS

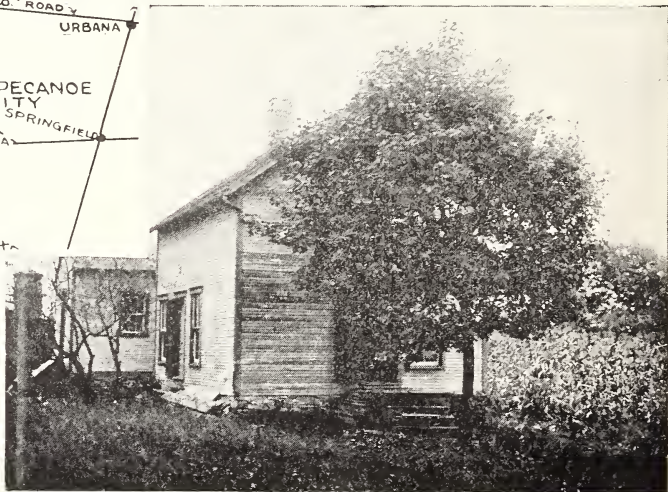

LARGEST SELECTION IN SOUTHERN OHIO

OUR GUARANTEE

We guarantee all our stock to be true to name, good, clean and healthy first-class stock. We also guarantee it to reach you in good growing condition. If at any time found otherwise we will gladly replace the stock or refund the purchase price. It is mutually agreed and understood that we cannot be held responsible for a greater amount than the original purchase price.

Our Office and Packing Sheds in 1887

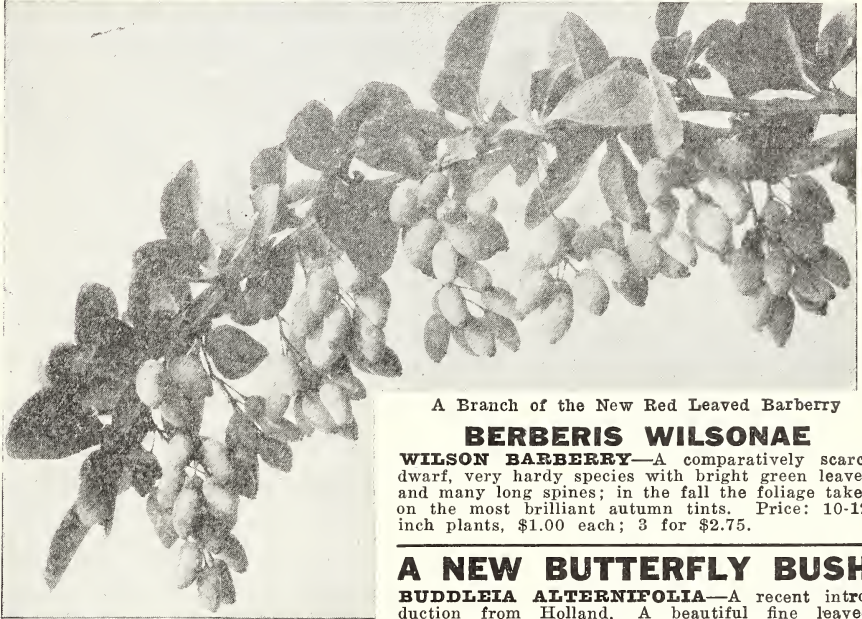

TWO NEW BARBERRIES

A REAL NOVELTY

A NEW RED-LEAVED JAPANESE BARBERRY (*Berberis Thunbergi* *Atropurpurea*)—It is only occasionally in a lifetime that a really worth while outstanding novelty in hardy shrubs is introduced and in this new Barberry we have such a plant.

It is similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubbery border, as single specimens, or for planting in clumps on lawns, as well as for foundation plantings and for hedges, but the foliage of this new variety is of rich, lustrous, bronzy red, becoming more brilliant and gorgeous throughout the summer and in the fall changes to vivid orange, scarlet and red shades. In this coloring it is unequalled by any other shrub and is followed by the same brilliant scarlet berries common to the type which remain on the plant the entire winter. In order to develop its brilliant coloring at all seasons it must be planted in full exposure to the sun. Price: 12-15 inch plants, \$1.00 each; 3 for \$2.50.

A Branch of the New Red Leaved Barberry

BERBERIS WILSONAE

WILSON BARBERRY—A comparatively scarce dwarf, very hardy species with bright green leaves and many long spines; in the fall the foliage takes on the most brilliant autumn tints. Price: 10-12 inch plants, \$1.00 each; 3 for \$2.75.

A NEW BUTTERFLY BUSH

BUDDLEIA ALTERNIFOLIA—A recent introduction from Holland. A beautiful fine leaved shrub of compact habit with branches of a semi-weeping habit. It grows to a height of about 4 ft., and is covered with long lilac colored flowers in July and August, with some flowers up till frost in fall. 18 to 24 inch plants \$1.00 each; 3 for \$2.50.

TWO NEW SNOWBALLS

VIBURNUM OPULUS NANA—A dwarf form of High Bush Cranberry and a member of the Snowball family. It grows very dense, globular in form. Has large glossy green leaves turning to a brilliant bronze in the autumn. Likes sunny locations, and makes a very desirable shrub for formal and low plantings. Grows from 18 to 24 inches high. Needs no trimming. Price, 8-12 inch, 75c each.

VIBURNUM CARLSII (Pink Flowering Snowball)—Another of the dwarf Snowballs growing to about 4 feet tall, silver green foliage, very compact and dense. Its beautiful light pink flowers are borne in clusters, covering the entire bush. They are very fragrant, with a heliotrope odor that is very pleasing. Price, 12-18 inch, \$2.00 each.

Pink Flowering Snowball (*Viburnum Carlsii*)

NEW AND RARE PLANTS

COTONEASTER MICROPHYLLA

(Quince Berry). An attractive evergreen shrub, growing very compact about 3 ft. tall. Leaves are very small, dark, glossy green. Flowers appear in June, and are half hidden by the leaves. Beautiful creamy white, and are followed by a scarlet berry, resembling our American Holly. Berries on bush throughout the winter. Price: 8 to 10 inch plants, 1.50 each; 2 for \$2.50.

Cotoneaster Horizontalis—A Truly Wonderful Plant

EUONYMUS VARIEGATA

EUONYMUS RADICANS VARIEGATA (Variegated Winter creeper).—An attractive dark green leaved evergreen plant, with creamy white and pink variegated edges. Of slow growing habit and very hardy. For covering walls or house foundations it has no equal. Makes a good undergrowth and ground cover for evergreens, or an attractive edging or border. Price: 2 yr. field-grown plants, 60c each; 3 for 1.50.

EUONYMUS VEGETUS

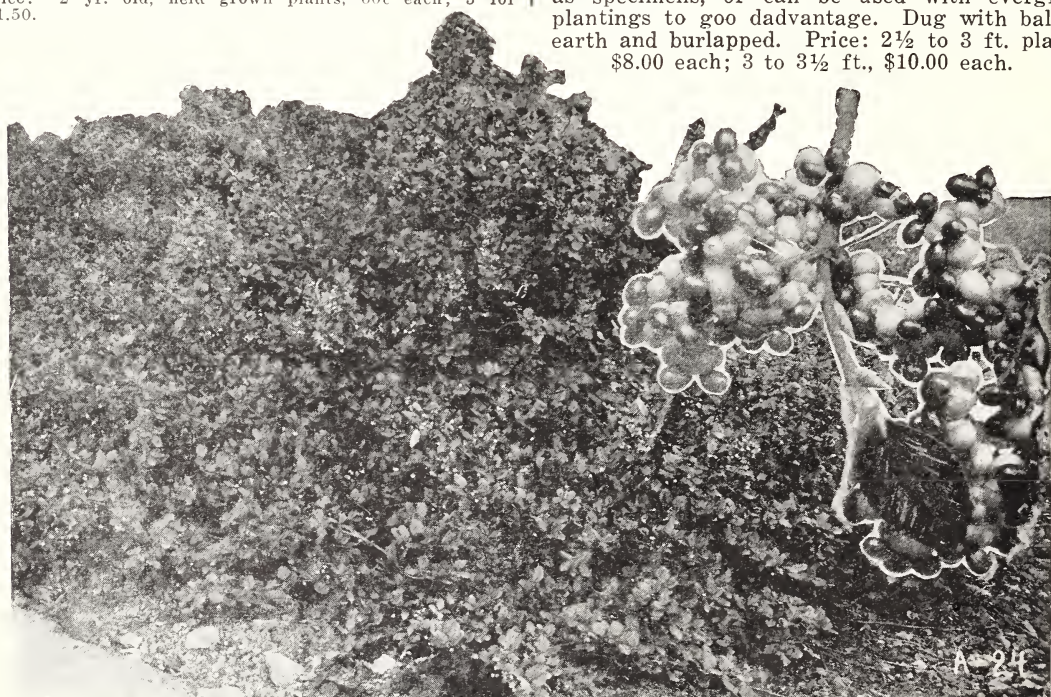

EUONYMUS RADICANS VEGETUS—Commonly called "Big Leaf Wintercreeper", or "Evergreen Bittersweet". Much the same habit as the Euonymus Variegata, but the leaves are much larger and a bright shining green. Grows more quickly also. The evergreen branches are covered in the late fall with red berries which can hardly be distinguished from our native bittersweet. Price: 2 yr. old, field grown plants, 60c each; 3 for \$1.50.

COTONEASTER HORIZONTALIS

(Rock Cotoneaster). A low, spreading, horizontal, evergreen shrub, growing to a height of 18 inches, and spreading to about 3 feet, glossy evergreen leaves, with numerous pink flowers that cover the shrub. The leaves turn a brilliant scarlet in autumn, which with the red berries it produces annually, makes it one of the finest shrubs grown. Price: 8 to 10 inch plants, \$1.50 each; 2 for \$2.50.

BLOOD RED JAPANESE MAPLE

(Acer Palmatum Atropurpureum). A small tree or shrub, valued for its blood red leaves and bright red branches, of dense growing habit. The delicate leaves are very showy and are fine as specimens, or can be used with evergreen plantings to good advantage. Dug with ball of earth and burlapped. Price: 2½ to 3 ft. plants, \$8.00 each; 3 to 3½ ft., \$10.00 each.

Euonymus Vegetus, showing a shrub and enlarged spray with winter berries

NEW AND RARE PLANTS

FLOWERING HAWTHORNES

Handsome Dwarf Trees with shiny leaves. Very attractive in shape and color, they bloom in profusion late in spring time with compact clusters of double rose-like flowers. These are followed by large red fruits and autumnal colorings.

PAULS SCARLET THORN (*Crataegus Oxycantha Splendens*)—Flowers deep crimson scarlet, very double. This is one of the most attractive trees for specimen planting or groups, as showy in fruit as when in flower. 3 or 4 ft. size, \$1.75; 4 to 5 ft., \$2.50.

DOWNY HAWTHORNE (*Crataegus Mollis*)—Bright green leaves with very showy creamy white flowers and scarlet edible fruit; fine for mass planting. 2 to 3 ft., 50c.

WHITE FLG. ENGLISH HAWTHORNE (*Crataegus Oxycantha Alba*)—Pure white, very attractive double flowers. Beautiful in foliage and fruit in the Autumn. 2 to 3 ft., 50c.

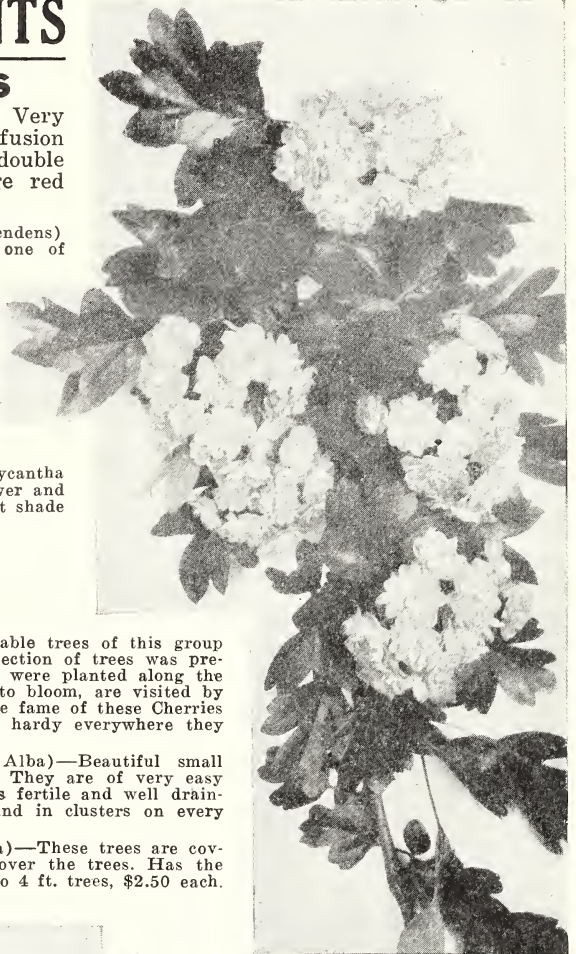

PINK FLG. ENGLISH HAWTHORNE (*Crataegus Oxycantha Rosea*)—Flowers deep rose, double, very attractive in flower and also when in fruit. Very fine for those who desire a light shade of color. 3 to 4 ft., \$2.00.

JAPANESE FLOWERING CHERRY

Also called the Rose Flowering Cherry. The most notable trees of this group in the United States are at Washington, D. C. This collection of trees was presented to our nation by the City of Tokio, Japan. They were planted along the Potomac River Drive, and now since they have come into bloom, are visited by everybody in Washington during the blooming season. The fame of these Cherries has spread all over the United States, and as they are hardy everywhere they should be largely planted.

WHITE FLOWERING CHERRY (*Cerasus Avium Alba*)—Beautiful small trees absolutely covered with flowers in the springtime. They are of very easy culture and will do well in any location where the soil is fertile and well drained. Flowers of this variety are pure white and are found in clusters on every twig. Price: 3 to 4 ft., \$2.50 each.

PINK FLOWERING CHERRY (*Cerasus Avium Rosea*)—These trees are covered with flowers of a deep rose color, in clusters all over the trees. Has the same habit otherwise as the White Flowering. Price: 3 to 4 ft. trees, \$2.50 each.

Paul's Scarlet Thorn

White Japanese Flowering Cherry

FLOWERING PEACH

To those who have had the first view of a well developed tree of this kind in full bloom, it appears that nothing more beautiful could possibly be found. We are indebted to Persia for this tree, from which country it was introduced into the United States a number of years ago.

WHITE FLOWERING PEACH (*Persica Vulgaris Alba*)—The white is particularly charming, as it is the purest white seen in any flower. The rose-like flowers cover every branch and twig in great profusion. Price: 3 to 4 ft., \$2.50 each.

PINK FLOWERING PEACH (*Persica Vulgaris Rosea*)—This variety has habits exactly like the white flowering, only the flowers are of a deep rose color. Price: 3 to 4 ft., \$2.50 each.

FLOWERING PLUM

(*PRUNUS TRILOBA*)

This is a small tree, a miniature flowering peach, smaller in growth and bloom. The foliage is quite different, the flowers smaller, but beautiful, very double and a lovely pink, blooming slightly in advance of the Flowering Peach. Price: 3 to 4 ft., \$1.00 each.

A PAGE OF FLOWERING CRABS (MALUS)

The Chinese Flowering Crabs are not as well known as the Flowering Cherries, but a lot of them are decidedly the most gorgeous and brilliant subjects for our gardens. The flowers are produced before the foliage, coming in multitudes and almost obliterating the branches. The effect is of a tree clothed in transparent silk gauze, shimmering and changing in color value with the elevation of the sun. The effect is beautiful in single trees or clumps, but is wonderful in hedges. They grow in any soil, and these wonderful trees are deserving of a spot on every home grounds.

ELEYII—(See Front Cover). This is a purple-leaved, vigorous-growing Crab Apple of recent introduction from England. The flowers are single, of a deep pink or red color. This is a distinctly valuable Flowering Crab and has purplish red foliage, as well as the attractive red flowers. 2 to 3 ft., \$2.50 each.

ALDENHAMENSIS—The Aldenhamensis is a new Flowering Crab, originating as a chance hybrid on the place of Hon. Vicary Gibbs at Aldenham, England. This is considered the finest of all the red-flowered Crab Apples flowering after most of the other Crabs have finished. Double red. 2 to 3 feet, \$2.50 each.

ATROSANGUINEA—Beautiful rose-pink flowers during the blooming season. Tree grows into a spreading form that is very attractive. 3 to 4 feet, \$1.50.

FLORIBUNDA—Bright pink flowers upon opening turning to pure white. Small yellow fruit in the autumn. 3 to 4 feet, \$1.50.

NIEDSWETZKYANA—Red or purple branches, leaves, stems, bark, buds and fruit; upright. A vigorous and healthy plant. 3 to 4 ft., \$2.50.

PARKMANI—A broad spreading form with very bright rose-colored flowers of a semi-double form. 3 to 4 feet, \$1.00.

SCHEIDECKERI—Upright habit of growth with an abundance of small pink flowers that are very fragrant and double. Leaves dark green and lustrous. A strikingly beautiful tree when in bloom. 3 to 4 feet, \$2.50.

SPECTABILIS ROSEA fl. pl.—Pyramidal in form with large pink, semi-double flowers in early spring. 3 to 4 ft., \$1.50.

SARGENTI—Clusters of saucer-shaped flowers of pure white; low, broad and densely branched; fine for banks. 2 to 3 feet, \$2.00.

SEIBOLDI—Clusters of white flowers unfolding with the leaves; fruit most beautiful of all crabs. 3 to 4 ft., \$1.50.

BECHTELS—Pale pink double flowering; sweet scented flowers; plant of an upright habit. Can be used as specimen plants. Very attractive in groups. 3 to 4 feet, \$1.50.

FRONT COVER

The Flowering Crab shown on the front cover of this catalog is Eleyii, listed at the head of this page. Be sure to order one.

Floribunda Flowering Crab

Bechtels Flowering Crab

ORNAMENTAL SHADE TREES

ASH—FRAXINUS

AMERICAN WHITE (Americana)—A handsome, hardy, broad headed, quick growing shade tree, sometimes reaching 120 feet in height. Very valuable in landscape work, for park and street planting, 6 to 8 feet, \$1.25.

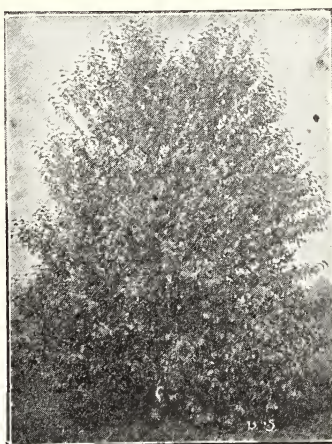

EUROPEAN MOUNTAIN (Sorbus Aucuparia)—An ornamental deciduous tree with beautiful foliage, which turns orange-red in the fall. The fruits are showy and often remain all winter, if not eaten by the birds. Not particular as to soil. 6 to 8 feet, \$1.60.

BEECH—FAGUS

AMERICAN (Grandiflora)—A noble, native tree of large size and round, spreading habit. Attractive at all times but especially so in winter and early spring, when the bark is grayish-white. The medium sized, triangular-shaped nuts are sweet and fine flavored. 4 to 6 feet, \$1.50 each.

American Ash

American Beech

Ornamental shade trees play an important part in the arrangement of all lawns and parks. They are often invaluable as windbreaks, supply shade, and help retain the moisture—conditions that are essential to the growth of many of the choicest shrubs and perennials.

AILANTHUS

TREE OF HEAVEN. An attractive tree for the garden and for planting close to the house; makes a deep tap root that will not interfere with foundations. The foliage is much like the sumac, but on a larger scale, has flowers in large panicles followed by fruit clusters that are often highly colored. Very ornamental. 4 to 6 ft., 80c; 6 to 8 ft., \$1.10; 8 to 10 ft., \$1.25.

RED BUD

LINDEN—TILIA

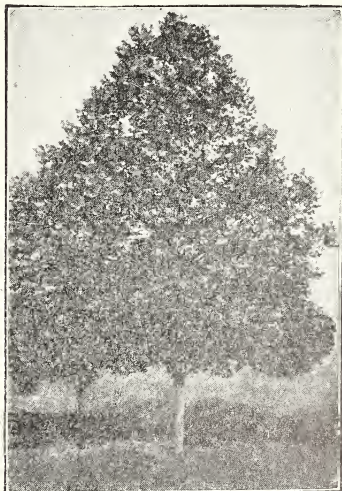

AMERICAN LINDEN (Basswood)—A beautiful, rapid-growing tree with large, broad leaves and fragrant flowers. The bloom furnishes the best of bee pasture. The linden should be extensively used as a lawn tree; it is also very valuable for park and street planting. It thrives in moist, rich soil, but does well in any good soil. 6 to 8 feet \$1.25.

RED BUD

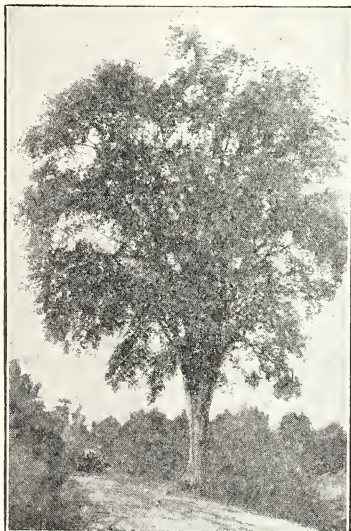

CERCIS CANDENSIS—A handsome ornamental tree growing twenty or thirty feet high. It has broad irregular head and perfect, heart-shaped glossy leaves. Beautifully attractive in early spring when the leafless branches and twigs are covered with rosy, pink blossoms. Very beautiful and attractive planted as single specimens or in groups. 3 to 4 ft., 50c each; 4 to 5 ft., 80c, each.

AMERICAN PLANE

SYCAMORE or BUTTONWOOD (P. Americanus)—Widely planted tree. The bark is picturesquely shaded with gray and white. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.25; 10 to 12 ft., \$1.60.

American Plane

American Elm

ORNAMENTAL SHADE TREES--CONTINUED

DOGWOOD—CORNUS

FLORIDA (White Dogwood)—Handsome tree of medium size, flowering after red buds when most other trees are still bare. Great white flowers are three inches across, lasting in favorable weather for several weeks. The bright red bark on its young branches makes it cheery in winter. Blooms when small. 2 to 3 feet, 70c each; 3 to 4 feet, \$1.00 each.

FLORIDA (Var. Rubra)—A very beautiful form of the dogwoods with blossoms that are pink on the outside of the petals. 2 to 3 feet, \$3.00.

FLOWERING CRAB—PYRUS

FLORIBUNDA—A small tree often thorny, covered with beautiful rose-red flowers about the time the leaves appear. The fruit is small, red and borne on long, slender stalks. 3 to 4 feet, \$1.00.

BECHTEL'S FLOWERING CRAB—The most beautiful of the flowering crabs. The trees rarely grow over twenty-five feet, and bloom when quite young. At a distance the fragrant, delicate pink flowers look like dainty little roses. 12 to 18 in., 50c; 18 to 24 in., 75c; 2 to 3 ft., \$1.00 each.

HALLEANA (Parkman's Flowering Crab)—A dwarf or small tree growing from six to fifteen feet high. Its beautiful flowers are rose-colored, half-double, and hang on slender, reddish pedicels. The fruit is small, brownish red, and ripens quite late. In every way a beautiful tree. 3 to 4 feet, \$1.00 each; 4 to 5 feet \$1.50 each.

For New Flowering Crabs see page 6.

BIRCH—BETULA WHITE BIRCH

Of wonderful grace and beauty. Tall, vigorous with slender branches; foliage colors brilliant in fall, and its bare white trunk and branches are very beautiful in winter. 4 to 6 ft., \$1.50.

For Japanese Maple see page 4.

Silver Maple

MAPLE—ACER

BOX ELDER (Negundo)—Large, spreading tree of rapid growth; very hardy, and a good drought resister. Largely planted for wind breaks and timber. Leaves resemble those of the ash. 8 to 10 feet, \$1.00 each.

NORWAY (Platanoides)—Large, handsome tree with a compact rounded head of spreading branches, attaining a height of 75 feet. The broad, deep green leaves cast a dense, refreshing shade. One of the best and most beautiful trees for the street, the park, cemetery, or lawn planting. 6 to 8 ft., \$2.00; 8 to 10 ft., \$3.00.

SILVER (Saccharinum)—This is one of the best known of all maples. It is an ornamental tree with wide, slender spreading branches. Thrives almost anywhere, but grows very rapidly in moist, rich soil. 6 to 8 feet, 75c each; 8 to 10 feet, \$1.00 each.

SUGAR or ROCK (Saccharum)—Large trees to 120 feet with gray bark. Long lived. Grows well except in damp, soggy soils.

An excellent street and shade tree of upright, dense growth. turning bright yellow and scarlet in autumn. 6 to 8 feet, \$1.50 each; 8 to 10 feet, \$2.25 each.

SCHWEDLERII (Purple-leaved Norway Maple)—One of the most beautiful of the shade trees. In early spring the young leaves are bright red, changing to purplish green as they grow older. In autumn they are golden yellow. The tree has a round, compact head and large leaves which cast a dense shade. 6 to 8 feet, \$2.00 each.

SIBERIAN MAPLE (Acer Ginalla)—A low growing, very hardy tree. Beautifully colored foliage in the spring and fall of the year. Leaves somewhat similar in shape to the Japanese Maple. Hardier than any other maple. Used very often in shrubby planting, windbreaks and screens. Price 3 to 4 ft. plants \$1.00 each; 3 for \$2.50.

Halleana Flowering Crab

Sugar or Rock Maple

ORNAMENTAL SHADE TREES--CONTINUED

POPLAR—POPULUS

CHINESE (*Chinensis*)—A rapid growing tree, with a habit similar to the Lombardy Poplar. Branches are longer however and leaves are smaller. Very picturesque tree and it is said to live to a great age. Will grow in any location. Price, 10 to 12 ft. trees, \$1.35 each; 3 for \$3.75.

LOMBARDY (*Nigra*, var. *Italica*)—One of the characteristic trees of Italy. With age, the Lombardy poplar becomes one of the most striking and picturesque trees, particularly when some of the sprouts are allowed to grow about the old stock. Excellent for landmarks. 6 to 8 ft., 50c; 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.25.

TULIP TREE—LIRIODENDRON

YELLOW WOOD (*Tulipifera*)—Tall, handsome, hardy, ornamental, pyramidal habit, rapid growth. Has clean foliage, light bluish green; rarely attacked by insects fragrant yellow and orange flowers in June. 6 to 8 feet, \$1.50 each.

Pin Oak

OAK—QUERCUS

Prices on All Kinds of Oak Trees, 6 to 8 feet, \$1.50

SCARLET OAK (*Coccinea*)—A noble tree, attaining a height of eighty feet. Has gradually spreading branches, which form a rather open head. Grows and thrives in dry locations. Especially beautiful in fall, when the leaves turn to a beautiful scarlet.

PIN (*Palustris*)—Handsome tree, especially when young. Often used for avenues; grows rapidly, prefers a somewhat moist soil. The foliage turns bright red in fall.

RED (*Rubra*)—Beautiful oak, of rapid growth.

MAGNOLIA

Some varieties are not on the market, but the varieties we offer below are the best that can be had at the present time. Transplant in Spring only.

SWEET or WHITE BAY (*M. Clauca*)—Slender tree or large shrub. \$3.00 each.

UMBRELLA TREE (*Magnolia Tripetela*)—Grows to 40 ft., \$2.50.

SWEET GUM

GUM, SWEET (*Liquidambar Styraciflua*)—Another native tree not appreciated. It is not of rapid growth nor especially easy to transplant, but the glossy foliage in summer, the brilliant color in the fall and the unusual appearance in the winter of the young branches with their corky bark are considerations that make it especially valuable. Prices, 3 to 4 ft., \$1.00; 4 to 5 ft., \$1.25; 5 to 6 ft., \$1.60.

WILLOW—SALIX

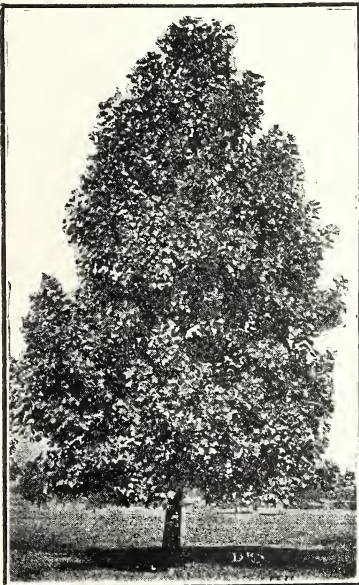

GOLDEN BARK, VITELLINA AUREA—A most graceful tree of large size. Its long, wavy branches of highly colored gold bark are very attractive. Very conspicuous during the winter months. Showy at any time. Price, 4 to 5 feet, \$1.25 each.

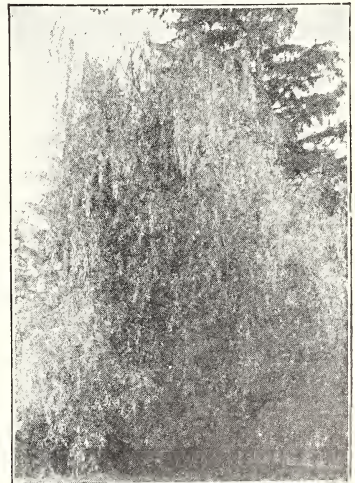

Lombardy Poplar

HORSE CHESTNUT

EUROPEAN (*Aesculus Hippocastanum*)—A tree of slow growth, yet very attractive in its roundish form with large leaves that are conspicuous in early summer. It is specially valued for the long panicles of flowers, white and tinged with red. Prices, 5 to 6 ft., \$2.00 each; 4 to 5 ft., \$1.50 each.

Tulip Tree

Wisconsin Weeping Willow
(See page 10)

NUT TREES

Almost every farm contains land that should be planted to nut trees adapted to the soil. Nuts in many cases pay better than farm crops or fruits, while most kinds are making a growth of valuable timber that will of itself pay a large per cent on the investment.

PECAN

Pecan growing is becoming a favorite industry in the Southern and Western States and is quite profitable. The trees are long lived, quite hardy and productive. A species of hickory which may well rank first among our native nuts. They are large, thin shelled, full kernels and of rich flavor. 2 to 3 feet, 75c each.

ENGLISH WALNUT

A fine ornamental tree that grows well in the climate of the Middle States and bears freely. Large profits are realized from the orchards of California and the South and still large quantities of these nuts are imported. The nut is about the size of a black walnut; it has a thin shell and contains a large kernel which has a very delicate flavor. 2 to 3 feet, \$1.40 each.

WHITE WALNUT OR BUTTERNUT

This tree is chiefly esteemed for its abundant crops of fruit, which abounds in oil, and is sweet and rich. The form of the nut is oblong, oval, and narrowed to a point at the extremity. The husk is covered with a sticky gum, and the surface of the nut is much rougher than any other of the walnuts. The tree is considered valuable as a park tree. 2 to 3 feet, 40c; 3 to 4 feet, 75c.

BLACK WALNUT

This is one of the largest, grandest, and most massive of our forest trees. It is a favorite of the landscape gardener. A very good tree for public planting on account of its rapid growth and handsome foliage. The timber of this tree is very valuable. The nuts are large, round, covered with a thick husk, and the kernel has a fine flavor, much liked by many people. 3 to 4 feet, 75c each.

JAPAN WALNUT

Large, spreading top of this tree makes it very ornamental. Trees very hardy, having stood a temperature of twenty degrees below zero without injury, begins to bear when three years old. The nuts are larger than the common hickory nut and borne in clusters of from ten to twenty. The shells are moderately thick, the kernels are sweet. Should be extensively planted. 2 to 3 feet, 75c each.

**NEW AND RARE PLANTS
ON PAGES 3, 4, 5 and 6**

WEeping TREES

The weeping trees are very interesting as well as beautiful and effective when rightly placed upon the lawn, or in the park. The charm of these trees is not their stateliness and grandeur so much as it is the odd and fantastic shapes which they so often assume. The best and most satisfactory are offered below.

WEIR'S CUT LEAF WEeping MAPLE

This variety of the maple has very pendulous branches and the leaves are deeply cleft, giving them almost a fern-like appearance. 6 to 8 feet, \$2.00.

WEeping MULBERRY

(Alba, var. Tartarica Pendula)—We recommend this as one of the thriftiest, hardiest and most beautiful of the weeping trees, with slender, willowy branches that sweep the ground, forming a beautiful tent of green. 2 year heads, \$3.50 each.

WEeping WILLOW

GOLDEN WEeping (Elegantissima)—A strong and the most vigorous grower of all the weeping willows. Used for planting in low places or on the banks of streams, springs, lakes or ponds, making a very beautiful effect. 6 to 8 feet, \$1.00 each.

WISCONSIN WEeping (Dolorosa)—A weeping tree of rarely more than 40 feet in height. The branches are long, slender and pendulous. Trees are quite hardy and will stand planting in the northern states, 6 to 8 feet, \$1.00 each.

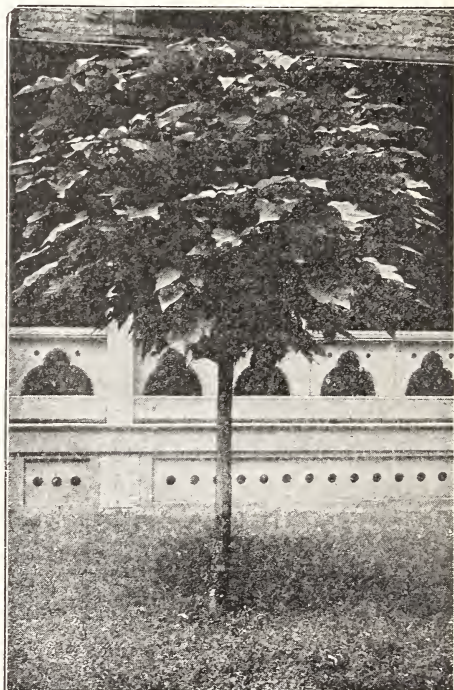

BABYLONIAN—A beautiful weeping tree with long drooping branches, sometimes 30 ft. long. Sways gently with the wind and is most desirable, price 6 to 8 ft. \$1.00; 8 to 10 ft. \$1.60 each.

WEeping CUT LEAF BIRCH

Birches not only form an interesting class of trees, but they are also beautiful and ornamental. They are especially desirable for park and other ornamental planting. The bark usually separates into thin, papery leaves. The foliage is rarely attacked by insects. Their graceful habit, slender and often pendulous branches, and their picturesque white trunks, make them conspicuous marks on any landscape. Price 6 to 8 ft., \$4.00 each.

CATALPA BUNGEII

UMBRELLA TREE—Just the tree to be used for formal effects. Propagated on a stem of the Catalpa Speciosa. It makes a very unique ornamental tree. Has a broad, dome-shaped head at the top of a long, straight stem. When the tree attains its full growth, the top is often 15 feet in diameter and not over 3 to 4 feet tall on top of a strong stem from 5 to 7 feet in height. An exceptionally hardy variety. 5 to 7 feet, 1 year heads, \$1.50 each; 2 year heads, \$2.60.

Catalpa Bungei

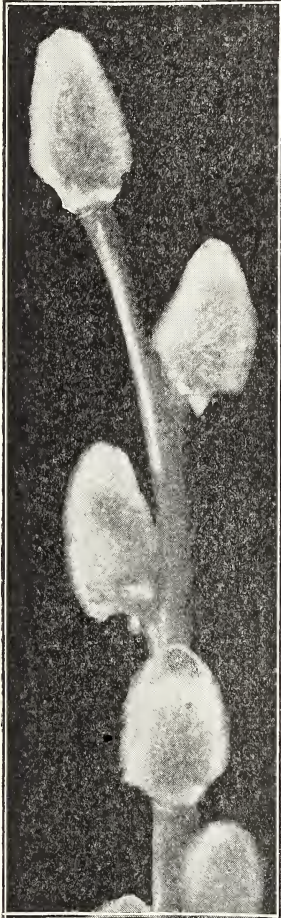

FOR CEMETERY PLANTING

HARDY PLANTS ESPECIALLY DESIRABLE

For the past few years we have had a great many inquiries from our customers asking about suitable plants for Cemetery planting.

We feel that we would like to encourage this class of planting as much as possible, because we believe that a suitable shrub or plant will express more sentiment than the costliest of stone. We know that ordinary monuments seem rather cold and uninviting unless they are relieved with the soft colors of nature.

In order to assist those who are interested, we are devoting an entire page to various classes of plants most suitable for Cemetery planting, and want to assure our customers that we will take special interest in orders from this department.

French Pussy Willow

REGALS LILY

One of the most beautiful of all known lilies. It is a new introduction from Northern China, and once it becomes generally known it will be used exclusively as an Easter lily.

It is very hardy and will bloom out doors in June or early July. Mature bulbs produce from 5 to 15 flowers on a single stem which retain their freshness over quite a long period. Price, 3 year old bulbs, 60c each; 2 for \$1.00; 12 for \$5.50.

NEW ROSE CLAUDIUS PERNET

This rose is a recent introduction and has been awarded 3 medals in Europe.

It is the only perfectly hardy ever-blooming yellow rose in existence. The buds are long and pointed and the flowers when they open are a very bright yellow with a dark center. Blooms all summer. Price, strong plants, \$1.50 each; 3 for \$4.00.

SPIREA VAN HOUTTEI

Spirea Van Houtteii is especially desirable for cemetery planting. It is very hardy and easily grown, has nice clean foliage all season and is not attacked by any disease. When in bloom, the white drooping flowers are very attractive, and appropriate for cemeteries. Hardy everywhere in United States.

Our Price for extra fine specimen plant, 3 to 4 feet high, 50c each, 3 for \$1.40.

FLOWERING ALMOND

A very hardy, dwarf shrub, covered with small, double flowers about 1/2 inch in diameter in the early Spring. It is very attractive and dainty. Price, 2 to 3 feet, 75c each; 3 for \$2.00.

EUONYMUS RADICANS

A hardy evergreen vine, or will form a low spreading shrub where it can not climb. Valuable for covering graves, especially desirable for shady locations. Price, year old plants, 60c each; 3 for \$1.50.

Philadelphus Virginal

PHILADELPHUS VIRGINAL

One of the most beautiful shrubs of recent introduction. It blooms very freely, the extremely white flowers produce on wood of the same year's growth. It grows about 3 1/2 to 4 feet high, and plants on our own ground last year produced flowers all Summer. Price, 2 to 3 ft. plants, \$1.00 each; 3 for \$2.75.

FRENCH PUSSY WILLOW (SALIX CAPRAE)

Not the wild pussy willow but a cultivated variety that has made a sensation wherever it has been shown. Branches of this variety have been selling at retail during the winter months in cities at from \$1.00 to \$2.00 per dozen.

You Can Grow Them on Your Own Lawn. Enjoy these dainty silvery flowers every winter. A beautiful round shrub in summer. Wherever you have room for a Lilac or Snowball, you have room for a Pussy Willow. Use them for tall screens or backgrounds.

Plant one or more of them this fall. Cut the ends of the branches in January or February. Place them indoors in a vase of water. Watch them unfold their large catkins of silvery pink, from 1 to 2 inches long. They will repay you many times their cost in pleasure.

PRICES—60c each, 3 for \$1.25, 6 for \$2.00. Size of plants 4 to 5 feet.

BIOTA NANA AUREA

This new evergreen is commonly known as the Golden Chinese Arborvitae. It is a beautiful, compact, little evergreen of a dwarf nature. It has a clear yellow color in the springtime which gradually gives way to a yellow-green during the winter months. Its size, color, compact habit of growth and foliage makes it especially desirable for Cemetery planting. Price, 18 inch plants, \$4.25 each.

EVERGREEN CREEPERS FOR COVERING GRAVES

PACHYSANDRA JAPANESE SPURGE

This is a new evergreen trailing plant 6 to 18 inches high and forms broad mats of bright, shiny, green foliage. A good ground cover which will grow in all shady locations, and the only plant that will thrive under pine trees. Price, strong field grown plants, 20c each; \$2.00 per dozen.

LIVE FOREVER

SEDUM ACER

This is a creeping plant very adaptable to covering graves. It is practically evergreen, covered with yellow flowers in mid summer and a beautiful waxy, bead-like foliage. It does not get over four inches high, very hardy and requires no attention after being once established. Plant six inches apart both ways. Price, 15c each; \$1.50 per dozen; \$10.00 per 100.

CREEPING PHLOX

This is also called Moss Phlox or Mountain Pink. It has a beautiful evergreen foliage and the plants are literally covered with beautiful bright pink flowers early in the spring. The foliage is very attractive and the plants will stand a lot of abuse when once established. They do not get over three inches high and will grow very dense. Price, 50c each; \$1.50 dozen; \$10.00 per 100.

ENGLISH IVY

A hardy evergreen climbing vine with dark green leaves. It is a true evergreen and retains its bright, green leaves all winter and much used for cemetery work. Price, 50c each; \$5.00 per dozen.

LOW PRICED EVERGREENS

Plant Evergreens for all year round beauty. Use them for foundation plantings, windbreaks, or in the open as specimen ornamental trees.

Our Evergreens are properly grown, always dug with a ball of earth and burlapped, and as they have been several times transplanted, they have a perfect root system, thereby assuring success to the planter.

ARBOR VITAE—THUYA

AMERICAN (*Occidentalis*)—The foliage is of a light green color. This is a very good tree for grouping, for tubs and vases, and for formal uses they are unsurpassed. They are very quick growers and may be trimmed to any desired height. Fine for hedges. 18 to 24 inches, \$1.50 each; 2 to 3 feet, \$2.75 each.

CHINESE (*Biota Orientalis*)—A pyramidal tree finally attaining a height of 25 feet, very compact form. Foliage is bright green. 18 to 24 inches, \$2.00; 2 to 3 feet, \$2.50.

PYRAMIDAL (Var. *Pyramidalis*)—Forms a tall, slender column of densely branched, dark green foliage. Very graceful tree, having a number of uses. 2 to 3 ft., \$3.00; 3 to 4 ft., \$5.00.

GLOBE (Var. *Globosa*)—A dense, dark green form of the arborvitae, growing naturally in globe form. Of dwarf habit. 15 to 18 inches, \$2.00.

Boxwood

evergreen plantings. Foliage similar to Retinospora. Very fine. Price, 12 to 15 inch, \$1.50 each.

BOXWOOD

The most popular Evergreen for planting in tubs or boxes. These beautiful Evergreens, with their tiny leaves and compact habit of growth, are well adapted to formal planting and we are offering them at a low price for the first time in years. Our stock is American grown, bushy, of pyramidal form, and are matched to make pairs on all orders of two plants.

PRICES OF BOXWOOD

	Each	Per Pair
12 to 15 inches.....	\$1.75	\$3.00
15 to 18 inches.....	2.25	4.00
18 to 21 inches.....	3.00	5.50
21 to 24 inches.....	3.50	6.50

CYPRESS—RETINOSPORA

GOLDEN JAPAN (*Plumosa*, var. *Aurea*)—This is a very striking and useful evergreen in many ways, as it is one of the few really golden evergreens. It makes a strong and effective contrast with the darker foliage of other evergreens. It is low branched and a very vigorous grower and is unsurpassed for effect in grouping. 18 to 24 inches, \$3.00; 2 to 3 feet, \$4.00.

PLUMED (*Plumosa*)—Young growth of this variety is a beautiful golden. Is very desirable. 1½ to 2 feet, \$2.50; 2 to 3 feet, \$3.50 each.

SAWARA (*Pisifera*)—A tall-growing tree with horizontal branches; branchlets flattened, and somewhat pendulous. One of the best Retinospora, being highly ornamental and well known. 2 to 3 feet, \$4.25 each.

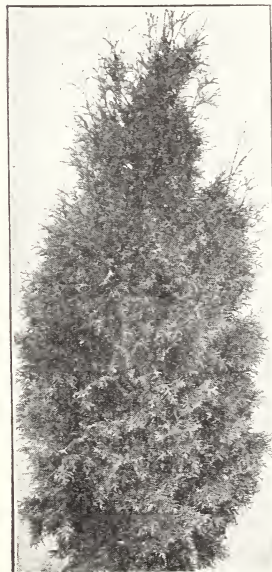

FIR—ABIES

BALSAM (*Balsamea*)—An ornamental evergreen that is very hardy. The fragrant leaves are dark green above and pale beneath. For ornamental purposes it is unexcelled. Grows rather rapidly when young. Requires good drainage. 2 to 3 feet, \$2.50.

CONCOLOR (White Fir)—A picturesque Colorado species; long, leathery leaves, with glaucous tinge when young, becoming pale green with age. Branches arranged in horizontal whorls. Price, 2 to 3 ft., \$5.00.

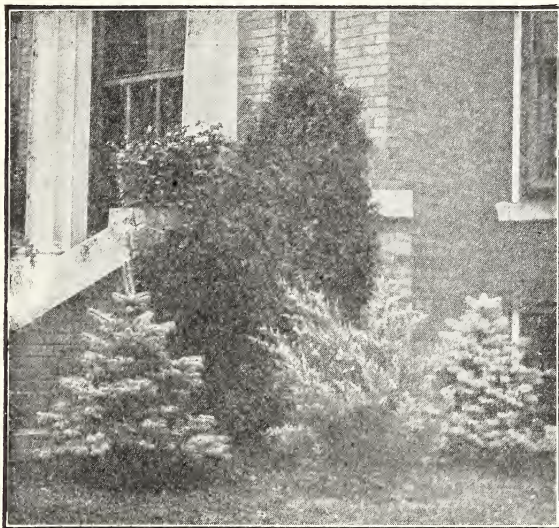

Globe Arbor Vitae

Pyramidal Arbor Vitae

Tom Thumb, Arbor Vitae

(Tall) Chinese Arbor Vitae
Col. Blue Spruce Juniper Pfitzeri Col. Blue Spruce

be distinguished by its grayish blue color and quick growth. It matures while comparatively young and lives to a good old age and is altogether very desirable. 18 to 24 inches, \$2.50.

DOUGLAS SPRUCE—PSEUDOTSUGA

FALSE TSUGA (Taxifolia)—This is the tallest and one of the important forest trees of western North America. It would be difficult to overrate its beauty. It probably grows faster than any other conifer. Very desirable for grouping. 2 to 3 feet, \$4.50.

HEMLOCK SPRUCE—TSUGA

HEMLOCK SPRUCE (Canadensis)—This is one of the most graceful and handsome of the evergreens and is especially valuable for hedgings of evergreens, windbreaks and for specimen planting. The lumber of this tree is much used for frames of buildings. Finally attains a height of 70 to 80 ft. 2 to 3 ft., \$3.50.

JUNIPERS—JUNIPERUS

PFITZERI (Chinensis var. Pfitzeriana)—A tree forming a broad pyramid with horizontally spreading branches. 18 to 24 inches, \$4.50 each.

IRISH JUNIPER (Communis, var. Hibernica)—A narrow, columnar form, with upright branches, deep bluish green tips of branches erect. 2 to 3 feet, \$3.00 each.

RED CEDAR (Virginiana)—This evergreen attains a height of 100 feet, with conical head and spreading or upright branches. Leaves are spiny pointed. 2 to 3 ft., \$2.50.

Norway Spruce at Entrance

EVERGREENS-CONTINUED

SPRUCE—PICEA

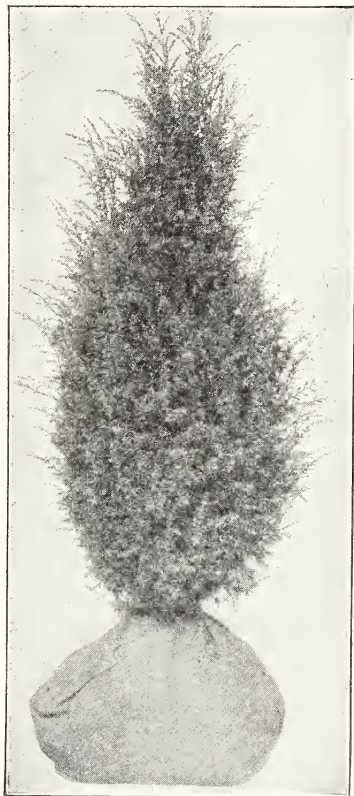

COLORADO BLUE (Pungens)—A handsome and very hardy tree of symmetrical habit, with light, sometimes almost silvery white foliage. Good in landscape work. 18 to 24 in., \$9.00.

COMPACT (Var. Excelsa Compacta)—A dwarf, compact form; originated in the Arnold Arboretum. Light green foliage. 12 to 18 in., \$3.00 each.

NORWAY (Excelsa)—This tree is extensively planted in many of the states. Is one of the best conifers to plant for shelter and windbreaks. 18 to 24 inches, \$1.25; 2 to 3 ft., \$2.00.

ORIENTAL (Orientalis)—An exceedingly graceful spruce with dark, glossy foliage. It is of slow growth, therefore valuable for small gardens. It holds its lower limbs for many years and eventually attains the height of 120 feet. 18 to 24 inches, \$2.90.

WHITE (Alba)—A very ornamental tree similar to the Norway Spruce. One of the best for cold climates. Is an upright, compact grower, and retains its branches to the ground. It can

Irish Juniper

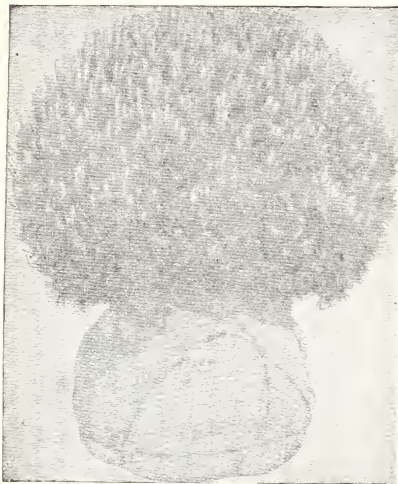

SAVIN (Sabina)—A low, wide-spreading, thickly branched evergreen shrub rarely 5 ft. high. 15 to 18 ins., \$3.00.

BLUE JUNIPER (Juniperus Virginiana Glauca)—A beautiful, graceful evergreen of a distinctly blue color.

Very hardy. Will do well in most any location. One of the very best evergreens. Price, 2 to 3 ft., \$5.50 each.

YEW—TAXUS

JAPANESE (Cuspidata)—A most desirable dark green foliage plant, suited for single specimens or for grouping. 18 to 24 inches, \$4.00.

Mugho Pine

EVERGREENS--CONTINUED

AUSTRIAN PINE—This species is very popular for grouping or as specimens. A very tall, massive tree, with heavy, plumed, spreading branches and rather stiff, dark green needles. Most of these species make a vigorous growth when young and when older are very picturesque. Should be planted when young from nursery row. Prices 2 to 3 ft., \$2.00.

SCOTCH PINE—This grows to be a large tree, seventy to one hundred and twenty feet in height, with spreading, somewhat pendulous branches pyramidal when young, with broad and round top, often picturesque head in old age. Quite hardy. 2 to 3 ft., \$2.00 each.

NOTE—Austrian and Scotch Pines cannot be shipped west of the Mississippi River.

MUGHO PINE (Dwarf Mountain Pine)—This Pine is very valuable in habit, with dark brown branches, bright green leaves, stout and acutish. The cones are ovate, a light gray in color, surrounded by a blackish ring. The tree is broader than it is high, forming a dark, dome-shaped bush. Very effective for rocky places. 12 to 18 inches, \$2.00 each.

EVERGREEN SHRUBS AND VINES

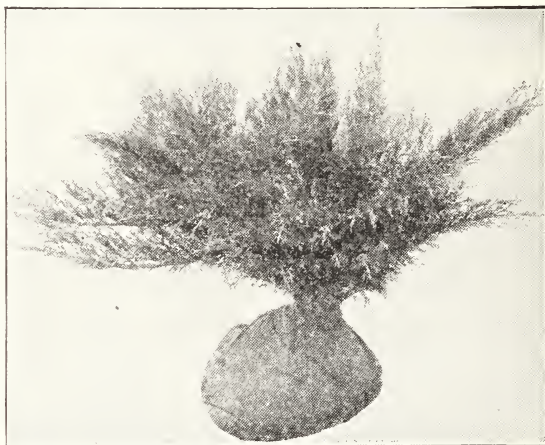

EUONYMUS RADICANS—An evergreen climbing vine, or can be grown as a low shrub. Makes a beautiful evergreen covering for a foundation wall, back of a shrubbery planting. Grows in either sun or shade. Price 60c each, 3 for \$1.50.

EUONYMUS VEGETUS (Evergreen Bitter Sweet)—Bears beautiful berries like the common Bitter Sweet. Holds its large glossy green leaves throughout the year. Very hardy, low dense shrub. Price, 60c each, 3 for \$1.50.

EUONYMUS JAPONICA—Broad evergreen ornamental tree or shrub. Not hardy north of the Ohio River. Price, 18 to 24 in., \$1.00 each.

MAHONIA AQUIFOLIA (Holly Leaved Barberry) (Oregon Grape)—A hardy evergreen shrub having holly-like leaves. Can be used in evergreen and shrubbery planting and will do well in partial shade. Price, 15 to 18 inches, 80c each; 3 for \$2.00.

ENGLISH IVY—A hardy evergreen climbing

Juniper Savin (See Page 13)

vine with dark green leaves. It is a true evergreen and retains its bright green leaves all winter and much used for cemetery work. Price, 50c each; \$5.00 per dozen.

ILEX OPACA (American Holly)—Evergreen ornamental tree which produces red berries in the fall. Hardy as far north as central Ohio. The kind of holly we get for the Christmas Holidays. 3 to 4 ft., \$2.50 each.

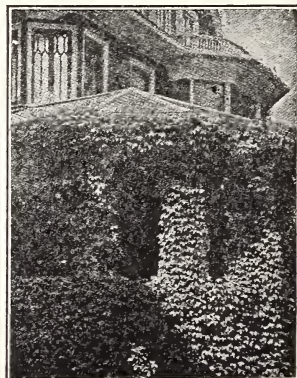

PACHYSANDRA (Japanese Spurge)—This is a new evergreen trailing plant 6 to 18 inches high and forms broad mats of bright, shiny green foliage. A good ground cover which will grow in all shady locations, and the only plant that will thrive under pine trees. Price, strong field grown plants, 20c each; \$2.00 per doz.

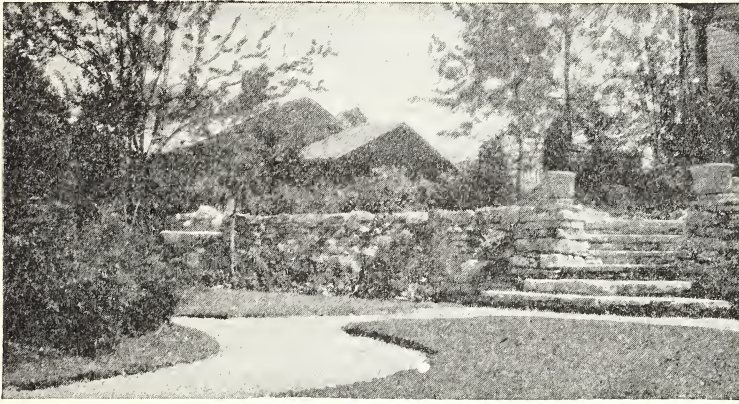

Mahonia Aquifolia

BROADCASTING

Every Thursday night, between 8 and 8:30 we will broadcast our "Garden of Music" program from W. L. W. Cincinnati. We hope you will enjoy the program.

English Ivy

An Inviting Rear Yard

LANDSCAPE SERVICE

Mystery and romance seem to cluster around the garden giving a peculiar fascination and charm that appeals to every one, and even the smallest garden may be the embodiment of quaintness and daintiness.

The ideas and principles of gardening may be adapted to large or small areas. One garden may be awe-inspiring with its great proportions. The other may be small, quaint and sublime to the finest degree.

Not unlike other worth while arts, gardening must give full satisfaction all the year around. Whether dressed in the green foliage of summer, or the white mantle of winter, it should be an ever changing canvas interpreting the moods of the season.

For convenience of our customers desiring to do landscape work, we have engaged the services of Mr. A. J. Vocke, whose many years of experience will be of value to you. Write to him, telling him your landscape problems, and it may be that he will be able to offer you some helpful suggestions and advice. He will also offer you satisfactory Landscape service at a reasonable cost.

If you are interested in doing the planting yourself, he can arrange to make plans for you by mail. These plans vary in price according to the size of the grounds and the work required to plan them, and usually average a small per cent of the cost of the plants required to carry out the plans. In the case of any one purchasing the plants from us, the original cost of the plans are rebated on the order, thus making your plans free.

We have perfect confidence in Mr. Vocke and can recommend him to any of our customers who might be interested in any kind of landscape work. Write to him about your problems and he will give you full particulars about cost, etc.

M. C. Harold Nellie Huston
President Sec'y-Treas.
Recreation Commission

City of
BELLEFONTAINE, OHIO

Spring Hill Nurseries,
Tippecanoe City, Ohio.

Dear Mr. Vocke:

At a meeting of our Commission last evening your bill for work at Harmon Field was voted unanimously. There was considerable satisfaction expressed your whole plan of the Field and for the way it has been carried out. I have not been down there this week, but if tomorrow is bright I shall go to the Field to make some pictures of the stone work.

Mr. Moots, city Auditor, will mail you your check, I am sending him a voucher for it in this mail.

I want to thank you for the way you pushed the work, and for your whole plan of it. It pleases me mightily. It has been a real need and I long have wanted to get it started but until this autumn the time was not ripe. We shall hope for a fine Field in a year or two.

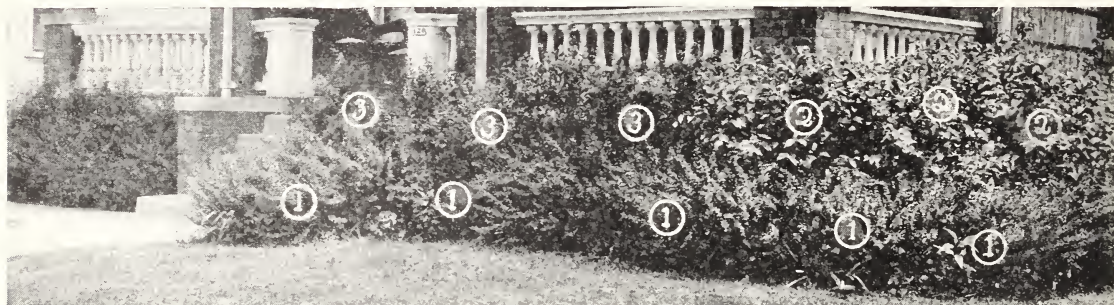

Yours very truly,
Nellie Huston

Beautify Your Home with Tasty Plantings

A walk with nature in her undisturbed retreats will soon reveal to her student and lover that she has been most lavish with certain species of shrubs in the various localities. These varieties are frequently good to be used when beautifying the home surroundings, but aside from these, many other varieties are always needed to add variety and many times to aid in making up the succession of bloom. In many ways nature may be followed. It has been noted among other things that isolated specimens are seldom if ever to be found. Here we learn to plant in masses or groups for best results. Do not delay another season in planting at least some shrubs, for they add materially to the beauty and attractiveness of any home or public place.

Shrubs provide material of a permanent character for the adornment of property at less cost and more effectively than anything else.

FLOWERING ALMOND PRUNUS

DOUBLE FLOWERING ALMOND (*Amygdalus*, var. *Plena*)—Pink and white varieties. Hardy as far north as Ontario. Flowers very double and appear in early spring. 2 to 3 feet, 75c each; 2 for \$1.40.

PURPLE LEAVED PLUM (*Cerasifera*, var. *Pissardi*)—One of the best of all purple-leaved trees, holding much of its color in the American summers. It seems to be hardy wherever the common plum is. 3 to 4 ft., \$1.00 each.

Flowering Almond

ALTHEA

ROSE OF SHARON

HIBISCUS SYRIACUS—One of the commonest of the ornamental shrubs, and hardy as far north as Ontario. The shrub is valuable for specimen planting and its bright green leaves and great abundance of variously colored flowers make it very effective when planted as a hedge. The color ranges from blue-purple to violet-red, flesh color and white. There are also double forms. The plants we offer are strong, field grown, two and three year. Page 25 for prices on hedge size plants. Price 2 to 3 ft., 35c each, 3 for \$1.00.

JEANNE D'ARC—Double white.

RUBIS—Single red.

TOTUS ALBUS—Single white.

AMPLISSIMA—Purple. Shrub form.

BOULE DE FEU—Double red. Shrub form.

MONSTROUS—Double red.

ARDENS—Light pink.

BICOLORE—White and red.

PAEONYFLORE—Rose color.

AMERICAN BANNER—Mauve

Althea Bicolor

ARALIA

ARALIA (*Pentaphyllum*)—Five leaved Aralia, 6-8 ft. Yellow. June. This is an unusually hardy shrub, thriving in very adverse soil and city conditions. It will grow under the shade of trees where all else fails. The flowers are inconspicuous but the foliage is very attractive. The canes are inclined to be prickly and comparatively upright in their habit of growth. Prices 2 to 3 ft., 50c each; 3 for \$1.25.

SPINOSA (*Hercules Club*, *Angelica Tree*, *Devil's Walking Stick*)—A shrub, sometimes growing to 15 feet in height. Stout, prickly stems, large leaves, enormous clusters of flowers, give this species a very sub-tropical appearance. 50c each; 3 for \$1.40.

ABELIA GRANDIFLORA

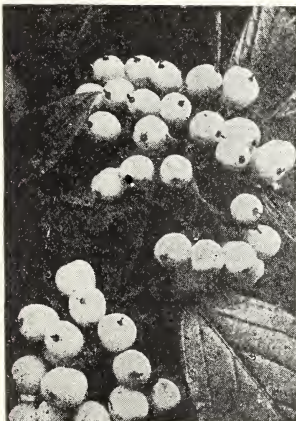

ABELIA—2-4 ft. White. July to September. This is a comparatively new shrub. It is one of the most attractive of the newer plants and we predict that it will become as popular as *Spirea Van Houtte*. There is hardly a plant that blooms over quite as long a period. The leaves are especially attractive, being very glossy dark green. It is classed as a semi-broad-leaved evergreen and in mild winters will hold its foliage throughout that season. Does well in shady as well as sunny locations and will adapt itself to all types of soil. Price 2 yr., 75c each; 2 for \$1.25.

BASTARD INDIGO

An interesting ornamental shrub of spreading habit with fine, feathery foliage, remarkable for the unusual color of its dark violet-purplish flowers. 35c each; 3 for \$1.00.

Abelia Grandiflora

Cornus Sibirica

NOTE—Beginning January 5th and continuing through January, February and March of 1928, we will broadcast through W. L. W. each Thursday night, a program called "The Garden of Music." We will also give some special talks on plants that should be of interest to plant lovers.

HARDY SHRUBS--CONTINUED

Butterfly Bush
NOTE—For a new Butterfly Bush See Page 3

BUTTERFLY BUSH

Buddleia Summer Lilac

(*Varibilis Magnifica*)—This shrub of comparative recent introduction has grown into favor almost immediately. It is a semi-herbaceous plant, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other material as winter approaches, as it will help to produce a heavy growth the next season. It is very hardy; blooms the first season, usually from June until frost; the blossoms are borne on long, graceful stems, which terminate in tapering panicles of lilac-colored flowers that are of miniature size, the flower head is frequently ten inches long. 35c each; 3 for 90c.

DOGWOOD

Cornus

CORNELIA CHERRY (*Mascula*)—Ornamental shrub or small tree of dense growth, glossy leaves; attractive in early spring with its yellow flowers. 2 to 3 ft., \$1.00 each.

ELEGANTISSIMA—This is a beautiful plant. The leaves marked with white. 18 to 24 in., 50c; 2 to 3 feet, 75c each; 2 for \$1.40.

RED TWIGGED (*Sanguinea*)—Grows 10 to 12 feet high, purple or dark blood-red branches. Flowers greenish-white. Fruit is black. 18 to 24 inches, 30c; 2 to 3 feet, 40c each.

WHITE (*Florida*)—Handsome foliage, often assuming a brilliant fall coloring; large, white, snowy flowers appearing in May. 18 to 24 in. 35c; 2 to 3 ft., 70c; 3 to 4 feet, \$1.00; 3 for \$2.50.

BARBERRY

Berberis

These beautiful shrubs are very valuable for planting in the shrubbery border or for hedges. They readily adapt themselves to almost any location.

JAPANESE (*Thunbergii*)—Of all the barberries in cultivation this one is probably the best known, the most planted, and the most effective. It is one of the valuable introductions we have received from Japan and is especially to be desired because of its low, dense, horizontal growth, the bright fall coloring leaves, and the brilliant red berries that remain fresh and attractive until the following spring. It is quite hardy and will thrive equally well in shade or in sunny locations. Especially valuable for planting along walks and drives and for massing in the border. 12 to 18 inches for hedges \$15.00 per 100; 12 to 18 inches bushy plants 25c each; 3 for 65c; 18 to 24 inches, 40c each; 3 for \$1.10.

NOTE—For the New Red Leaved Barberry see page 3.

BLUE SPIREA —(CARYOPTERIS)

MASTACANTHUS—Ornamental, woody plants growing their lavender-blue flowers profusely in late summer and autumn. Not altogether hardy, as the tops frequently winter kill almost to the ground, but will throw up numerous shoots that will flower the same season. Not strictly a spirea, 50c each; 3 for \$1.25.

DEUTZIA

An elegant species of strong, erect-growing shrubs. Especially prized for the beautiful clusters of blossoms in May.

PRIDE OF ROCHESTER—Showy, early, large-flowering sort; blossoms in May before others. Grows 6 to 8 feet high. White flowers, large and double. One of the best of the Deutzias. 2 to 3 feet, 40c each; 3 for \$1.00.

LEMOINEI—Spreading shrub to three feet in height. Its pure white flowers appear in broad panicles. A very desirable shrub, more vigorous and with more showy flowers than some of the other forms. Excellent for forcing. Very hardy. 18 to 24 in., 50c; 3 for \$1.40.

GRACILIS—A handsome, dwarf and bushy little shrub with slender, often arching branches. A neat shrub that blooms in May, clothing its

Valuable for shrubberies or for forcing. 12 to 18

CYDONIA FIRE BUSH

JAPAN (*Japonica*)—Common garden form, growing from 3 to 6 feet with spreading, spiny branches. The scarlet-red flowers appear before the leaves and are followed by globular fruits from one and one-half to two inches high. 18 to 24 in., 50c each; 3 for \$1.40.

FLOWERING LOCUST

Acacia

FLOWERING LOCUST (*Hispida*)—This shrub is valued for its elegant clusters of rose-colored flowers, which expand toward the last of May and continues for some time. The branches resemble the Moss Rose. Beautiful for planting in masses, 18 to 24 inches, 50c each; 3 for \$1.40.

CREPE MYRTLE

(*Lagerstroemia*)—The most gorgeous of all blooming shrubs for the South. Blooms throughout the summer, withstands drought wonderfully. It is very effective for hedge and is at its best when pruned every winter and not allowed to grow in tree form. A strong grower and will grow 15 to 20 feet high, making immense heads of crepe-like pink flowers. Not hardy in the northern states. Price, strong plants, each, 35c; 3 for \$1.00.

Deutzia Gracilis

Deutzia, Pride of Rochester

SHRUBS—CONTINUED

ELDER—SAMBUCUS

AMERICAN (Canadensis)—A valuable addition to the shrubbery family. It grows from five to twelve feet in height. Its flowers are white in flat cymes, the fruit is black and ripens in August. 2 to 3 feet, 60c each; 3 for \$1.70.

GOLDEN (Var. Aurea)—A variety of the American with foliage of a beautiful golden color. 2 to 3 feet, 50c each; 3 for \$1.40.

GOLDEN BELL—FORSYTHIA

FORTUNEII (Var. Fortunei)—Grows with upright or arching branches. 18 to 24 inches, 30c each; 3 to 4 ft., 40c each; 3 for \$1.10.

WEeping (Suspensa)—Highly ornamental, free flowering shrub, growing to 8 feet; the branches often drooping on the ground and taking root. They grow in almost any garden soil and are hardy north. The golden yellow flowers appear in early spring. Excellent for margins or groups. 2 to 3 ft., 35c each; 3 to 4 ft., 40c each; 3 for \$1.10.

HYPERICUM—ST. JOHN'S WORT

Shrubs and herbs, with mostly yellow flowers. The form is compact and rounded, with some-what persistent leaves.

H. MOSERIANUM—A novelty of decided merit on account of its large, glistening golden yellow flowers, produced freely from mid summer until hard frost. It is quite dwarf in habit. 12 to 18 in., 50c.

H. PROLIFICUM—Shrubby St. John's Wort. This excellent shrub blooms profusely from the middle of summer until autumn, and its bright yellow flowers are

especially attractive at this season. It is sub-evergreen in character. 12 to 18 inches, 50c.

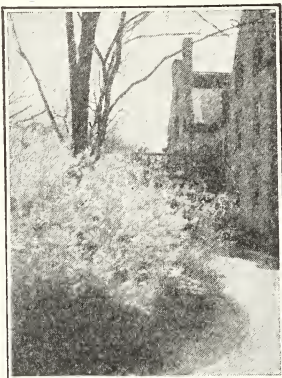

Golden Elder

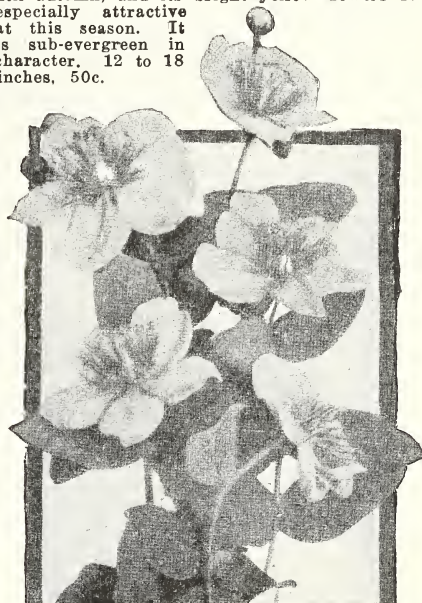

BEAUTYBERRY (Callicarpa Purpurea)—3 ft. Pink-tinted blossoms in August followed by clusters of violet-purple berries. Perennial—in that it frequently is winter killed, but comes again. Prices—2-3 ft., 60c each; 5 for \$2.50; 1½ to 2 ft., 50c; 5 for \$2.00.

KERRIA OR GLOBE FLOWER

JAPANESE ROSE (Japonica)—One of the first shrubs brought from Japan. It grows from four to eight feet high and as broad as high. Very attractive throughout the year; in winter the light green branches, in early June when the yellow flowers appear in great abundance; and again in autumn when the leaves have changed to a clear yellow. Not quite hardy in the northern states. 2 to 3 feet, 50c; 3 for \$1.40.

Golden Bell Forsythia

Kerria, Japonica

RHODOTYPHUS KERROIDES

Sometimes called the White Kerria. A very ornamental, deciduous much-branched shrub, usually from three to seven feet, handsome and distinct, and is hardy as far north as Massachusetts. Has bright green foliage. Made very conspicuous by its white flowers in May or June and black fruits in the fall. 2 to 3 feet, 50c each; 3 for \$1.40.

EXOCHORDA

PEARL BUSH. E. Grandiflora—8 to 10 ft. White. April. This is a plant that is not as well known as it should be. It is one of the most pleasing of the early Spring flowers, being a mass of blossom during April. The leaves are light green, of unusual construction and in mass planting should be used extensively. Prune severely at planting time for best results. Prices—3-4 ft., 60c each; 5 for \$2.50; 2-3 ft., 50c each; 5 for \$2.00.

HONEYSUCKLE

LONICERA

FRAGRANT BUSH (Fragrantissima)—Not quite hardy north of Detroit. It has handsome half evergreen foliage and blooms very early. Sweet-scented though the flowers are not very showy. 18 to 24 inches, 30c; 2 to 3 ft., 40c each; 3 for \$1.00.

MORROWI—A very decorative shrub that reaches six feet in height. The beautiful, pure white flowers appear in May or June and are followed by red fruits, which remain until late autumn. 18 to 24 inches, 30c; 2 to 3 ft., 40c; 3 to 4 ft., 50c each; 3 for \$1.40.

TARTARIAN (Tartarica)—This is one of the old-time favorite shrubs. It attains about ten feet in height and is extremely easy to cultivate. The upper lip is deeply divided and spreading. 18 to 24 in., 30c; 2 to 3 ft., 40c; 3 to 4 feet, 50c each; 3 for \$1.40.

Fragrant Bush Honeysuckle

A PAGE OF BEAUTIFUL SPIREAS

Spirea Van Houttei

Spirea Sorbifolia

SPIREA SORBIFOLIA—A fern leaved spirea, producing large, white plume like flowers in great abundance. A beautiful shrub both in foliage and in bloom. Can be used in group plantings or as single specimens. Price 2 to 3 ft., 65c each; 3 for \$1.75.

SPIREA THUNBERGI (Snow Garland). (F)—2½ to 3½ ft. White. April. The extra early flowering species is the pride of the Southland. It is spreading in growth with arching slender branches that are a perfect mass of minute flowers followed with exceptionally delicate green foliage. For edging purposes it has few equals and we recommend it highly. 18 to 24 in., 65c each; 3 for \$1.50.

SPIREA VAN HOUTTEI (Bridal Bower or Bridal Wreath). (F)—4-6 ft. White. May. This is the most useful of the hardy shrubs. It has grown so popular that we sell more of it than any other variety we grow. The flowers are in flat clusters usually an inch or more across produced on spreading, pendulent branches often drooping to the ground. In full bloom they are a mass of white and never fail to attract attention. The foliage is an attractive green which it retains late in the year. This variety can be used in any location for hedging, grouping and mass effect. There is nothing superior in the catalog. When in doubt what to use, plant Spirea Van Houttei. Prices 18 to 24 in., 25c; 2 to 3 ft., 40c; 3 to 4 ft., 50c; 3 for \$1.40.

SPIREA, S. ANTHONY WATERER (F)—2 ft. Bright pink. June and July. A compact low-growing shrub with dense foliage usually deep green with occasional variegated leaves of pink and white on young growth. Flowers are borne in full flat clusters on erect stems. If these are cut away when they fade the shrub will usually bloom intermittently during the summer. Very valuable for edging in front of shrubbery or sometimes used as a dwarf hedge. Prices 12 to 18 in., 60c; 3 for \$1.40.

SPIREA ARGUTA—Garland Spirea. The unusual mass of tiny white flowers crowd the pendant branches making it one of the showiest of spring shrubs. Foliage bright green, leaves very narrow and attractive. Prices—2-3 ft., 40c each; 3 for \$1.10.

SPIRAEA BILLARDI—An erect-growing shrub with dense spikes of rose-pink flowers in July and August, and again in the fall. Grows 4 to 6 feet high. Does well in moist places. Prices of strong bushes, 2 to 3 ft. high, 40c each, 3 for \$1.10.

SPIRAEA CALLOSA ROSEA—A free-blooming variety, producing large panicles of deep, rosy blossoms nearly all summer. Grows 4 to 6 feet high. Prices of strong bushes, 2 to 3 ft. high, 40c each, 3 for \$1.00.

GOLDEN SPIREA—A rapid-growing variety with masses of snowy white flowers in June. Young foliage bright yellow, changing to golden brown in autumn. Very desirable for group planting. Grows 8 to 10 feet high. Prices of strong bushes, 2 to 3 ft. high, 50c each; 3 for \$1.25.

SPIREA PRUNIFOLIA (Plum-leaved Spirea). (F) 5-6 ft. White. April-May. This is an old-fashioned variety, flowers borne close to the slender erect branches in the spring before foliage appears. The individual flowers resemble miniature roses and usually borne in great profusion. The foliage is shiny dark green and in the fall turns bright red. Prices 3-4 ft., 50c each; 3 for \$1.25.

SPIREA REEVESIANA. Reeves Spirea. (F)—4-5 ft. White. May. This is one of the best of the Spirea group. White flowers borne along the stem just as the foliage appears makes a most attractive bush wherever used. The foliage appears early and remains exceptionally late in the fall. In habit it is very graceful and can be used in foundations where plants of this height are desired. Prices, 2 to 3 ft., 40c each; 3 for \$1.10.

Spirea Anthony Waterer

Spirea Billardi

RADIO TALKS AND MUSIC

Each Thursday night, between 8 and 8:30, we will broadcast a musical program "A Garden of Music", from W. L. W. Cincinnati. Talks will be mornings and afternoons and because it will be of interest to plant lovers and about plants described in this catalog, we hope you will keep this catalog handy for reference.

HARDY SHRUBS—CONTINUED

Common Snowball

spreading branches, usually fragrant. Rapid grower and most hardy. 18 to 24 in., 30c; 2 to 3 ft., 40c each; 3 for \$1.10.

LEMOINEI—Graceful shrub with slender, arching branches. The blossoms appear in three to seven inch short racemes, very sweet scented. 18 to 24 in., 2 to 3 feet, 50c each.

CORONARIUS (Mock Orange)—This is not quite as showy as some of the other species and of somewhat stiff habit, but deliciously fragrant. 18 to 24 in., 30c; 2 to 3 ft., 40c each; 3 for \$1.10.

VAR. AUREA—Similar to the above variety except that the foliage is a beautiful golden color. 12 to 18 inches, 50c; 18 to 24 inches, 60c each.

BOUQUET BLANC—A real white bouquet of immense size. We can only urge you to include it with your order; we know you will not be disappointed, because it has no equal anywhere. The time, experience, and patience to produce such wonderful plants as these can only be realized by those who have worked with them. 18 to 24 inches, 55c; 2 to 3 ft., 75c each; 2 for \$1.40.

PHILADELPHUS VIRGINAL BLOOMS THRUOUT THE SEASON

This is a new and wonderful addition to the Mock Orange family but is far beyond anything in this line that has been brought out in the past. It is without question one of the most beautiful shrubs grown and once it becomes known will be planted on every home ground. Because of its being new the supply of this variety is scarce and high priced, but we are going to offer these at the following low prices as long as our supply of this shrub lasts. Price, 18 to 24 in. 60c each; 10 for \$5.00. Large, 2 to 3 ft., plants, \$1.00 each; 10 for \$9.00.

MOCK ORANGE

PHILADELPHUS, SYRINGA GRANDIFLORA—Large, flowering shrub growing to about eight feet, with upright and vigorous, flowers slightly

Philadelphus Virginal

Philadelphus Grandiflora

SNOWBALL

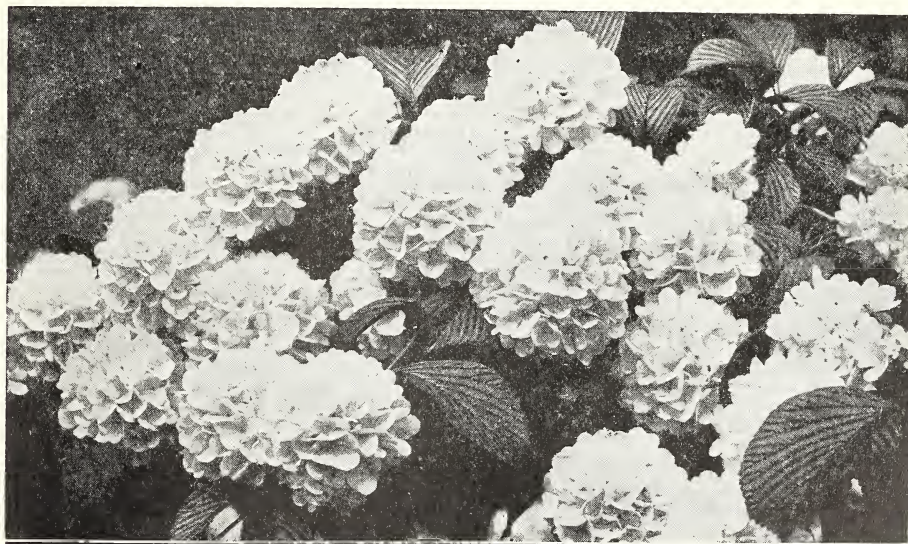

VIBURNUM

ARROW WOOD (Dentatum)—A gorgeous, upright, native shrub, thriving best in most soil. It is especially hardy, doing well from New Brunswick to Minnesota. It blooms in May or June, followed by black fruit. 2 to 3 feet, 50c each; 3 for \$1.40.

COMMON (Var. Sterilis)—This is the well known, common snowball of the old-fashioned gardens. Besides the snow-white flowers in May, the foliage is decorative and assumes a bright color in fall. 2 to 3 feet, 50c each; 3 for \$1.40.

HIGH BUSH CRANBERRY (Opulus)—Handsome native shrub attaining twelve feet, with rather smooth, light branches and stems.

The pure white flowers appear in May and June, followed by decorative fruits, which begin to color by the end of July and remain on the branches and keep their bright scarlet color until the following spring. The berries are not eaten by birds. 18 to 24 in., 40c; 2 to 3 feet, 60c each; 3 for \$1.70.

Japanese Snowball

JAPANESE (Tomentosum, var. Plicatum)—One of the choicest shrubs. Foliage is abundant and during the summer and fall, and its balls of pure white are borne in great profusion. Fine for specimen planting. 18 to 24 in., 60c; 2 to 3 ft., \$1.00.

HARDY SHRUBS—CONTINUED

SNOWBALLS—Continued

LANTANA—This is a hardy shrub, especially for dry situations and limestone soil. The large, white flower clusters open in May and June, and are followed by red fruits. The foliage is particularly soft and heavy. 2 to 3 ft., 50c each; 3 for \$1.40.

TAMARIX

These plants are very beautiful all the year, in winter for their coloring of the bark and in summer for the light green, feathery foliage and large loose panicles of purplish flowers.

AFRICANA—Is an upright grower. Blooms in May. 2 to 3 ft., 85c each; 3 for \$1.00.

HISPIDA—A graceful shrub, upright branches, flowers pink, appearing in August. 2 to 3 feet, 50c each; 3 for \$1.40.

HYDRANGEAS

ARBORESCENS (Var. Sterilis), (Hills of Snow)—Almost all of the flowers are sterile. Very showy variety, excellent for borders. 18 to 24 in., 50c; 2 to 3 ft., 75c each; 2 for \$1.40.

TREE HYDRANGEA—Flowers similar to the Hydrangea Paniculata Grandiflora, only they are grafted to form a tree. 3 to 4 feet \$1.50; 2 for \$2.75.

PANICULATA GRANDIFLORA—This is the best known form of the hydrangea. A hardy, ornamental shrub to 15 feet with dense, globose head. The large, white flowers appear in August and September. The sterile flowers changing later to purplish. 18 to 24 inches, 50c each; 2 to 3 feet, 75c each; 2 for \$1.40.

Hydrangea Paniculata Grandiflora

SUMAC

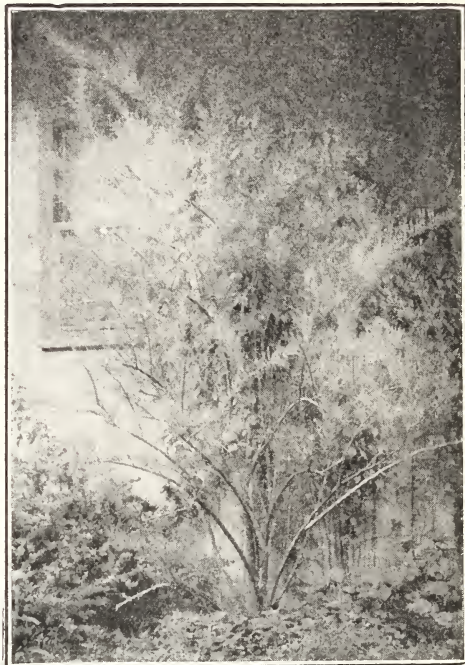

REUS

CUT LEAF (Typhina) var. Laciniata—This variety with its deeply and finely cut leaves is very handsome, not quite so hardy as some of the other forms and not so tall growing. 2 to 3 feet, 60c each.

STAGHORN (Typhina) — This variety grows in the driest soils and is a very desirable plant on account of its brilliant fall coloring which in dry locations, begins to show in August. The crimson fruits remain on all winter. 2 to 3 feet, 60c each; 3 for \$1.70.

Lilac, Common Purple

Tamarix Africana

LILAC

SYRINGA OR LILAC, COMMON PURPLE (Syringa Vulgaris)—The old favorite, and one of the best. 60c each.

COMMON WHITE (S. Vulgaris Alba)—Flowers white, fragrant, beautiful. 60c each.

CHARLES X—A strong, rapid growing variety, with large, shining leaves. Trusses rather loose; large, reddish purple, \$1.00 each.

JAPONICA—An elegant Japanese species, eventually forming a good sized tree, flowers creamy-white in great panicles a month later than other sorts \$1.00 each.

JOSIKAEA (Hungarian Lilac)—A distinct species of stout erect growth with dark shining leaves and purple flowers which are produced late in June. \$1.00 each.

MME. MARIE LEMOINE—The finest double white Lilac yet introduced. The individual flowers, which resemble miniature Tuberoses, as well as the truss, are of immense size, deliciously scented; fine for cutting. \$1.00 each.

PRESIDENT GREY—Magnificent panicles of large double blue flowers. \$1.00 each.

SPINDLE TREE

EUONYMUS

BURNING BUSH (Corky Bark), (Alatus)—An attractive, ornamental shrub to eight feet. The flowers appear in May and June. In autumn the foliage changes to a fine rose color. 2 to 3 feet, \$1.00 each.

EUROPEA—A large shrub to fifteen feet. Covered in the spring with bright yellow leaves, color a beautiful crimson scarlet in fall; stems almost a dark green. 4 to 5 feet, 75c each; 2 for \$1.40.

STRAWBERRY BUSH (Americana)—An ornamental, upright shrub to eight feet. The flowers appear in June, are yellowish or reddish green, followed by pink fruits which are very attractive. 4 to 5 feet, 75c each; 2 for \$1.40.

SWEET PEPPER BUSH

CLETHRA

ALNIFOLIA—A native shrub, to four feet, bearing profusely spikes of yellowish-white scented flowers in August. 18 to 24 in., 40c each; 3 for \$1.40.

HEAR OUR MUSICAL PROGRAM

Each Thursday night between 8 and 8:30 and during the months of January, February and March we will broadcast a musical program entitled "The Garden of Music." Each morning at 10 o'clock we will give interesting talks about plants. We hope you will enjoy it.

HARDY SHRUBS—CONTINUED

LIGUSTRUM REGELIANUM

REGELS PRIVET—A low, dense shrub with horizontal spreading branches. The leaves are oblong and a beautiful glossy green. In the fall of the year they are covered with attractive berries. Very useful as a low shrub in foundation plantings. Price, 12 to 18 inches, 25c each; 18 to 24 inches, 50c each; 3 for \$1.40.

SILVER THORN—ELEAGNUS

LONGIPES—A highly ornamental shrub with handsome foliage and reddish brown branchlets. The flowers are one-half inch long appearing on the lower part of the branches; yellowish white, fragrant. Scarlet fruit ripens in June or July. 2 to 3 feet, 50c each; 3 for \$1.40.

SMOKE TREE—RHUS COTINUS

PURPLE FRINGE—A bush 10 feet high with simple obvate leaves and brown bark; flowers purple in loose panicles and on long pedicles, which become profusely plumose, giving the plant a smoky appearance from which it derives its common name. Early summer. There is nothing quite like it and should be planted on every lawn. Price, 2 to 3 feet, \$1.00 each.

SNOWBERRY—SYMPHORICARPUS

WHITE SNOWBERRY—A perfectly hardy shrub from two to three feet high, excellent for massing in the lower parts of a bed or border. The rose-colored flowers appear

Snowberry, White

in loose, often leafy racemes in July and August. The white waxy-like berries remain on until late in the autumn. 18 to 24 in., 30c; 2 to 3 ft., 50c each; 3 for \$1.40.

RED SNOW-BERRY (Coral Berry), (Vulgaris)

—A rather compact bush valuable because of its abundant and persistent fruit and foliage. 2 to 3 feet, 35c each; 3 for \$1.00.

Weigela Rosea

WEIGELAS

DIERVILLA

ROSEA—A choice vigorous sort, which yields an immense crop of deep pink trumpet-like flowers in June, and bears a scattering of blossoms through the rest of the season. 18 to 24 in., 30c each; 2 to 3 ft., 50c each; 3 for \$1.40.

NANA VARIEGATA—Leaves of this sort are variegated with white; flowers are nearly white. Dwarf. 18 to 24 inch, 35c each; 2 to 3 ft., 50c each each; 3 for \$1.40.

EVA RATHKE—The flowers are a deep carmine red, erect growing. A most profuse bloomer in spring and again in autumn. 2 to 3 feet, 75c each; 18 to 24 inch, 50c each.

WITCH HAZEL

HAMAMELIS

VIRGINIANA—Hardy ornamental shrub or small tree with deciduous alternate leaves. Petals of flowers are bright yellow, appearing from September to November. Thrives best in moist locations. Valuable on account of blooming at a time when hardly any other shrub outdoors is in flower. 2 to 3 feet, 50c each; 3 for \$1.40.

HARDY FERNS

The most beautiful and natural effects can be produced by planting of hardy ferns. They should be planted to be protected from the prevailing winds. They are perfectly hardy and can stand planting either in shady or sunny positions.

The hardy ferns are most satisfactory for planting on shady banks and around porches, where the sun does not reach. They are valuable in that they do well in any good well drained soil and require practically no care. No home should be without them. We can furnish either of the following varieties. Price: 30c each; \$3.00 for 12.

OSTRICH FERN—The large leaf, tall growing variety.

ROYAL FERN—One of the large growing varieties.

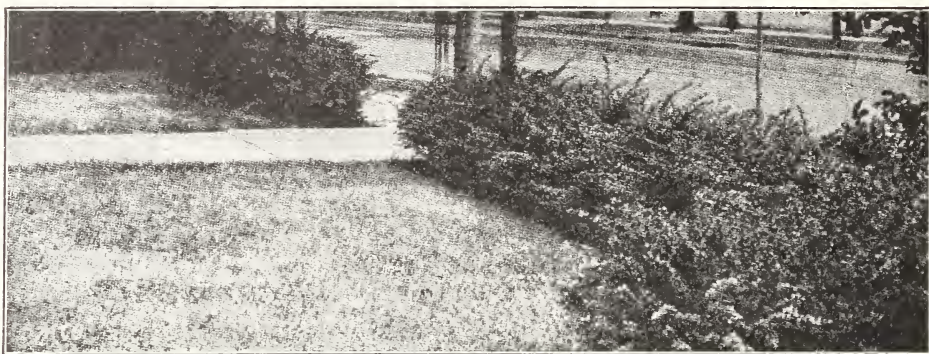

CINNAMON FERN—Medium grower in height.

Smoke Tree

FINE HEDGE PLANTS

A Nice Hedge of Japanese Barberry

JAPANESE BARBERRY

BERBERIS THUNBERGII—We consider the Japanese Barberry the best hedge plant in existence. It is beautiful throughout the year; its abundant crop of bright red berries makes it even more attractive in the winter than the summer. Its compact growth and thorny branches make a defense hedge that will turn cattle after five years' growth. As an untrimmed hedge it requires no attention except an occasional cutting

of a few straggling branches. The natural growth is so dense and even that it forms a perfect hedge without shearings, but if a formal hedge is desired, it can be made so by shearing; hardy, of easy culture, and will grow in any soil or situation. For a hedge, plant in single row, 15 inches apart.

During the growing season, the foliage of the plants is attractive, because of the new growth, light green in color, is in sharp contrast to the foliage of the old wood, which is a glossy dark rich green. In the fall, the foliage turns to bright orange and scarlet, and persists until November or December, according to the locality.

The Japanese Barberry is hardy almost anywhere in this country; and it will thrive in almost any situation, even in partial shade. Poor soil is no barrier to its successful cultivation. Price, 12 to 18 inch plants, 20c each; 50 for \$8.00; 100 for \$15.00.

HYDRANGEA PANICULATA GRANDIFLORA

This variety of Hydrangea makes one of the most beautiful hedges imaginable. For anyone wanting a flowering hedge that will not require trimming, we recommend this plant very highly. Hardy, with glossy green leaves, will grow almost anywhere and make a very desirable hedge. Plant 12 inches apart in single row. Price, strong 2-year plants, Hedge Size, 50 for \$13.50; 100 for \$25.00.

SPIREA OR BRIDAL WREATH

Eminently suitable for forming fine hedges. A more graceful object than a Spirea hedge in full bloom is difficult to find. A splendid hedge is shown on page 20, 12 to 18 in., dozen \$2.00; 100, \$15.00; 18 to 24 in., dozen, \$3.00; 100, \$20.00.

NORWAY SPRUCE

This spruce is a rapid grower and is often used as a hedge fence. It can be planted most effectively in groups on the lawn, but far enough apart to give each tree an opportunity to expand itself in its beauty. For hedge purposes plant 15 inches apart. Price, thrifty trees, 12 to 18 in., 10 for \$5.50; 100 for \$50.00.

NOTE—Sold only in lots of 10 or more.

RUSSIAN OLIVE

For any one desiring a hedge plant of great merit the Russian Olive will be worth considering. It makes a very dense bushy hedge and can be trimmed to any shape. The beautiful silvery white leaves make it very attractive. Plant about 18 in. apart Price 18 inch, \$10.00 per 100.

A Hydrangea Hedge

A Russian Olive Hedge

A Beautiful Hedge of Norway Spruce

MORE GOOD HEDGE PLANTS

IBOLIUM PRIVET

Do you want to enclose your home grounds with a fence that will add beauty and attractiveness to the surroundings, and will never freeze or rot down or rust out; but will become more beautiful and substantial each year?

Many plants or shrubs may be used with happy results and pleasing effects in making a hedge fence.

One hundred plants set eight inches apart, the proper distance for planting, will make a fence 66 feet long. Using our 12 to 18 inch size would cost only \$10.00. This is much less than any other fence would cost.

In addition to costing less than any other fence you could buy, it is superior to any fence you could build. If they are given fairly good soil they will grow dense and compact right down to the ground. It is free from insects or injurious diseases of any kinds and may be pruned to any desired form or shape. Our plants are extra fine this year, are well branched, especially for hedge purposes and the price is very low. We will guarantee the quality of our plants to be equal to the best that can be purchased anywhere.

Plant in either Spring or Fall. If planted in single row, space the plants 8 inches apart. If planted in double rows, space the plants 8 inches apart zig zag from one row to the other.

Ibolium Privet Hedge

2-Yr. Plants, 12-18 inches, per 100	\$10.00
2-Yr. Plants, 18-24 inches, per 100	12.50
2-Yr. Plants, 2-3 feet, per 100	15.00

CALIFORNIA PRIVET

50 FEET OF HEDGE \$6.00

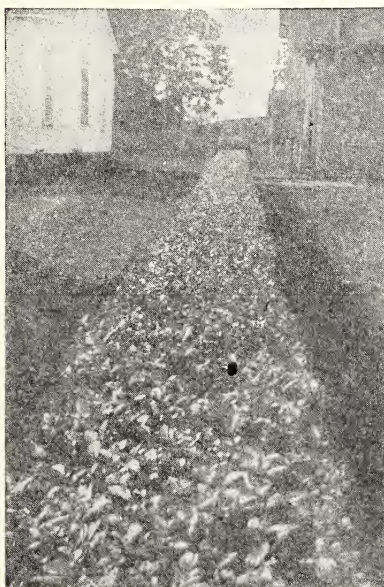

Set plants 6 inches apart if planted in a straight row, or 12 inches apart if planted in a double row. Of all hedge plants this is the most popular, and more of it is planted than all others combined. It is of free growth and succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist. Its foliage is a rich, dark green, nearly evergreen, remaining on the plant until mid-winter. Nice plants, 85c per dozen, \$6.00 per 100. Large two-year plants, \$1.20 per dozen; \$8.00 per 100. Selected plants, \$1.50 per dozen.

AMOR RIVER PRIVET

Hardest of all hedge plants. Beautiful upright growth and makes a very compact beautiful hedge. Sheds its foliage a little earlier than California Privet. 18 to 24 inches, \$8.00 per 100; 2 to 3 feet, \$12.50 per 100.

ALTHEA

ROSE OF SHARON—These free flowering shrubs make wonderful hedges and once known will be planted more often. They can be kept trimmed quite low, or can be allowed to grow tall as a screen. A hedge of them in bloom, with all colors of flowers is a wonderful sight. Price, 18 to 24 inch plants, 25 for \$3.00; \$10.00 per 100.

Amoor River Privet

HARDY VINES

AMPELOPSIS QUINQUIFOLIA

(AMERICAN IVY)

Use them for covering unsightly buildings, stumps, walls, fences, trees, etc. Grow quickly and easily, make a dense mat of leaves which hang in clusters of three. We are quoting these at a special price as follows. Two-year-old plants, 40c each; 10 for \$3.50; 25 for \$7.50; 100 for \$20.00.

BOSTON IVY (Veitchii)—This vine undoubtedly stands higher in the estimation of the people than any other. Once it is established it grows rapidly and will stay indefinitely, needing only an occasional trimming to keep it within bounds. It is not attacked by disease or insects and the foliage is not injured by the smoke and dirt of cities. The glossy leaves turn to a brilliant orange-scarlet in the fall. 2 year old, 50c each; 3 for \$1.45.

MADERIA VINE

(Baselloides). A beautiful rapid-growing vine with dense foliage. The small white flowers are borne in great profusion and are very fragrant. It is excellent for summer screens and shade for porches. Succeeds best in a sunny position. 5 for 25c; 10 for 40c.

FALSE BITTER SWEET

(Scandens), (Celastrus). Hardy ornamental vine. Very effective by their bright-colored fruit remaining usually throughout the winter. They are valuable for covering trellis-work, trees or rocks and walls. They grow in almost any soil and situation. Fruit is about one-half inch in diameter, orange-yellow, with crimson seed. 35c each; 3 for \$1.00.

DUTCHMAN'S PIPE

(Aristolochia Sipho). A very vigorous growing vine with large deep green leaves and green twigs, producing in abundance a purplish blossom much resembling a pipe. Grows very dense. Price 2 year old plants, 75c each; 2 for \$1.35.

CLEMATIS

PANICULATA—This Clematis is by far the most popular of all the species in the American gardens. It is extremely showy when covered with the small white fragrant flowers, which appear late in the season. Beautiful, shiny, green foliage. Price: 2 year-old No. 1 plants, 50c each; 3 for \$1.30.

JACKMANII—One of the best known of all the clematises. The velvety-purple flowers, when expanded, are four to six inches across, very velvety and distinctively veined. 2 year, \$1.00 each.

MAD. ED. ANDRE—This is the nearest approach to a bright red Clematis. It is a very free bloomer and very satisfactory. 2 year old \$1.00 each.

HENRYII—Large flowering white Clematis. A strong grower and free bloomer, 2 yr. old \$1.00 each.

HONEYSUCKLE

IONICERA

JAPONICA, VAR. HALLIANA (Hall's Japan Evergreen Honeysuckle)—Honeysuckles are well adapted for the covering of walls, arbors, etc., are very ornamental as the leaves remain on during the winter. The flowers are white, turning to yellow and are very fragrant. 30c each; 6 for \$1.50.

KUDZU VINE

PUERARIA—A hardy vine with large, tuberous starchy roots, making a most remarkable, vigorous growth of slender, hairy stems. Leaves are variously lobed, vines will grow to 60 feet in a season, producing a profusion of large leaves. 30c each.

WISTARIA

CHINESE WISTARIA (Chinensis)—This is one of the best and commonest of hardy climbers. Has pale green pinnate leaves and bears profusely dense, drooping clusters of purplish, pea-shaped flowers. Blooms in May. 8-year-old, large, 75c each.

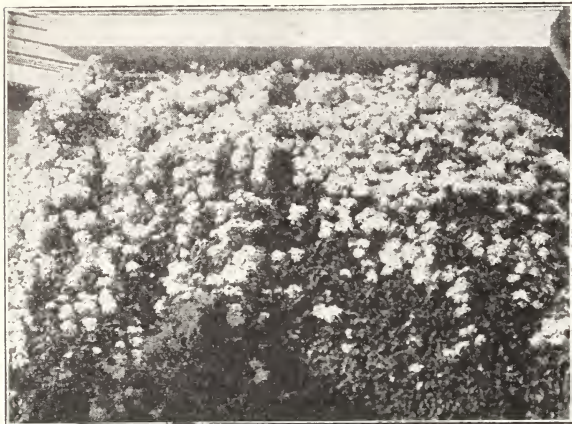

TRUMPET CREEPER

BIGNONIA RADICANS (Trumpet Flower)—A robust, woody vine, twining tightly, with numerous roots along its stems. Its orange scarlet, trumpet-shaped flowers cluster at tip of the branches. Leaves light green. Used for covering unsightly places, such as stumps, rock work etc. Strong plants, 45c each; 3 for \$1.25.

EVERGREEN VINES

ENGLISH IVY—A hardy evergreen climbing vine with dark green leaves. It is a true evergreen and retains its bright, green leaves all winter. Price: 50c each; \$5.00 per dozen.

EUONYMUS RADICANS—A hardy evergreen vine, or will form a spreading shrub where it can not climb. Valuable for covering graves, especially desirable for shady locations. Price: 3 year old plants, 50c each; 3 for \$1.35.

Clematis Paniculata

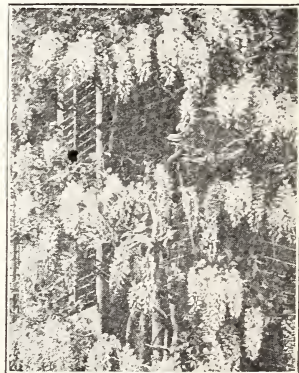

Clematis Henryii

Dutchman's Pipe

Trumpet Creeper

Wistaria

HARDY CLIMBING ROSES

AMERICAN PILLAR (H. M.)—A single flowering variety of great beauty. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten.

CLIMBING ORLEANS. Cl. Poly. (Levavasseur & Sons, 1913.)—Bright, light red with light center; blooms in gigantic clusters, on vigorous climbing canes. Practically ever-blooming.

CHRISTINE WRIGHT (H. W.)—The flowers are double, from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud, and in the fully expanded flower; in color a most refreshing bright wild-rose pink.

CRIMSON RAMBLER—Will attain a height of 10 to 20 feet in a season; produces a marvelous profusion of rich and glowing crimson clusters during June and July. It is the supreme novelty among climbers and the forerunner of the splendid array of "Ramblers" now embraced in this class.

CLIMBING AMERICAN BEAUTY—The famous American Beauty Rose in climbing form. Has all the characteristics of its relative, including form and fragrance. Healthy foliage and has strong climbing habit of growth; the abundant bloom being in prime before the June show of the bush type. The demand for this type has increased so rapidly it is hard to keep up in its propagation.

DOCTOR VAN FLEET—One of the newest type of climbers and very hardy. Flowers when open run four inches or more in diameter in which it compares with the Tea class. Center built high, petals undulated and cupped. Color is a remarkably delicate shade of flesh-pink. Admirable cutting variety with stems 12 to 18 inches long.

DOROTHY PERKINS—A most beautiful shell pink. The flowers are borne in large clusters of small double bloom and very sweet scented. Foliage smoother and darker than the Crimson Rambler. This is undoubtedly the thriftiest, showiest and most practical of the older pink rambles, and trails its riotous clusters over more verandas, windows and trellises than any other variety.

EXCELSA

A sensational new hardy climbing Rose, sometimes called "Red Dorothy Perkins." Best described as an improved Crimson Rambler with heavy glossy, varnish like foliage, without any of the defects of the Crimson Rambler, which is very unsightly at times because of mildew on the foliage. This great new Rose is nearly evergreen and is absolutely hardy. The flowers are very double, produced in immense trusses of thirty to forty flowers to each truss. Color intense crimson—new and distinct. One of the great hardy climbing Roses. Hardy as an oak. Lasts a lifetime. A gorgeous sight when in bloom.

EUGENE JACQUET—New, the earliest and most profuse flowering of all climbing Roses. A wonderful grower producing its immense trusses of fragrant, cherry-red flowers in the greatest profusion. Unlike most climbing Roses the color improves with age. Handsome dark green, mildew-resisting foliage. A most remarkable climbing Rose.

FLOWER OF FAIRFIELD (The New Everblooming Scarlet Rambler)—Flower of Fairfield commences flowering in the spring or early summer and produces repeatedly crops of bloom until late in the autumn. It blooms very profusely on young wood the first year after planting. Very effective for covering walls, trellises or arches, and is equally attractive for table decoration or other uses as cut flowers.

GARDENIA (H. W.)—Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

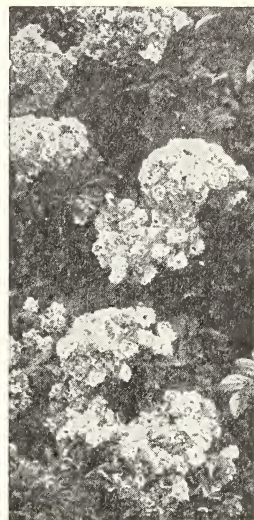

MARY WALLACE

A GREAT BREEDER'S LEGACY

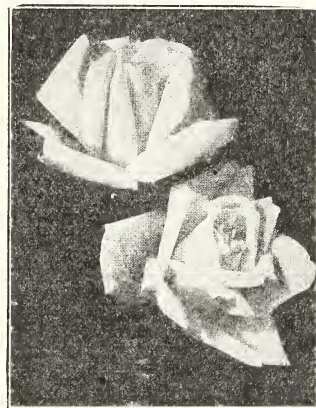

This is Dr. Van Fleet's masterpiece. The trade is slow in taking hold of this charming pillar rose. Hardy on a line with Washington, D.C. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals. The largest Hybrid Wichuraiana in existence.

PAUL'S SCARLET CLIMBER—A wonderful Rose for trellis or pergola. Winner of Gold Medal as best new climbing rose at National Rose Society's Exhibition. Flowers are scarlet, shaded crimson. Corresponds to the Climbing American Beauty and Dr. Van Fleet as to size, shape and habit. Blooms very long, holding flower after many June bloomers have dropped their petals.

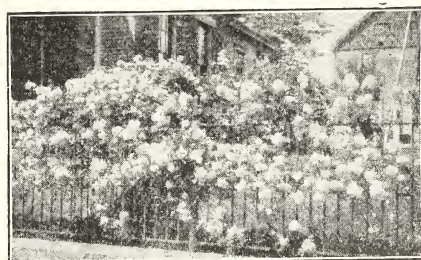

YELLOW RAMBLER—Flowers deep golden yellow. Very fragrant.

HYBRID PERPETUAL ROSES

LARGE TWO YEAR OLD FIELD GROWN BLOOMS FIRST YEAR

Roses are the most popular flowering plants grown, as either plants or flowers. They may be properly and effectively used for a great many purposes. Everyone should plant roses. There is no home, worthy of the name, where space could not be found for from ten to fifty rose bushes and there is no improvement that can be made at so small expense that will so quickly enhance the beauty, desirability and value of the property as a good rose planting.

AMERICAN BEAUTY—The well-known red forcing Rose.

ANNA DE DIESBACH—The famous "Glory of Paris." Bright, deep clear pink, of largest size, fine bud.

BLACK PRINCE—Deep blackish-crimson; large full and globular; very free flowering.

CAPTAIN CHRISTY—Delicate peach-blow pink, center richer in color; large and full.

CLIO—Flesh color, shaded in the center to rosy peach. Large, fine globular form; free bloomer.

EUGENE FUERST—Color deep red shaded crimson. Profuse bloomer. A most charming superb grand Rose.

FRAU KARL DRUSCHKI, or WHITE AMERICAN BEAUTY or SNOW QUEEN—The very highest type of its class and the snow-white Rose ever introduced. It is an extraordinary strong grower, and has the vigor and hardness of an oak. Flowers are immense in size and produced with great freedom. The color is a true paper white, the standard by which all white Roses are judged.

GENERAL JACQUEMINOT—Crimson-scarlet; large, full, Very fragrant. Excellent.

HUGH DICKSON—Color brilliant crimson shaded scarlet; large and fine form, opening well in all weathers. Very sweetly scented.

J. B. CLARK—The color is unique among Roses, being deep scarlet shaded blackish-crimson; flowers are large and beautifully-formed.

MADAME MASSON—This is a glorious Rose. The flower is of the largest size. Color bright brilliant red. Blooms all summer.

MADAME PLANTIER—This is the iron-clad white cemetery Rose.

MAGNA CHARTA—Bright rose, very large and double, good form and fragrant, extra.

MARSHALL P. WILDER—A great many persons will not give up the contention that this is the ne plus ultra in red Roses. Deep, rich glowing red.

MRS. JOHN LAING—Color clear bright, shining pink; exquisitely shaded. Awarded gold medal, N. R. S.

PAUL NEYRON—Deep rose; flowers of immense size; indeed many claim this to be the largest Rose grown.

PRINCE CAMILLE DE ROHAN—Deep velvety crimson-maroon, full and of good form and perhaps the best of all the hardy dark Roses. The Black Rose.

ULRICH BRUNNER—Cherry-red, of immense size fine form and most effective in the garden.

	2 YEAR FIELD GROWN	

RUGOSA AND OTHER ROSES

RUGOSA CONRAD FERDINAND MEYER—Flowers large, double cup-shaped. Color deep, bright, vivid, intense pink, with the penetrating fragrance of the old June Roses.

RUGOSA F. J. GROOTENDORST (H. Rug.)—Bud small, flower open, double, borne in clusters on a verge length stems; very lasting; slight fragrance. Color bright red, edges of petals serrated like a carnation; disease resistant. Vigorous grower of bushy habit, bearing a profusion of bloom from June to October. Very hardy.

RUGOSA SIR THOMAS LIPTON (R.)—The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant. Blooms more than once through season.

WICHURAIANA, or MEMORIAL ROSE (W.)—It is difficult to conceive anything more appropriate for covering graves and plots in cemeteries than the Hardy Memorial Rose. It creeps along the ground as closely as an Ivy. They are single, pure white, with a golden yellow disc, five to six inches in circumference.

PRICE ANY ABOVE 4 VARIETIES—50c each; 6 for \$2.50; 12 for \$4.50.

ROSA HUGONIS A NEW BUSH ROSE FROM CHINA

ROSA HUGONIS—Like many other rare floral gems from the Orient, this variety is spectacular in its exotic beauty. Imagine a many branched shrub, 6 to 8 feet tall, rearing slender sprays in all directions, gracefully arching beneath loads of bright yellow, single flowers, an inch and a half in diameter—and you have Rosa Hugonis at its best. The flowers are borne on the previous season's growth and appear very early in the spring, before the foliage. Later in the season it throws up many new branches (next season's flowering wood) and these branches are of a beautiful deep red color, which makes the shrub a garden attraction almost through out the growing season. Strong field-grown plants, each, \$1.50; dozen, \$15.00.

HYBRID TEA ROSES

STRONG 2 YEAR OLD FIELD GROWN PLANTS 65¢, \$5.50 FOR 10

If you want lots of roses this summer, get a dozen of our Hybrid Tea Roses this spring. These roses are extra choice, heavy, field grown plants, full of vitality and they cannot fail, if handled properly, to furnish you with a wealth of blooms the first year.

ALEXANDER HILL GRAY—Pale lemon-yellow, deepening in the center of its perfectly formed fragrant flowers. Moderate growth and bloom. One of the hardiest and most beautiful Tea Roses; best in autumn.

COLUMBIA (H.T.)—It is a big Rose. The color is a true pink, about the shade of a perfect Shawyer, deepening as it opens to glowing pink.

ETOILE DE LYON—Bright sulphur-yellow; fine form, large size; a fine yellow Rose.

ETOILE DE FRANCE (H. T.)—Color a lovely shade of clear, red-crimson velvet.

LADY HILLINGDON—Buds of remarkable quality and elegance, of good size opening into handsome flowers of clear apricot-yellow. Plant relatively hardy, of much vigor, and with an autumn-blooming habit.

OPHELIA—Salmon-flesh, shaded with rose, large, and of perfect shape; of excellent habit, the flowers standing up well on long, stiff stems and produced in great profusion. Excellent for forcing and a fine decorative variety.

PINK KILLARNEY—This, the original introduction, is a beautiful Hybrid Tea Bush Rose; strong, sturdy and upright, with fine, heavy, insect-proof foliage, bearing flowers that are simply exquisite in form and color, the bud is exceedingly long and the flowers immense in size; color deep, brilliant, sparkling shell-pink; hardy everywhere. The bush is magnificent in growth, good size and bears its beautiful burden of flowers all summer.

GRUSS AN TEPLITZ—The sweetest, richest crimson hybrid Tea Rose. Called by some growers Virginia R. Coxe. The intense, dazzling color of this rose is found in no other variety. Fiery crimson, shaded with a dark, velvety sheen, totally unlike any other color in the world. Large, handsome, moderately double flowers. Produced in wonderful profusion throughout the whole growing season; in fact, it is always in bloom. The flowers are produced singly, sometimes in clusters, producing a gorgeous effect on the lawn or in the garden all summer through. Vigorous grower, actually attaining a height of 4 to 5 feet, perfectly hardy everywhere. Incomparable for fragrance.

RADIANCE—The color is a splendid even shade of clear red, without a trace of any other color, retaining its vividness for an unusually long time after being cut. It is a remarkable bloomer, being constantly in flower from early spring until freezing weather. Strong, vigorous branching, grower, each branch terminating in a large, bold, double bloom. One of the best hardy outdoor garden roses known. Originated by John Coon, the famous American Rosarian.

RED RADIANCE (H. T.)—An even better Rose than its parent, Radiance, in habit, bearing big, globular flowers of deep rose-red on strong, individual canes which are freely produced all summer until frost.

RED COLUMBIA (H. T.)—A brilliant scarlet-crimson of exquisite shade, a sport from Columbia; semi-double, one of the freest bloomers in existence; produces beautiful foliage in profusion.

RICHMOND—Pure rich scarlet; very free and continuous flowering; splendid forcer.

SUNBURST—The color is orange-copper or golden-orange and golden yellow; edge of petals lighter; all intense shades, extremely brilliant in effect. Some call the color cadmium-yellow. It is the yellowest of all Roses in the everblooming class.

THE BRIDE—Pure white, with tinge of pink when planted in garden; large, full and of most perfect form.

WHITE KILLARNEY—Branches of it during the winter give the appearance of a bank of snow. It is pure white in color, long in bud, of fine form.

WILLIAM B. SMITH—The soft blending of the salmon-pinks and the rose pinks and the beautiful flesh tints in this Rose give it a singular resemblance to the entrancing flush on a maiden's cheek.

BABY RAMBLERS

Price 2-year-old, 65¢; \$5.50 for 10

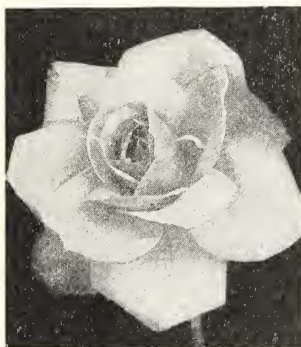

BABY RAMBLER, or **MADAME N. LEVAVASSEUR**—This is the original Baby Rambler daddy of them all. In bloom all the time. Flowers in large clusters of brightest red.

CATHERINE ZEIMET, or **WHITE BABY RAMBLER**—Grows to a height of twenty in., produces double pure white flowers in abundance.

ERNA TESCHENDORFF—The flowers are of a deep crimson color, flushed with carmine, resembling the dazzling color of "Gruss an Teplitz." It is much sought after in America to bloom in pots during winter and for Easter time.

HARDY PERENNIALS Old-Fashioned Flowers

Achillea Ptarmica

Slightly more dwarf. Fifteen inches. 15c each; \$1.50 per dozen.

JAPANESE BELL FLOWER

PLATYCODEN—A valuable perennial forming a dense branching bush of upright habit. One to two feet with neat foliage. It blooms from July until frost. Large bell shaped, deep blue flowers. 15c each; \$1.50 per dozen.

ANEMONE WINDFLOWER

WHIRLWIND—One of the most gorgeous of the hardy perennials, as well as one of the most desirable and useful. Bears large, snowy white flowers supported by large dark green leafy branches. Fall, 20 cents each; \$2.00 per doz.

GERMAN IRIS

FINE NAMED SORTS 25c EACH \$2.50 DOZ.

Atropurpurea, deep purple	Mrs. Darwin, white with
Azurea, blue	lavender center
Aurea, yellow	Mrs. Geo. Reuthe, purple
Canary Bird, yellow	Mont Blanc, white
Her Majesty, pink	Pallida Dalmatica, solid
Honorabilis, yellow	blue
Mad. Chereau, white with	Queen Emma, white
blue edge	Queen of May, pink
Midnight, dark purple	

PERENNIAL FLAX

LINUM PERENNIS

A very desirable plant for the border; grows about 2 feet high, and filled with flowers all summer. We can furnish you either White or Blue. 15c each; \$1.50 per doz.

Anemone, Whirlwind

Japanese Bell Flower

Hardy perennials, or as they are often called, "Old Fashioned Flowers" should be planted in every garden.

They add grace to the hardy border and furnish cut flowers all through the summer. The varieties listed are all perfectly hardy, and do not have to be replaced each year as is the case with annuals.

ACHILLEA

MILLEFOLIUM C E R I S E ROSEUM—Beautiful cut-leaved foliage. Flowers deep rose, colored and good for cutting. Eighteen inches. April to October, 15 cents each; \$1.50 per dozen.

PTARMICA (The Pearl)—White flowers larger than above variety. It blooms all Summer.

Asters, St. Erwin

ASTER

ST. EGWIN—Dense and bushy and blooms from the ground up to the top of the plant. Delicate pink color. 15c each; \$1.50 per dozen.

STOKES ASTERS (Stokesia)—12 to 18 inches high. Flowers large blue and quite showy. Blooms from August till late frost. 15c each; \$1.50 per doz.

COLUMBINE

AQUILEGIA ENGLISH LONG SPUR—A fine

strain, producing distinct strains of Purple, Blue, Red and Yellow Flowers. 15c each; \$1.50 per dozen.

CHRYSANTHA (Yellow-Flowered Columbine)—Flowers are primrose yellow, long spurs. Three to four feet. April to September. 15c each; \$1.50 per dozen.

JAPANESE IRIS

Of all Iris, the Japanese has, without question the most wonderful bloom. The flowers are borne on long graceful stems, and for foliage effect, or cut flowers this species is far superior to the common kinds. We are offering only two varieties which are noted for their free blooming habit.

PURPLE GOLD BANDED—A beautiful deep shade of purple with a gold band across the petals. An attraction to any garden. Price, 25c each; \$2.50 per dozen.

BLUE—A bright blue flower, which holds its color and remains fresh a long time after it is cut. Price, 25c each; \$2.50 per dozen.

LILY OF THE VALLEY

Very small and sweet and dainty, the creamy white scalloped bells pendant along slender stems. They make up (with their broad shiny leaves) into dainty bouquets of fragrance. They spread actively from the roots and soon reclaim shaded cold ground which otherwise would be cheerless and barren. 15c each; \$1.50 per dozen.

DIANTHUS PLUMARIS

CHINA PINK—Very hardy single and double pink with flowers of many beautiful colors. 15c each; \$1.50 per dozen.

OENOTHERA

EVENING PRIMROSE

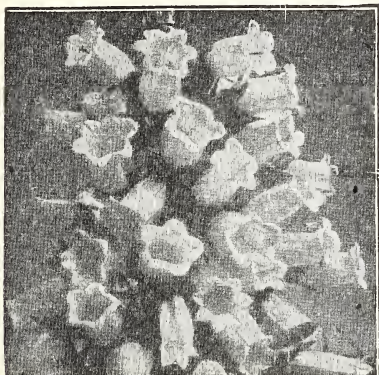

FRUTICOSA YOUNGII—Prized for its sticky growth and continuous bloom of bright lemon-yellow flowers on bold heads. Two feet. 15c each; \$1.50 per dozen.

Lily of the Valley

PERENNIALS--CONTINUED

Canterbury Bells

CANTERBURY BELLS

Large open bell-shaped flowers in a variety of colors. 15c each; \$1.50 per dozen.

HAREBELL (*Campanula Carpatica*)—A pretty, compact species; flowers 1 inch in diameter. Blue and white. 15c each; \$1.50 per dozen.

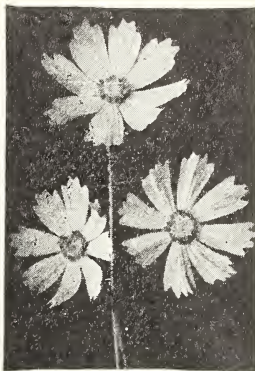

COREOPSIS

LANCEOLATA—Valuable border plant, because of their profusion of showy yellow, hardy and of the easiest culture. One to two feet. June to September. 15c each; \$1.50 per dozen.

DAISY PERSIAN

PYRETHREUM

The pretty, fern-like foliage in the Spring, followed by a profusion of handsome blooms in summer, makes the plant very desirable. Unequaled as cut flowers. Hardy under any conditions. 15c each; \$1.50 per dozen.

Coreopsis

DAISY SHASTA

ALASKA—A splendid form of the Shasta Daisy. The whole plant is gigantic, but compact and graceful; flowers white, four and five inches across. Very free flowering; small yellow discs. Good for cut flowers. 15c each; \$1.50 doz.

Shasta Daisy

Chrysanthemum

CHRYSAN- THEMUM

HARDY VARIETIES

Well known perennial, esteemed for their lavish bloom and exceeding decorative value in late fall. Red, white, pink, yellow. 15c each; \$1.50 per dozen.

BEAUTIFUL PEONIES

Late years have seen many improvements in the size, shape, color and free-flowering habit of this wonderful plant, and below we offer three choice double varieties in three colors. Plant in the late Fall or early Spring.

1st PRIZE WHITE—A good sized double white flower and free bloomer. 50c each; 3 for \$1.35.

1st PRIZE PINK—Beautiful shade of pink, double flower, beautiful foliage. 50c each; 3 for \$1.35.

1st PRIZE RED—Very vivid coloring, massive flowers and very spicy. 50c each; 3 for \$1.35.

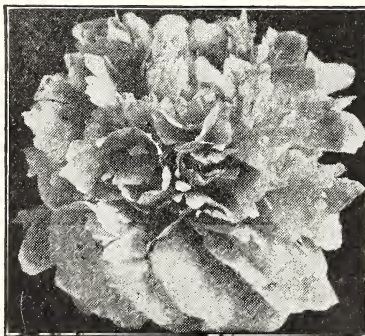

KARL ROSENFELD—Rose type, mid-season, A-1 bloomer. Every stem has a flower of rich velvet crimson. A perfect ball. Pronounced by peony growers as one of the best for cut flowers. \$1.50 each; 3 for \$4.00.

FELIX CROUSSE—Brilliant ruby red, large flowers, best perfect red peony under cultivation that has stood the test wherever planted. 75c each, 3 for \$2.00.

FESTIVA MAXIMA—Best and most satisfactory white peony in cultivation. 50c each; 3 for \$1.35.

Festiva Maxima

Monsieur Jules Elie

LOUIS VAN HOUTTE—Late mid-season, bright red, very fine shapely flower, medium to large. 75c each; 3 for \$2.00.

MONSIEUR JULES ELIE—Early mid-season; known as the King of Peonies; lilac-pink. Claimed by many to be the largest of all peonies. Flowers keep well, in great demand. \$1.00 each; 3 for \$2.50.

GOLDEN HARVEST—Very striking, large tri-colored bloom, cream white, gold pink salmon. A beautiful coloring effect. Good bloomer. 75c each; 3 for \$2.00.

EUDULUS SUPERBA—Bright pink, very early and large bloom. One of the best early. 50c each; 3 for \$1.35.

JAPANESE PEONIES

Sgl. White 2-yr., \$1.00; 3, \$2.50

Sgl. Red 2-yr., \$1.00; 3 for \$2.50

Sgl. Pink 2-yr., \$1.00; 3, \$2.50

PERENNIALS—CONTINUED

GAILLARDIA

BLANKET FLOWER

GRANDIFLORA—Probably one of the most universal flowers planted among the hardy perennials. Conspicuous for their profusion of bloom. Flowers intense, blood-crimson, margined with golden yellow. Eighteen to twenty-four inches. 15c each; \$1.50 per dozen.

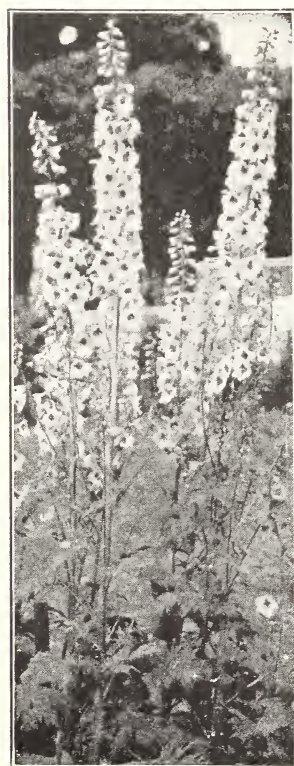

Gaillardia Grandiflora

FOX GLOVE

DIGITALIS GLOXINAEFLORA—A stately picturesque plant with spikes of bloom 3 to 4 inches in height. Color ranges from rose to deep purple. 15c each; \$1.50 per dozen.

TRITOMA

RED HOT POKER—The early free and continuous blooming qualities of this flower make it one of the greatest bedding plants. It blooms in August and September. Large spikes of flowers are a rich orange color and they succeed in any rich garden soil. Price, 25c each; \$2.50 per dozen.

Delphinium Formosum

HARDY HIBISCUS

Tall growing, especially adapted to backgrounds and shrubbery borders. Of easiest culture, and bloom the entire season. Plants grow 4 to 5 feet tall. 15c each; \$1.50 per dozen.

MALLOW MARVEL—A beautiful deep red color. Very effective.

WHITE CRIMSON EYE—This is probably the best known and the most planted of the Hibiscus.

Hardy Hibiscus

SEDUM

STONECROP—A very pretty erect growing perennial attaining a height of 18 inches. It has broad light green foliage with immense heads of handsome showy rose colored flowers. Indispensable as a fall blooming plant. Price, 15c each; \$1.50 per dozen.

DELPHINIUM OR LARKSPUR

Another old-time favorite of the easiest culture. Hardy, and prefers sunny, well-drained position. Spikes are superb for cutting. 15c each; \$1.50 per dozen.

BELLADONNA—A sky-blue variety. June to October.

FORMOSUM—The old favorite dark blue with white center; 3 to 4 feet high. Very vigorous, free-flowering and one of the best.

HYBRID MIXED—These plants were grown from seed collected from main sorts, and will show some surprising new colors.

CHINESE (Chinese Larkspur)—A very pretty variety with fine feathery foliage and intense blue flowers.

YELLOW DAY LILY

HEMEROCALLIS

Popular hardy plants; belong to the Lily family. They succeed everywhere and should always be included in the border of old-fashioned hardy plants. 15c each; \$1.50 per dozen.

THUNBERGII—The latest to flower; rich butter-cup-yellow, funnel-shaped flowers throughout July. 4 feet.

OSWEGO TEA

MONARDA DIDYMA—A bushy plant growing about 2 feet high, covered with round heads of deep red flowers. Its petals are similar to the Cactus Dahlias; also known as Bergamot and Mint on account of the delicious fragrance of their leaves when crushed. 15c each; \$1.50 per dozen.

Lychnis Chalcidonica (See page 33)

LUPINUS OR LUPINS

The Lupinus produce beautiful long spikes of pear-shaped flowers a foot long on stems 3 feet high. They are perfectly hardy and very showy. We can supply them in the following colors: White, Blue, Rose, Mixed. 15c each; \$1.50 per dozen.

GYPSOPHILA

BABY'S BREATH

Very branching or spreading slender shrubs, of very easy culture, and very desirable where a mass of delicate misty white bloom will fill a bare place. 15c each; \$1.50 per dozen.

Delphinium Belladonna

Sedum or Stonecrop

PERENNIALS—CONTINUED

Oriental Poppies

POPPIES

ORIENTAL (Assorted)—These are the regal representatives of this popular genus, growing 3 to 3½ feet high, and far surpassing in splendor of bloom all the annual and biennial kinds. Flowers in May and June. 15c each; \$1.50 per dozen.

ICELAND (Assorted) — The plant is of neat habit, forming a tuft of bright green, fern-like foliage from which spring, throughout the entire season, a profusion of slender leafless stems 1 foot high, each graced with charming cup-shaped flowers. 15c each; \$1.50 per dozen.

LOBELIA

CARDINAL FLOWER—Rich fiery red flowers; strong plants often producing 10 to 18 spikes in August and September. 15c each; \$1.50 per dozen.

MOURNING BRIDE

SCABIOSA JAPONICA—Handsome border plants and should be planted in every garden. Lavender blue flowers from July to September that last a long time when cut and put in water. 15c each; \$1.50 per dozen.

HARDY SWEET PEAS

This beautiful perennial blooms continuously all summer long. The flowers are larger than the tender Sweet Peas and will continue to bloom even in hot dry weather. Ours are a mixture of white, pink and red that will produce bouquets for you every year. Price, 15c each; \$1.50 per dozen.

PHLOX

FINE NEW VARIETIES

KARL FOERSTNER—A lovely orange scarlet, 25c each, \$2.50 doz.

MURIEL ROGERS—Deep shiny pink. 25c each, \$2.50 doz.

NEWBIRD—A delicate amaranth red, 25c each, \$2.50 doz.

DR. KONIGSHAFFER—Brilliant orange scarlet, 25c each, \$2.50 doz.

ETHEL PRITCHARD—Beautiful mauve lilac, 25c each, \$2.50 doz.

VON HECKEREN—Salmon Rose color, 25c each; \$2.50 doz.

RHINELANDER—Beautiful salmon-pink; immense size. Price, 15c each; \$1.50 per dozen.

RYNSTROOM—Big trusses, rosy-pink flowers. Price, 20c each; \$2.00 per dozen.

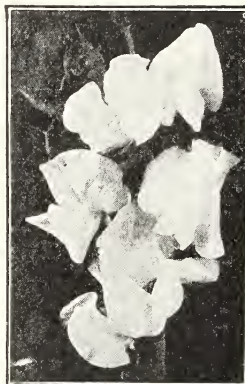

SUBULATA—Moss or Mountain Pink, and an early spring flowering type with evergreen foliage. Valuable for covering ground or graves. Price, 15c each; \$1.50 per dozen.

BRIDESMAID—White, crimson eye. Price 15c each; \$1.50 per dozen.

MISS LINGARD—The best phlox in cultivation. Immense heads of pure white flowers in June, September and October. Prices, \$1.50 per dozen.

Phlox Newbird

Hardy Sweet Peas

Hardy Carnation

HARDY CARNATION

GARDEN PINKS

KING BELL—A very hardy spicy perennial with beautiful flowers. Wonderful cut flowers. 15c each; \$1.50 per dozen.

MONT BLANC—Pure white flowers, very large and spicy scented. Has long blooming season. 15c each; \$1.50 per dozen.

HOLLYHOCKS

DOUBLE—Immense double and semi-double flowers; all shades and colors mixed. 15c each; \$1.50 per dozen.

LYCHNIS

CHALCEDONICA (Maltese Cross)—Heart-lobed stars of brightest vermilion, arranged in large flat panicles. 2 yr., 15c each; \$1.50 per dozen.

DIANTHUS OR SWEET WILLIAM

DIANTHUS BARBATUS—The old-fashioned favorite. A fine plant, producing great masses of bloom of extremely rich and varied colors. Flowers lasting and fine for cutting. 15c each; \$1.50 per dozen.

DIANTHUS. Pink Beauty 15c each; \$1.50 doz.

DIANTHUS. Scarlet Beauty. 15c each, \$1.50 doz.

DIANTHUS. Velvet Black, 15c each, \$1.50 doz.

DIANTHUS. Holborn Glory, 15c each, \$1.50 doz.

DIANTHUS. White, 15c each, \$1.50 doz.

DIANTHUS. Newport pink, 15c each, \$1.50 doz.

HARDY GRASSES

ERIANTHUS RAVENNA (Plume or Pampas Grass)—Beautiful plumes 8 to 10 feet tall in the Fall. Fine for winter ornament. 15c each; \$1.50 per dozen.

EULALIA ZEBRINA (Zebra Grass)—The long blades of this variety are marked with broad yellow bands across the leaf. Fine for lawns. 15c each; \$1.50 per dozen.

Dianthus or Sweet William

FLOWERING BEGONIAS

This Beautiful Class of Plants is Deservedly Popular. They are Suitable for Pot Culture in the Window for Winter Blooming. We Can Furnish Flowering Begonias from 2½-in. Pots, 25 Cents Each, \$2.50 per Dozen. EXCEPT WHERE NOTED.

ARGENTEA GUTTATA

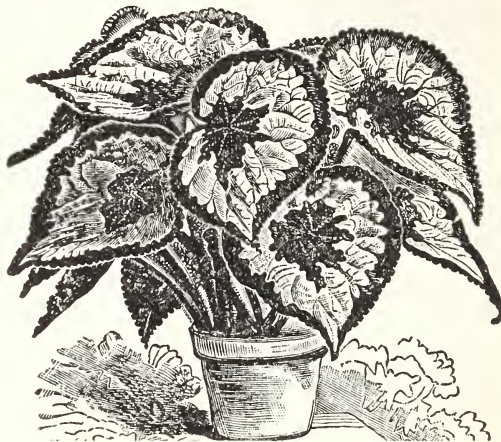

This variety is an introduction of M. Lemoine and is a cross between Olbia and Alba Picta. This beautiful sort has the silvery blotches of Alba Picta, the grace and beauty of growth of Olbia. It has purple-bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

Argentea Guttata

thickly spotted with silver-white. Foliage small and elegant. **ALBA PERFECTA GRANDIFLORA**—We doubt if there is a white-flowered variety that equals it. The foliage resembles Rubra in shape, but it is lighter green, while the flower panicles are much handsomer. It is a pure white flowering Begonia of much merit.

ALBA PICTA—Long, pointed slender leaves,

Rex Begonia

REX BEGONIAS

The broad leaves, high coloring and exquisite markings of Rex Begonias make them invaluable as decorative plants for house culture. Give them a soil composed of rich loam, woods earth and sharp sand. They require a warm, moist atmosphere and shady situation. Do not allow the sun to strike the leaves while wet, and do not overwater. They may be planted in a shady situation under trees or alongside of the house. Rex varieties make immense leaves. We can furnish Rex Begonias in choice sorts at 25 cents each, 3 for 65 cents..

SNAKE PLANT

(Sansevieria Zeylanica)

Beautiful house plant well adapted for decoration of sitting rooms, halls, etc., as it stands dust and neglect of watering with impunity. Leaves grow to a length of from 3 to 4 feet, beautifully striped cross-wise with broad white variegations on a dark green ground. Rare and beautiful plant, should be abundantly grown for positions out of sunlight, where other plants do not thrive. Plants, 20c each; 3 for 55 cents.

BEAUTIFUL FUCHSIAS DOUBLE FLOWERING VARIETIES

Price: 15 cents each; three for 40 cents.

GLOIRE DES MARCHES—It is nearly perfection as to free growing and habit, being strong and bushy. Tube and sepals deep scarlet; corolla very large and double and pure white.

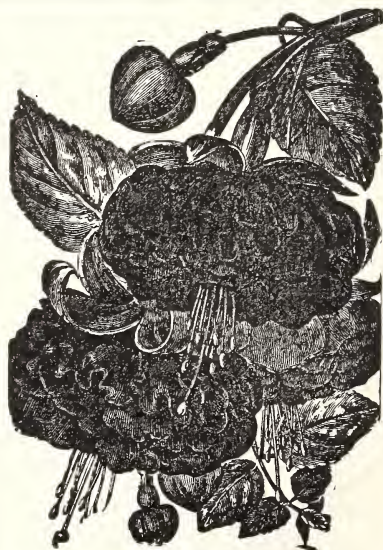

TENOR—This double Fuchsia is of extraordinary merit. Violet-blue corolla, very dark rich red sepals, waxy luster. Plant of fine form, easy to grow, continually in bloom. Positively one of the grandest varieties ever offered.

SINGLE FLOWERING VARIETIES

Price: 15 cents each; three for 40 cents.

BLACK PRINCE—This is without question the very finest single Fuchsia grown for the amateur to cultivate. It makes a shapely bush, is robust in growth, free from disease and insects, and is probably the freest in blooming. Blossoms of a beautiful waxy-carmine or pink color. Certainly a plant of easy culture.

LORD BYRON—A strikingly handsome variety, with calyx of cochineal red, and large, single corolla of deepest violet.

Lord Byron Fuchsia

PALMS AND OTHER DECORATIVE PLANTS

Buy Direct
From Us and
Save Money.

Kentia Palm

LORD WOLSELEY—Superb species, its lively coloring gives it marked value. Rapid grower. Price, 50c each.

KENTIA BEL-MOREANA—The Kentias are among the best of the Palm species for general cultivation. This variety is one of the best in its class, graceful habit, bright green foliage, gracefully dis-

posed; as a decorative plant for the window, dinner table or conservatory it scarcely has an equal. Price, medium, 75 cents; larger, \$1.50.

Dracena Indivisa

Ficus Elastica

DRACENA INDIVISA—Of the plants in use for center vases, baskets, or for beds in the open ground, nothing is so valuable as this is. From its graceful drooping habit it is sometimes called the "Fountain Plant." Price, 15 cents each; three for 40 cents; extra large, 35 cents.

FICUS ELASTICA (India Rubber Tree)—Very large, smooth leathery leaves, evergreen foliage. Generally esteemed one of the finest house plants grown, the plant attaining a large size and tree shape. Price, 12 inches high, 75c; 18 inches high, \$1.00; 2 feet high (by express only), \$1.25.

CHRYSANTHEMUMS

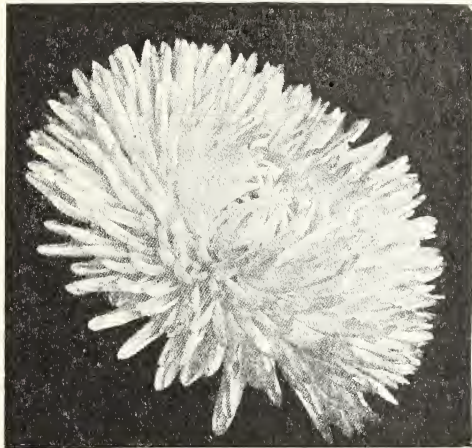

Price, 15c each; 6 for 80c; 12 for \$1.50.

CHRYSOLOREA—A very fine yellow. Medium to tall in growth. Foliage heavy. Considered the finest early yellow variety ever introduced.

UNAKA—A strong grower with long stems and good foliage; a fine incurved bloom from early buds. Color, lavender-pink.

WHITE CHIEFTAIN—We are sure that this will take the position among whites that Bonaffon holds among yellows; it will prove the ideal white. Like its parent, it holds in fine condition for a long time; the blooming period runs over three weeks.

PACIFIC SUPREME—Color a most beautiful shade of clear pink. A wonderful flower; extra fine for exhibition. A mammoth bloom of purest pink; unexcelled.

White Chieftain Chrysanthemum

GERANIUMS

SINGLE VARIETIES

PRESIDENT ROOSEVELT—Pure snow-white, retaining its purity the entire season; perfectly formed round flowers, borne in enormous trusses held well above the beautiful foliage.

W. A. CHALFANT—Dazzling scarlet, florets slightly circular and slightly cupped, forming a magnificent truss; one of the best for bedding.

MRS. E. G. HILL—An exquisite shade of soft, light salmon, each petal bordered with rose-salmon; continual bloomer; excellent bedding variety; semi-dwarf grower; will resist the heat of the sun.

DOUBLE VARIETIES

BEAUTE POITEVINE—Semi-double. One of the very finest of the Bruant race. The color is a brilliant salmon, shading to apricot in the center; trusses colossal, florets two and one-fourth inches in diameter.

DUCHESSE DE MONTMORT—Trusses of enormous size; color brilliant purple, nearest we have to the blue Geranium. Highly recommended.

S. A. NUTT—This is the darkest and richest double Geranium grown. It is very bright, dark, deep, rich velvety maroon, an excellent bedder and a perfect pot plant. Price, 2 1/2 inch Pots, 15 cents each; \$1.50 per doz.

PLANT A FLOWER BED—SPECIAL COLLECTIONS BELOW

BRILLIANT COLEUS BED

Coleus is the acknowledged standard bedding plant. A bed of three feet in diameter requires 37 plants set eight inches apart. Same planting for a bed of five feet in diameter requires 91 plants. Price, our selection of varieties, \$2.25 for a 3-foot bed, and \$5.00 for a 5-foot bed. Plants offered are from two and one-half inch pots.

BEAUTIFUL BED OF GERANIUMS

Geraniums are the best known and most extensively used of all bedding plants—should be set 12 inches apart. We offer 15 plants for a three foot bed for \$1.50, or 30 plants for a five foot bed for \$2.75. Must be our selection of varieties, but you may choose colors wanted. Plants offered are from two and one-half inch pots.

SHOWY BED OF SINGLE FLOWERING PETUNIAS

For outdoor decorations there are few plants that excel the Single Petunia. They commence blooming when quite small, and when at their best, display a gorgeous effect of flower and foliage. We offer 20 plants (mixed colors) for a three foot bed for \$1.50, or 40 plants for five foot bed for \$2.75.

BRILLIANT BED OF SCARLET SALVIA

Salvias grow in bush form 2 to 2 1/2 feet high. The foliage is dense, forming a mound of vivid blazing red flowers. Salvias should be planted 10 inches apart. We offer nice plants from 2 1/2 inch pots. 20 plants for a 3-foot bed, \$1.50; 40 plants for a 5-foot bed, \$2.75.

LANTANAS

OR SHRUBBY VERBENAS, THE FINEST PHANTS THAT GROW

The brilliant colors, robust growth and profuse blooming habit of the Lantana render it one of the finest bedding plants that grow. The varieties here described give a wide range of color, and include the most distinct and profuse blooming varieties. Price: 15c each; 12 for \$1.50.

AURORA—Large flowered dark and light shades pink, yellow center.

JACOB SCHULTZ—The best of the deep red varieties.

WEeping LANTANA—Fine for baskets, vases, pots, window boxes. Produces a great abundance of delicate drooping, leafy vines, covered nearly all the time with clusters of lovely lilac flowers with white eyes.

VARIEGATED VINCA

Beautiful variegated trailing plant, admirably adapted for hanging baskets and cases. Leaves glossy green, broadly margined creamy-white; flowers blue. Small plants, 15c each; 12 for \$1.50; larger, 25c each, 3 for 60c; extra large, for vases, 35c each, 3 for \$1.00.

MOONFLOWERS

Price: 15 cents each, 12 for \$1.50.

IPOMEA GRANDIFLORA—The true Moonflower. A very rapid summer climber, blooming the first season. No insects attack the leaf. The flowers are immense, pure white, sweet-scented, five inches in diameter, borne very profusely, and, as they open at night, are very striking. Being a free bloomer, the effect on a moonlight night is very charming. Try it.

IPOMEA LEARII—The Blue Moonflower. Flowers are trumpet shaped, of a rich violet-blue, with five purple rays.

IPOMEA MAXIMA—Its pure white blooms average 6 to 8 inches across, and often surpass that magnitude.

MAMMOTH VERBENAS

The Verbena is one of the prettiest and most popular of all flowering plants suitable for forming beds on the lawn. Commences to flower and spread from the first day plants are set until late in autumn, every day becoming better and more handsome. Colors of all the different shades of scarlet, purple, blue, white, etc. 10c each; \$1.00 per dozen.

DOUBLE PETUNIAS

The Double Petunia is one of the finest bedding plants for massing, mixed borders, or for vases. The brilliancy and variety of its colors, combined with the duration of its blooming period, render it invaluable for garden decoration. Our collection is unsurpassed for brilliancy of color and size of bloom. Price: 15c each; 12 for \$1.50.

FAVORITE—Rosy-purple, beautifully frilled; edges white.

VESUVIUS—Rich deep purple, shaded crimson.

SNOWBALL—Finest Petunia grown; color a sea foam white; flower largest size, beautifully frilled.

Petunia, Snowflake

HANGING BASKET COLLECTION

Six plants for a hanging basket that will make a lovely basket. We expect to make large sales of this collection as it includes choice kinds and represents a big value. The list of varieties is:

1 *Draena Indivisa*, 1 *Sprengerii Fern*, 1 *Geranium*, 2 *Vinca Vines*, 1 *Lantana*—ALL SIX PLANTS FOR 50, POSTPAID

Hibiscus, Peachblow

HIBISCUS

GRANDIFLORUS—Rich, glossy foliage; blooms profusely through the summer; literally covering the plants with scarlet-crimson single flowers.

PEACHBLOW—One of the finest plant novelties offered in recent years; flowers double, from 4 to 5 inches in diameter; charming, rich, clear pink color, with a small deep crimson center; entirely new and most beautiful shade.

MINIATUS SEMIPLenus—Semi-double flowers, light vermilion-scarlet; petals waved and recurved; flowers noticeable for the absence of formality, but very handsome. Price: 15c each, any 2 for 25c; extra large size at 40c each, 3 for \$1.00.

RARE NEW AND CHOICE OLD IMPATIENS

Some of these are entirely new and distinct in color. All are true ever-bloomers, are good bedders and make splendid pot plants for the house. The Impatiens delight in a light, rich soil and thrive best in a partially shaded position. They are a mass of bloom all the time, are splendid bedders and superb pot plants for the house. When grown in pots, care should be taken to avoid overwatering.

Price: 15c each; any two for 25c; \$1.50 per dozen.

CARMINEA—Bright carmine.

SULTANA IMPROVED—Certainly the freest-blooming bedding or house plant in cultivation. The plant is literally covered with brilliant, rosy-scarlet flowers. For summer bedding or winter blooming in the house it has no equal.

PINK BEAUTY—Handsome shade of pink.

COLEUS

There is nothing in the line of bedding plants that can ever take the place of Coleus. Used in solid clumps or as edging to Canna beds, etc. 10c each, any 6 for 50c. Coleus, when sent by express (not prepaid), \$6.50 per 100.

BECKWITH'S GEM—Beautiful fancy variety with large leaves of heavy texture and finely scalloped edges; center of leaf dark velvety maroon, bordered with fiery-red; edge is green, changing to creamy-yellow at point of leaf.

LEOPARD—Greenish-yellow ground thickly dotted and splashed maroon.

CHRISTMAS QUEEN—It is difficult to describe this beautiful, new large leaf Coleus. Its coloring is gorgeous and ranges from dark velvety maroon through shades of brown, green, pink and yellow, the combinations of color varying in each plant. Must be seen to be fully appreciated.

DUNERIA—Grandest Coleus of recent years; has a deep velvety texture. Color crimson, maroon center; beautifully scalloped edge of light red; a fine showy bedder.

RAG CARPET—Center of leaf wine color, broad margin spotted dark maroon.

TRAILING BEAUTY—An excellent variety for hanging baskets and vases on account of its trailing habit; center of leaves fiery-crimson surrounded with deep maroon; deeply serrated edges of bright olive-green.

Ostrich Plume Fern

POPULAR BOSTON SWORD FERN

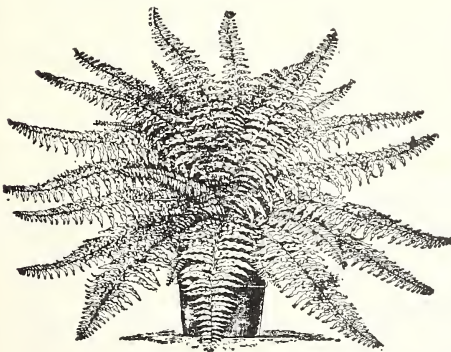

(*Nephrolepis Exaltata Bostoniensis*)—In the vicinity of Boston no other plant is used so extensively as this graceful *Nephrolepis*, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully on account of which it is frequently called the Fountain Fern.

THE ROOSEVELT FERN

(*Nephrolepis Roosevelt*)—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended.

OSTRICH PLUME FERN

(*Nephrolepis Whitmanii*)—An improvement on the *Nephrolepis Elegantissima*, with still more gracefully divided pinnae, giving the whole plant an airy, lace-like appearance; makes beautiful symmetrical plants even in small sizes and large specimen plants are beautiful beyond description.

Roosevelt Fern

ASPARAGUS SPRENGERI—The Charming Decorative Plant. Not only is it useful for cutting in sprays for fine cut-flower work, more particularly in connection with large roses, etc., but grown in suspended pots it makes one of the perfect decorative house plants we know of. Price: 15 cents each; three for 40 cents; large plants from 4-inch pots, 40 cents each; three for \$1.00.

ASPARAGUS PLUMOSUS NANUS—(Lace Fern)—One of the handsomest of

our foliage plants. The leaves are a bright green, gracefully arched, and as finely woven as the finest silken mesh. Their lasting quality when cut is remarkable, retaining their freshness for weeks, hence it ranks as the most valuable plant we have for this purpose, surpassing Maiden Hair Fern in grace, fineness of texture and richness of color. Price: 15 cents each; three for 40 cents; large plants in 4-inch pots, 40c each; three for \$1.00.

INDOOR FERNS

Ferns are a valuable addition to any home. They are very decorative and can be grown in vases or baskets or pots. They will thrive in any ordinary living room if given good drainage and kept well watered.

PRICE Any of the following Ferns in nice young plants, 20 cents each; any four for 75 cents. Strong four-inch pot plants, 50c each.

VERONA

A handsome new variety of the *Elegantissima* type, somewhat resembling *N. Whitmanii*, but with finer "Ostrich Plume" foliage, and with stiffer mid-rib, which makes the fronds stand up better than most varieties of the Lace Fern.

TEDDY JR.

(Dwarf Roosevelt)—A new dwarf form of the popular Roosevelt Fern; a grand compact grower, making splendid specimen in medium size plants.

Boston Fern

DWARF FRUITS

The dwarf fruits are not merely so common or well known as they are in Europe or as they should be here. The fruits are just the same as on the standard varieties. The only difference is, the trees or plants do not take so much room as many of them may be trained on the fence, or even along the side of a building if necessary. They also come into bearing much earlier than the standard sorts. It is possible to plant three to five hundred dwarf trees on a quarter of an acre of ground, where less than a dozen standard varieties would flourish. The dwarf fruit trees also work more readily into a scheme of more or less ornamental gardening, where fruits are combined with flowers, especially if some sort of formal gardening is attempted. The cordon, espalier and pyramids exactly suit these demands.

DWARF APPLES

Dwarf Apples are produced by grafting the variety desired onto the dwarf parasite stock, raised for this purpose. Plant one-year-old trees. They will develop into any shaped tree you wish to train them and will produce the fruit in a very few years. In fact, one-year-old trees often produce fruit in the nursery rows the second year.

DWARF APPLE TREES—2 year old, 3 to 4 feet, 60c each; \$5.00 per 10.

VARIETIES—Jonathan, Wealthy, Wolf River, Red Astrachan, Baldwin, Fallawater, Early Harvest. Plant in spring or late fall, 6 to 8 feet apart.

DWARF CHERRIES

We are able this year to furnish the Dwarf Cherry, which is a very welcome addition to our list. The Dwarf Cherry makes a beautiful compact small tree that is very ornamental. They bear very early in life and their fruit is of an exceptional high quality. All dwarf fruits are becoming more popular each year because they are so well adapted to the small city lot. Dwarf Cherries can be planted about ten feet apart and they make a beautiful hedge.

DWARF CHERRY TREES—Two-year-old, 3 to 4 feet, 90c each; \$8.00 per 10; \$18.75 per 25.

VARIETIES—Montmorency and Early Richmond.

DWARF PEARS

The pear is very profitably grown as a "dwarf." These pears differ from the standards inasmuch as they are propagated on a quince root, which makes it slow growing and dwarfish. The fruit is the same in either case. The quality and appearance of the fruit will convince anyone that they are excellent to plant.

DWARF PEARS—Select trees, 2 and 3 years old 3 to 4 feet 60c each; \$5.00 per 10; \$11.25 per 25.

VARIETIES—Duchess, Kieffer, Flemish Beauty, Clapp's Favorite, White Star. Plant spring and fall, 8 to 10 feet apart.

DWARF PEACHES

For quick bearing fruits we have nothing that will equal a Dwarf Peach Tree. They are very beautiful when in bloom and give the appearance of a tall shrub rather than a tree. They are very good bearers of a high quality fruit. Just the thing for tall screens or for backgrounds in your shrubbery planting.

DWARF PEACHES—One-year-old trees, 3 to 4 feet, 75c each; \$7.00 per 10; \$8.75 per 25.

VARIETIES—Elberta and Rochester.

A REAL HOME ORCHARD COLLECTION

TREES ARE ONE YEAR OLD 3-4 FEET PRICE \$12.50

- 2 Ensee Apple
- 2 Jonathan Apple
- 2 Delicious Apple

DISREGARD PRICES OF APPLE ON PAGE 41. ERROR IN PRINTING AGE OF TREES.

It is a recognized fact that of all fruits the apple is the most important, as it may be had fresh the year round, which is not the case with any other fruit.

By careful selection of varieties in regard to their time of ripening, apples may be had fresh from the tree from early summer until late fall; and from the cellar or storage until the next season's crop is ready for use. Surely the Apple has been rightly called "The King of Fruits."

Delicious Apple

It is sweet, slightly touched with acid, but only enough to make it all the more pleasing; flesh is fine grained, crisp, juicy, delicious; in keeping qualities it ranks with the best.

FALL RAMBO

One of the most popular Fall or Early Winter apples. Highly valuable for kitchen or table use. Fruit medium in size, flat, smooth, yellowish-white in shade streaked with pale red in the sun. October to December.

GRIMES GOLDEN

The BEST and most widely planted yellow apple. The tree is hardy and productive. It can be used to an advantage as a filler as it comes into bearing rather early. Few apples have proven more profitable in the commercial orchard. The fruit is of medium size, tender, rich, aromatic, sub-acid, good to very good, for eating raw or cooking.

ENSEE THE BEST OF ALL

The growth of this tree is upright while young, but becomes more spreading and drooping with advancing age and fruit bearing. The fruit is about the size of the Rome Beauty, with the quality of the Jonathan or Grimes Golden, but more juicy than either of them, and never gets dry even after being in storage for a year. The flesh is yellowish, crisp, rich, delightful.

EARLY HARVEST

Much prized by the housewife. The Early Harvest has been in cultivation for more than one hundred years and this is a proof of its excellence. It is a very early variety, ripens in July and August. It is desirable for the home orchard because of its earliness and its excellence for dessert and culinary purposes.

BALDWIN

The apple of general popularity. It bears most abundantly. The Baldwin is a staple on the market everywhere. It is well known to every fruit grower and housewife in the north-western United States. A bright red winter apple, rich, sub-acid, excellent because of its dessert and cooking qualities.

BANANA

This apple is not as generally planted as its merits would warrant, and we recommend it both for home and market. Fruit large, clear pale yellow with beautifully contrasting pinkish-red blush; attractive in appearance, of good dessert quality.

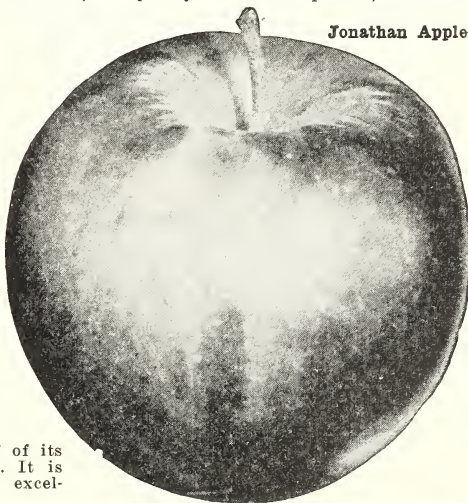

DUCHESS OF OLDENBURG

The most profitable mid-summer apple. Downing has the following to say of the Duchess: "This handsome Russian apple proves one of the most hardy and profitable varieties in cultivation, especially in our northwestern sections."

DELICIOUS

Large, with surface almost covered with a most brilliant beautiful dark red; in quality it is unsurpassed; in flavor

Jonathan Apple

Apples are the Most Profitable of Fruits

APPLES—CONTINUED

JONATHAN

A general favorite everywhere. The Jonathan originated in New York state and belongs to the Spitzenburg class. It is a medium sized apple, brilliant red; very highly flavored, juicy, fine-grained, tender, mild, sub-acid. Quality is fine for home use and for marketing.

MAIDEN BLUSH

This oldtime tested apple is one of the most beautiful and productive of the Fall apples. It is of good uniform size. The color is a bright lemon yellow, with a deep crimson blush spreading over one cheek. The flesh is white, crisp, tender, very juicy.

NORTHERN SPY

Large, striped crimson in the sun, juicy, rich and aromatic, retaining these qualities until late spring or summer. The tree grows rapidly, bears well as it blooms later than most varieties. Valuable as an aphid-resisting sort.

Ensee

WEALTHY

The best money maker of its season. This is by far the most valuable of all the Fall apples. Tree has proven hardy, vigorous and healthy. The fruit is a brilliant red, distinctly marked with narrow stripes and splashes of deeper red. The quality of the fruit is superb. Those who prefer an apple that is tart and juicy regard the Wealthy as the finest apple that is grown. The flesh is white, tender, crisp, fine-grained, aromatic and bears very good. Tree a free grower very hardy with stout branches. Bears fourth to fifth year.

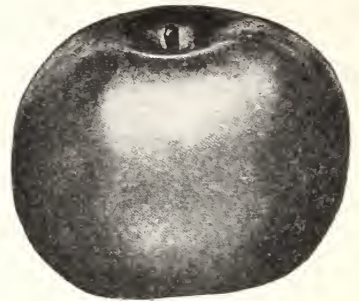

WOLF RIVER

A large handsome apple, and originated on the banks of the Wolf River at Fremont, Wis. Very hardy variety, strong, vigorous grower with spreading habit. Produces full crops of very large fruit; white flesh, tender, juicy and pleasant to taste. It has a mild sub-acid, with a peculiar spicy, slight quince-like flavor.

YELLOW TRANSPARENT

The earliest summer apple. The greatest home or market apple, the money-maker of summer apples, known to net over \$750.00 per acre annually. By many this is considered the best of all extra-early apples and comes into market when the demand for summer apples is extra strong; consequently it always brings the best prices.

For prices see page 41.

Maiden Blush

RAMBO

The Rambo is too well known to need much description, as it is one of the old favorites that has its place in the farm as well as the commercial orchard. The fruit is of medium size, greenish yellow, partly covered with red in the sun.

ROME BEAUTY

The great profit maker. An old apple, but one that steadily grows in popularity, and is a money maker for growers all over the country. It has an established place in the markets and no orchard should be without this apple. It is large, mottled and striped in different shades of red. The flavor and quality are way above the average; appearance and size are its valuable points and it always brings a good price.

STAYMAN'S WINESAP

Champion of all Winesaps. Here we have an extraordinary market and family apple. Succeeds wonderfully anywhere. The fruit is medium to large; attractive green and yellow, almost hidden by dark red stripes. Flesh yellow, juicy, quality the best, ranking with the Yellow Newton and the Grimes Golden. The tree is a quick and strong grower. The Stayman tree somewhat resembles the ordinary Winesap but is a stronger grower and is much hardier, and because of its heavy bearing habits and late keeping it is a great source of revenue to the growers everywhere.

LISTEN to our "Garden of Music" program over W. L. W. Cincinnati each Thursday evening at 8 to 8:30 P. M.

APPLES—CONTINUED

WINESAP

One of the old standbys. It is one of the very best keepers. Medium size, smooth and a fine dark red; flesh yellow, crisp, tender, very juicy, aromatic, firm and very good. Popular with fruit stores because it always holds up, and is one of the leading export apples. The tree is a strong grower the root growth being exceptionally strong. It comes into bearing early and is remarkable for its regular and abundant crops.

YORK IMPERIAL

An important commercial apple. Can be kept till new crop comes. Medium sized, round, irregular; greenish-yellow overlaid with bright red stripes; flesh tender, firm, crisp, juicy, extra good flavor. Tree is a vigorous grower.

Winesap

ONE YEAR OLD APPLE TREES

In order to supply our constantly increasing demand for one-year-old apple trees, we have grown and herewith present to our patrons a list of varieties we can supply in one-year-old trees.

The popularity of the one-year apple trees has grown out of the experience of commercial orchardists who choose them for the following reasons:

"The one-year tree or whip gives the grower a chance to form the head of the tree at any desired height, also to build exactly the kind of a head he may desire. This alone would be sufficient reason in the opinion of many growers for choosing the one-year-old tree.

"The tree which has stood in the nursery row only one year can without doubt be transplanted easier and with more assurance of its living than

one which has grown for two years in the nursery row, as the root system of the one-year-old tree will not be as disturbed as the older tree.

For this same reason the one-year-old tree will get a better hold on the soil than if it had stood two years and then had its anchor roots disturbed.

"Again, the one-year-old tree will bear fruit just as soon as the older tree on account of its becoming established quicker after transplanting.

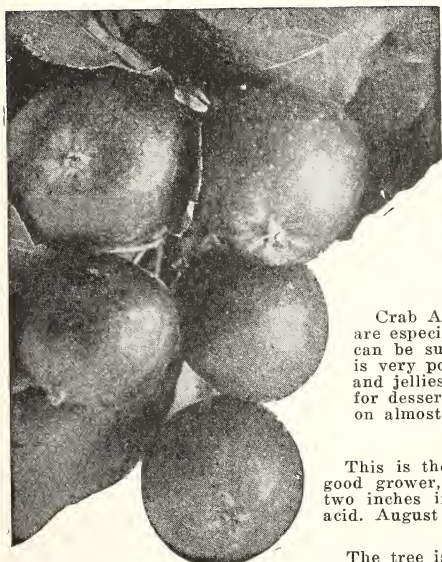

"Lastly, they may be bought for less money, this makes a difference with many; however, the price should be the last consideration, quality always first in any tree."

For Prices on One-Year-Old Apple Trees See below.

CRAB APPLES

Crab Apples form a valuable crop, both in home and commercial orchards. They are especially desirable in the colder sections, where only a few varieties of Apples can be successfully grown; but they succeed well in all climates and their fruit is very popular. A few years ago they were thought fit only for cider, preserves and jellies; but there are varieties now that command a good price on the market for dessert purposes, especially in the case of the Whitney Crab Apples; do well on almost all soils. Come into bearing early and bear almost every year.

TRANSCENDENT

This is the largest and best of the Siberian Crabs. The tree is extremely hardy, good grower, and usually very productive. The fruits are about one and a half to two inches in diameter. Bright yellow striped with red, flesh crisp, juicy and sub-acid. August to September.

WHITNEY

The tree is a hardy, thrifty, upright grower, and comes into bearing when young; it is a very productive variety. The flesh is yellowish, crisp, juicy and splendid for eating and cider. August and September.

PEARS THE QUALITY FRUIT

The Pear is closely related to the apple and like the apple thrives on many soils. It is noted for its delicate, mild, sweet and delicious flavor, and the melting, buttery, juicy texture of the flesh, surpassing the apple in these respects.

The Pear is a highly profitable fruit, and especially so in markets that pay for quality as well as looks. It is easily grown, being nearly free from insects and fungous diseases.

Our pear trees are of the finest quality for transplanting for they are well-developed, stocky trees. In the course of five years they will be bearing a fine crop of fruit.

We have both standard and dwarf varieties. For the permanent orchard we recommend the standard varieties, the dwarf being better for a small lot. (See page 38 for dwarf fruit prices.)

PRICES ON PEARS

LIST OF VARIETIES

ANJOU (Buerre d' Anjou)—Rather large, flesh yellowish-white, fine grained, melting, with a rich, excellent flavor. Good keeping qualities.

BARTLETT—One of the most popular sorts, both for home and market. It is large, handsome waxen yellow, with red blush; flesh buttery, rich and juicy, highly flavored. One of the best varieties for canning. Ripens in August and September.

EVERY
CUSTOMER
MUST BE
SATISFIED.

CLAPP'S FAVORITE—

Fruit handsome, large, long, yellow, spotted dull red where exposed to the sun; flesh fine-grained, juicy, rich, sweet flavored. It resembles the Bartlett. The tree is a vigorous grower, hardy and productive. Ripens in August.

DUCHESS D'ANGOULENE—This is the largest among our really good pears. The skin is a dull greenish-yellow; flesh white, melting, juicy and well flavored. The tree is a vigorous grower and a reliable bearer. A profitable market variety and fair for home use. Ripens in October and November.

FLEMISH BEAUTY—One of the best varieties of pears for the southwest, on account of its hardiness. The tree is a strong grower, an annual and abundant bearer, and is usually successful over a large range of country. The fruit is large; the skin pale yellow; the flavor is sweet and melting. Ripens in September and October.

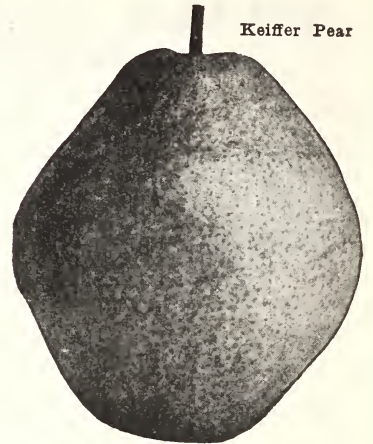

KEIFFER—On account of the excellent keeping qualities it is one of the best and most profitable market varieties. Fine for canning or preserving. For commercial orchard it is undoubtedly one of the best. The trees are not troubled with scale and seldom fail to bear a good crop. Trees bear young. October and November.

KOONCE—Exceedingly hardy variety, in fact almost frostproof, will bear heavy crops when other kinds are destroyed by frost. medium size. July and August.

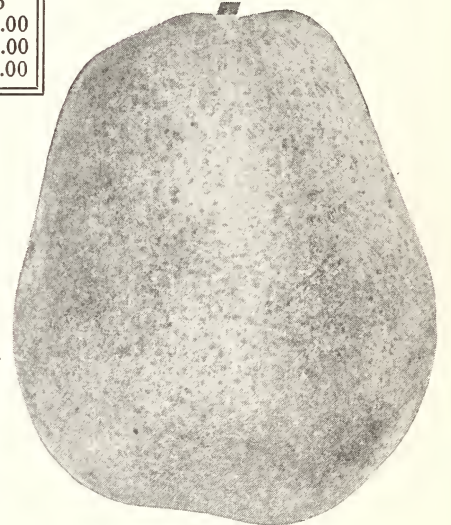

SECKLE—This well known little pear has attained the rank of standard in quality on account of its rich delicious flavor; very popular for dessert. Aug. and Sept.

SHELDON—A pear of the finest quality; rich and highly aromatic. The fruit is greenish russet with a red cheek; large size and somewhat flattened shape. Ripens in September.

Duchess

Bartlett

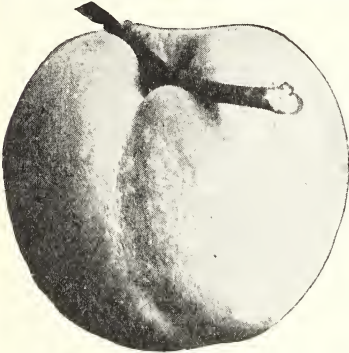

FINE PEACHES

The nature and quality of the Peach is so well and universally known that it needs no word of introduction or commendation from us. Its importance as one of the necessary luxuries of the home is keenly felt by every family and was never more emphasized than at the present when the scarcity and high prices put it beyond the reach of everyone, who does not have his own trees.

Though peach growing is fast becoming a great industry and large numbers of trees are being planted, the supply is nothing like equal to the demand. Every one who owns a farm should plant a few peach trees for home use, or a larger number for commercial purposes. If he owns only his home he should plant a few trees in the back yard and produce peaches enough for his own family's use.

BELLE OF GEORGIA

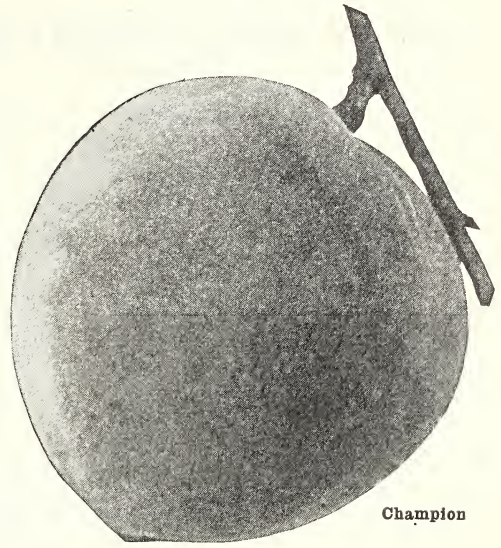

A large freestone peach, a most excellent variety, ripens early and most attractive in color and shape, with a light red cheek. Flesh is white, firm and delicious; in all ways the quality is very fine.

J. H. Hale

earliness it is one of the most profitable ever introduced. The returns from a successful Carmen orchard are almost beyond belief, and the fruit stands shipping so well that it always reaches the markets in prime condition, and its handsome appearance causes it to bring the highest prices.

INGLE'S MAMMOTH—Late yellow freestone, resembles Crawford's Late, but is more productive. September.

Champion

It has become one of the standard varieties in the big commercial orchards, as it stands shipping well and it invariably brings the best prices in the markets. Its popularity is not confined to a single locality, for it grows with equal success in both South and North.

CHAMPION

One of the finest freestone peaches. The fruit is large, creamy white, with a red cheek. The flesh is sweet, juicy, very high quality, and of excellent flavor. It is one of the showiest peaches in the market, is a good shipper and an excellent seller.

CARMEN

A fine market variety, being the first real freestone of the season. Large, yellowish white. Flesh is creamy white, is tender, rich and juicy.

This is a favorite variety with many growers. Because of its

CRAWFORD'S LATE—A very large yellow freestone of the finest quality. Ripens early in September.

TUNE IN—Every Thursday night, this winter, between 8 and 8:30 P. M. A musical program entitled "The Garden of Music", will be sent out over the air through W. L. W. Cincinnati. Keep this catalog handy for reference on instructive talks about plants for the home grounds in the morning and afternoon.

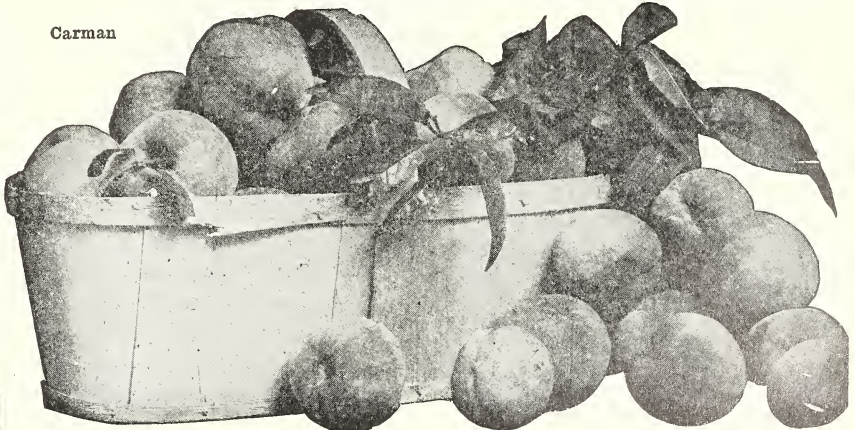

COLLECTION B

Ten Peach Trees,
\$2.50

- 2 Collections, \$4.75;
4 Collections, \$9.50.
4 Elberta—Yellow freestone; 2 Champion—White, red cheek, early; 2 Kalamazoo—Yellow freestone; 2 Salway—Yellow freestone, late; All 2 to 3 feet.

The above ten trees, 2-3 feet guaranteed to be of best quality and purity. Price to you—all charges prepaid—by parcel post—\$2.50. You cannot afford to miss this offer.

Carman

PEACHES--CONTINUED

ELBERTA

The old reliable peach, of which more are planted and from which more money has been made than from any other variety. The fruit is extra large; golden yellow, with brilliant shades of red; firm, juicy, rich and sweet. In fact it is the most popular of all the freestones. The tree is vigorous, sturdy—and hardy; thrives in widely different localities.

For years the Elberta has been the standard market peach, both in the southern and northern markets, and it has a place in the estimation of commercial growers and the users of peaches which will be very hard to fill with any other variety; the Elberta is the one variety that every fruit stand customer seems to know. No other peach has been introduced which fills all the requirements of a commercial peach with such success as the Elberta. Ripens about the first of August.

FITZGERALD

The Fitzgerald is of Canadian origin and it is one of the hardiest peaches both in tree and bloom. Fruit is a large, yellow, free stone, tinted with red, firm, juicy, of very high quality.

The tree is a good grower and very productive, beginning to bear the second year. It has been a success in nearly all peach sections.

GENERAL FUNSTON

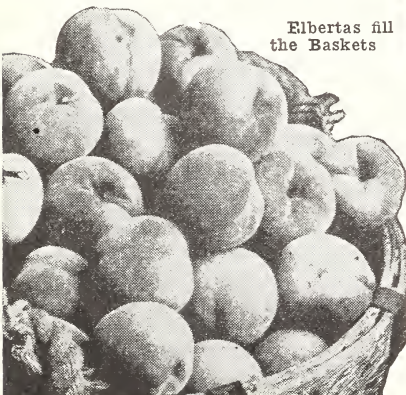

Large, new peach seedling, most excellent quality, white freestone, red cheek. Has been called "Frost Proof Beauty" because of hardiness, producing fruit when all other varieties fail.

The fruit is firm and solid, and stands shipping well, so that it comes on the market in first class condition. It is fine for canning and preserving and commands the best prices on the market.

The tree is a good grower, strong, shapely and symmetrical.

J. H. HALE

This remarkable peach, discovered as a chance seedling, by J. H. Hale, is a wonderfully fine peach, magnificent in appearance and delightful in flavor. The tree is enormously productive and the fruit is of larger size than the Elberta. Color a deep, golden yellow overlaid with bright

Elbertas fill the Baskets

Rochester

and of delicious flavor; keeping and shipping well; skin prettily blushed. Tree is strong growing and hardy, an annual and prolific cropper.

SMOCK—Large, yellow freestone, mottled with red, enormously productive and valuable for market. September.

Belle of Georgia

carmine. Smooth, solid thick skin, a peach without the fuzz, absolutely distinct in this respect, it stands in a class alone.

HEATH CLING—Very large, a creamy white peach, flesh pure white to stone, juicy and sweet. October.

KALAMAZOO—Freestone of excellent quality. Fruit large; golden yellow with crimson cheek. Flesh yellow, delightful flavor.

LEMON CLING—Large, oblong yellow peach, firm and rich. Tree hardy and productive.

LEMON FREE

This is a splendid peach possessing many very excellent qualities. Large, almost lemon shaped, pointed at the apex. In color it is a lemon yellow brightened with red cheek; the flesh is golden yellow, tender and juicy.

MOUNTAIN ROSE—Large, handsome freestone, yellow skin with red cheek. Flesh white, juicy and most excellent. August.

NEW PROLIFIC—Very popular market sort. Large yellow freestone. Flesh firm, juicy and fine flavor. September.

ROCHESTER

A yellow freestone variety having the exceptional merits of being early (ripening about Aug. 10), extraordinary sweetness and early bearing. Fruit is large, yellow, sweet, juicy

CHERRY TREES

A good cherry orchard for commercial purposes is one of the most profitable ventures a farmer can undertake, because there is no other fruit so much in demand at such good prices. The trees are very thrifty and prolific, bearing large crops annually.

The fruit is easily picked and it is always in great demand in its season, brings prices amply sufficient to repay the investment and give fancy profits. No home orchard is complete without some cherry trees.

There is no fruit which makes more delicious preserves and housewives appreciate the value of a good supply of canned cherries for winter pies, puddings and other desserts. Cherry trees are naturally hardy and are infected by fewer diseases than any other fruit tree. The so-called sour varieties are hardy, vigorous and frost resisting and are never troubled with scale, but spraying is of course beneficial to the trees. They are easily grown wherever apples succeed, and are late bloomers.

Few trees will bear such an abundant amount of luscious fruit every year with as little expense. The trees succeed best when planted in sandy or gravelly loam; avoid low or wet ground.

Our cherry stock is the best selected varieties and as fine as can be produced. They are all budded on imported Mahaleb stock, which makes the best and longest lived trees.

GOVERNOR WOOD

The standard of quality among the sweet cherries. The large, light red fruit hangs well on the tree and does not rot easily. The fruit buds are hardy and the tree is a stout, healthy grower, and an abundant bearer. June.

YELLOW SPANISH

Large, handsome, sweet cherry with light red cheek, firm and delicious. Tree vigorous in growth and productive. Late June.

BLACK TARTARIAN

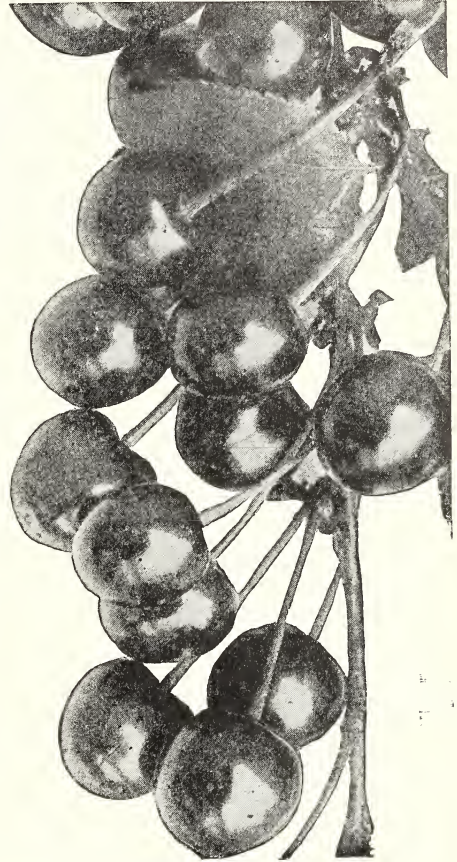

A beautiful, purplish cherry of superb quality, rich and juicy. This remarkable tree makes a beautiful erect growth. A prolific bearer. Late June and July.

DYEHOUSE

Bright, red, prolific bearer. The fruit is mildly subacid, excellent variety for canning, good shipper. Free and vigorous. Last of May.

Early Richmond

Large Montmorency

MAY DUKE

A large, light red cherry of most excellent quality. They are between a sweet and a sour cherry. Fine for canning. The tree is a strong, upright grower.

LARGE MONTMORENCY

Several different strains come under this variety or name; all of them are good, but we consider this particular strain one of the very best of the sour cherries, and it should be largely planted in every orchard. The fruit is large, dark red, and handsome.

EARLY RICHMOND

Unsurpassed for cooking. The tree is a free grower and reliable producer. The fruit is medium, dark, red, juicy and has an acid flavor. June.

WASHINGTON CHERRY TREE COLLECTION

Each season we have a surplus of some varieties and a shortage of others. This is usually due to good or poor crop conditions. We offer nothing but the very best varieties so you are taking no chances on getting inferior stock. We do not like to have these trees go to waste, so are offering them to you at the following prices, OUR selection of varieties:

6 First Class, 1 yr. top, 2 yr. root, 2 to 3 feet \$1.50.
6 First Class, 2 yr. top, 3 yr. root, 3 to 4 feet \$2.50.

When Ordering Please Specify Size and Price

Reine Claude Plum

PLUMS A BEAUTIFUL AND ORNAMENTAL TREE FOR A CITY LOT

Plum trees are often called the poor man's tree because they require so little room to grow and are always such prolific bearers. The market's demand for high grade plums is almost unlimited, and for dessert, cooking and canning no fruit is more delicious.

ABUNDANCE

A beautiful yellow, heavily overspread with purple-carmine; large to very large; the flesh is yellow, very juicy, sweet and quite firm; skin tough. The tree is a strong, thrifty grower, very hardy and prolific. The fruit stands shipping well to distant markets. July.

BRADSHAW

Remarkably good early plum. This variety is a very large dark red. The flesh is yellow, juicy and good. A valuable market variety. The tree is an erect, vigorous grower. Middle of August.

LOMBARD

A favorite for canning and culinary purposes. Of medium size, oval, violet-red. Flesh is yellow, juicy, pleasant and good. Adheres to the stone. Good market variety. The tree is strong and productive, bearing when quite young. Ripens late in August.

MOORE'S ARCTIC

Purplish black plum with a thin bloom. The fruit is small to medium; flesh juicy, sweet and fine flavored. Tree is healthy, a regular and abundant bearer. August.

REINE CLAUDE

Fine variety for canning. Fruit is large, roundish oval greenish yellow, spotted with red; flesh yellow, juicy, rich, and of the finest quality.

SATSUMA

Ripens in early September. Purple red. Flesh is dark red. Tree is a free bearer, but should be planted in a situation which may be slightly protected by buildings or a windbreak.

SHIPPER'S PRIDE

A large, showy plum, frequently reaching a diameter of two inches. It is a dark purple in color, of the Damson type. The flesh is sweet and firm. Good shipper. September.

YELLOW EGG

A beautiful yellow, egg-shaped plum of the largest size; the flesh is yellow, and is somewhat coarse; always clings to the stone. This is an excellent variety for canning and always brings a good price on the market. The tree is a prolific bearer and a good grower. Late August.

PRICES OF GOOD PLUM TREES

	Each	10	25
2 year old, 3 to 4 feet	\$0.40	\$3.50	\$ 8.00
2 year old, 4 to 5 feet	.60	5.50	12.50
2 year old, 5 to 7 feet	.80	7.50	17.50

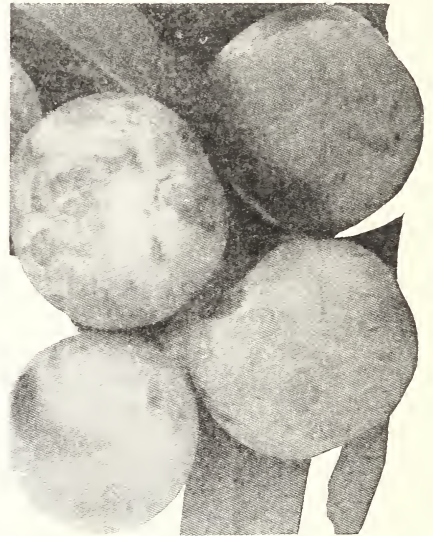

Plant Spring or Fall, 16 to 20 Feet Apart.

BURBANK

Successful almost anywhere. The fruit is of very large size, the color cherry red, mottled. The flesh is yellow, sweet and firm. It is fine for keeping and shipping. The tree is a vigorous grower, but so straggling that it requires sharp pruning. It ripens in August.

GERMAN PRUNE

One of the oldest varieties. The tree is vigorous in growth and productive. Large, purple fruit that is firm, sweet, and delicious. A freestone. September.

Moore's Arctic Plum

QUINCES LIST OF VARIETIES

CHAMPION—A strong, rugged exceedingly productive tree which begins to bear when two years old. The fruit is large, oval, of a rich color and excellent quality. It ripens late and keeps well until January.

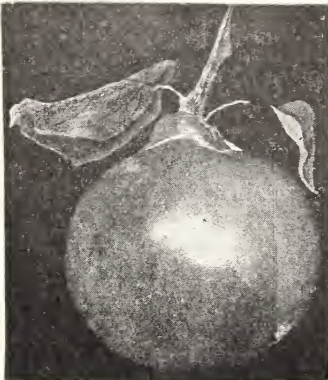

APPLE, or ORANGE—Large, round, bright golden yellow; cooks quite tender, and has an excellent flavor. Valuable for preserving and for market. An abundant bearer. One of the finest late varieties.

PRICE OF QUINCE TREES

	Each	10	25
3 to 4 feet	\$0.85	\$8.00	\$19.50
4 to 5 feet	1.00	9.50	22.50

MULBERRIES

On account of the beautiful, heavy foliage and compact growth of the mulberries, they are frequently classed as ornamental trees. They are very hardy and long lived, in fact one specimen of which we know is more than three hundred years old. Throughout the Western States they are frequently planted for windbreaks and hedges, and are valuable for posts and because the fruit attracts many birds, they can be planted as a protection to orchards. 3 to 4 ft., 75c each; 3 for \$1.95.

Orange Quince

GRAPES

THE FRUIT IN GREATEST DEMAND

One of the most satisfactory crops that can be grown, because it can be depended upon practically every year, and can be grown almost anywhere, but to produce the finest specimens they should be cultivated and pruned.

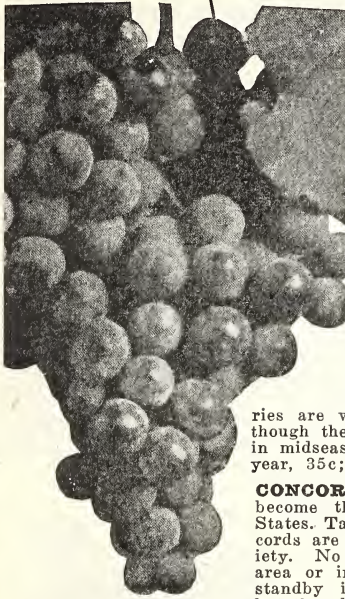

AGAWAM

Deep red or maroon. The large meaty berries which are borne in extra large, loose-shouldered bunches, are juicy and of a delightful aromatic flavor. Ripens about with Concord or a trifle later. Vine a strong healthy grower. 1 year, each, 25c; doz., \$2.50; 2 years, each, 30c; dozen, \$3.25.

BRIGHTON

Until the introduction of Caco, this was regarded as the highest in quality of all hardy grapes. The berries are wine red, like Caco, but not so large, though the bunch, if anything, is larger. Ripens in midseason. 1 year, each, 30c; dozen, \$3.25; 2 year, 35c; dozen, \$3.75.

CONCORD—From sheer merit the Concord has become the most popular grape in the United States. Taking the country as a whole, more Concord are now in bearing than of any other variety. No other grape succeeds over such a wide area or in so many different soils. It is the standby in grapes. New varieties may come, but they have to work hard to reach the Concord standard for market purposes. Matures early, but they have to work hard to reach the Concord standard for market purposes. Matures early, but they have to work hard to reach the Concord standard for market purposes.

Worden

keeps well, ships well and sells well. Bunches big, berries are juicy, sweet and delicious. Concord overcomes local grape troubles and is safe to plant. Price, 1 year, each, 20c; dozen, \$2.25; 100 for \$10.00; 2 year, each 25c; dozen, \$2.75.

CATAWBA—If you asked some of the big Grape growers "Which is the best red variety?" the answer would be "Catawba." There would be good reasons for the answer, too. It is last to ripen; the bunch and berries are large; the flesh is juicy, pulpy, and possesses a delightful sugary flavor. Price, 1 year, each, 25c; dozen, \$2.75; 2 year, each, 30c; dozen \$3.25.

CAMPBELL (Campbell's Early)—Bunch large and compact; berries large, somewhat elliptical in shape; flesh pulpy, tender, yet firm enough to keep and ship well; flavor sugary and aromatic. An excellent table Grape; splendid for jelly and catsup. Price, 1 year old, each, 30c; dozen, \$3.25; 2 year old, each, 35c; dozen, \$3.75.

DELAWARE—An old time red variety. Bunch and berry small, refined, high quality. Prolific but a rather weak grower and somewhat subject to mildew. 1 year, each, 25c, dozen, \$2.75; 2 years, each, 30c; dozen, \$3.25.

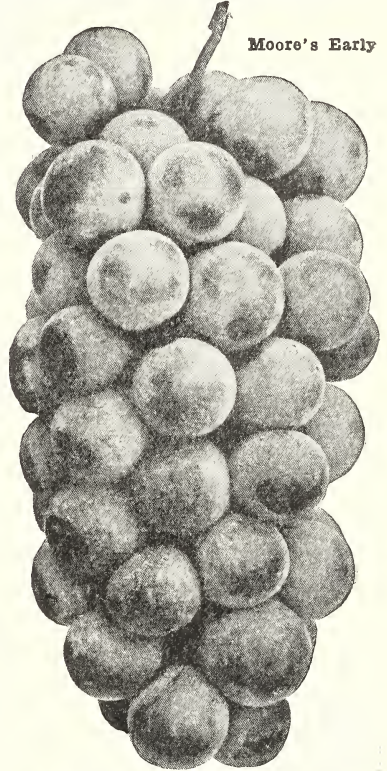

MOORE'S EARLY—The most reliable very early variety and is proving immensely profitable to commercial growers. Medium bunch, berry large, jet black with purple bloom, ripens fully two weeks earlier than Concord. 1 year, each, 20c; dozen, \$2.25; 2 years, each, 25c; dozen, \$2.75.

NIAGARA—The standard white Grape. Both bunch and berries are large to very large, handsome, and well formed. The flesh is firm, juicy, without much pulp; flavor is of the very best, and does not resemble any other sort. The vine is hardy, vigorous, and extremely productive. Frankly speaking, it is hard to describe Niagara, so numerous are its points of superiority. The best way is to try some yourself. Plant the vines anywhere. Do it this year. Price, 1 year, each, 20c, dozen, \$2.25; 2 years, each 25c; dozen, \$2.75.

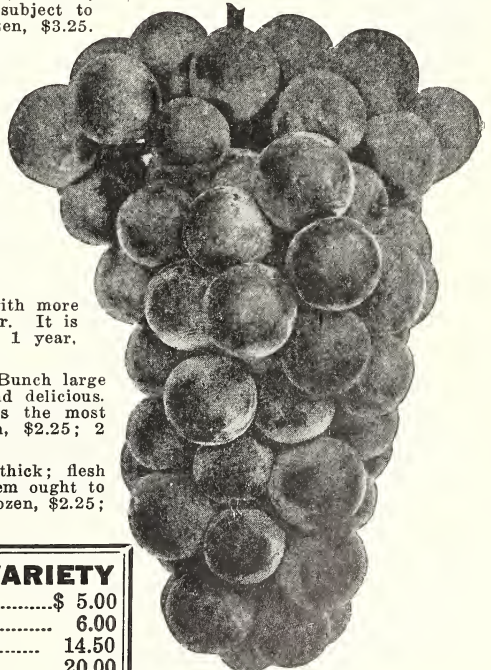

WORDEN—A black grape that resembles Concord closely but with more tender pulp, higher quality, and ripens a week to ten days earlier. It is also a little larger in both bunch and berry than the Concord. 1 year, each, 20c; dozen, \$2.25; 2 years, each, 25c; dozen, \$2.75.

POCKLINGTON—A very handsome Grape of extra large size. Bunch large and compact; flesh juicy with considerable pulp; flavor sugary, and delicious. Vines are extremely healthy and hardy. Pocklington is perhaps the most beautiful Grape in cultivation. Price, 1 year, each, 20c; dozen, \$2.25; 2 years, each, 25c; dozen, \$2.75.

SALEM—Bunch large and heavy; berries round and an inch thick; flesh tender; flavor sweet, aromatic. For table it is hard to beat. Salem ought to be in every garden and small vineyard. Price, 1 year, each, 20c; dozen, \$2.25; 2 years, each, 25c; dozen, \$2.75.

STRAW- BERRIES

Strawberries are so well known and generally grown that it is hardly necessary to give much space to descriptions. If interested in knowing about the culture of strawberries, we will be pleased to send our booklet, "What, Where, When and How to Plant," which tells about preparing bed, cultivation, etc. We will only give here a few notes of general importance.

Ground must be well drained. Ground must be well prepared. Plant in spring—always the best time. Generous supply of well-rotted manure is a great benefit. Protect plants when received from nursery; never allow roots to be exposed to the sun or wind. Plant in rows four feet apart and eighteen to twenty-four inches apart in row. Crown of plant should never be below surface of ground.

NOTE—All varieties marked Imp. should be planted with other varieties marked Per. to fertilize the blossoms. Good crops of those marked Per. can be grown when planted alone.

LIST OF VARIETIES

AROMA (Per.)—One of the finest for long-distance shipping. The large berries are bright red to the center. Of conical shape, with prominent yellow seeds that help to make them very attractive on the market. The quality is such that it is a leader with many growers.

BRANDYWINE (Per.)—A well-known variety that has proven very successful wherever planted. Produces immense quantities of large, very fine deep red berries that have a delightful flavor. The bright yellow seeds make a fine color contrast with the beautiful red fruit. This is one variety that has been a favorite in most all of the states east of the Rocky Mountains and also on the Pacific coast. The foliage of this variety is very large; the fruit stems

strong and erect, holding the large berries well off the ground. We can freely recommend this as being one of the very best berries.

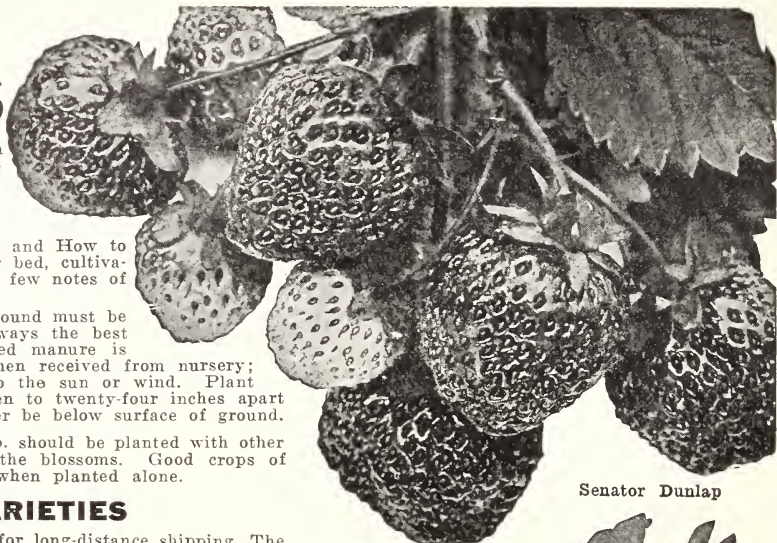

BUBACH (Imp.)—This variety has never failed to win a reputation wherever planted. It is famous for its beautifully colored, large berries and mammoth crops. It is a leader among the money makers, an old, well tested variety that has never failed.

GANDY (Per.)—Another old favorite. Its popularity, instead of decreasing, is steadily increasing. The fruit is dark red with dark red seeds. A very late berry that does best on a heavy clay soil. Considered one of the best shippers ever known and has done well wherever tried.

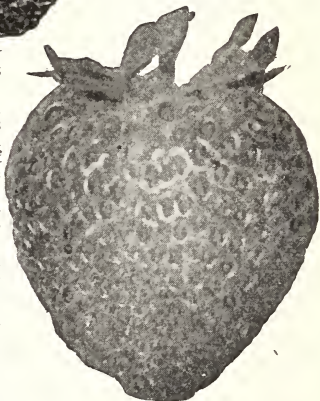

HAVERLAND (Imp.)—On account of the hardiness, wonderful productiveness of the plants, and the general appearance, good shipping qualities, and excellent flavor, this berry continues to grow in popularity. It has always proven to be one of the best varieties planted, and thrives best with the Senator Dunlap as fertilizer.

UNCLE JIM (Per.)—Is a strong grower that bears large fruit of a rich color. One of the best for canning; a good market variety and a good shipper. Heavy producer. Every strawberry patch should contain some of this variety.

SENATOR DUNLAP (Per.)—The demand for this variety has been increasing steadily, as it has an unusually long fruiting season. It bears immense quantities of large, handsome, rich, fine-flavored, dark red berries, which are uniform in size and shape and very attractive in appearance. The demand for this variety among fruit growers shows that it is coming to the front as one of the best.

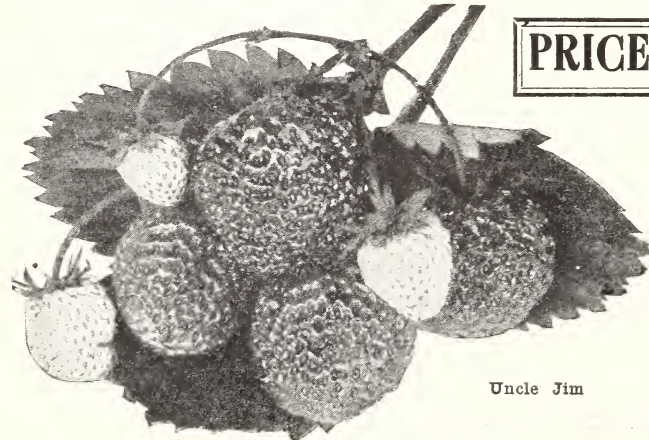

Senator Dunlap

Aroma

Brandywine

Uncle Jim

PRICES: Sold Only in bunches of 25 or Over. Price per 100, \$1.50; Per 500, \$6.00; 1,000, \$8.50. Plant 1 to 1 3/4 feet in rows 4 feet wide.

EVERBEARING SORTS

PROGRESSIVE—The first successful Everbearing variety to be introduced and is grown more extensively than any other Everbearing variety. It is a sure cropper from spring until snow flies. The plants are large, long rooted, and great drought resisters. The foliage is spreading, healthy, and vigorous. The berries are medium large, uniformly conical in shape, and a beautiful dark red clear to the center. 25 plants for \$1.00; \$3.00 per 100.

CHAMPION—A new Everbearing variety which very closely resembles Progressive. In manner of growth it is identical with the Progressive except that the fruit stems are more erect and less hidden by the foliage. It also makes more runners than the Progressive. 25 plants for \$1.00; \$3.00 per 100.

MASTODON STRAWBERRIES

A WONDERFUL NEW EVER BEARING STRAWBERRY

(The following article appeared in the Farm and Garden section of the Chicago Tribune, Sept. 23, '26)

Mastodon, the great strawberry found in Indiana a few years ago, has stood the test in practically every section of the United States this season. It is now widely distributed and favorable reports come from experiment stations in various states where the berry has been tried.

In some places it is said this giant of the berry family produces three or four times as much fruit in a season as any four other varieties combined.

In a patch on B. W. and B. H. Keith's farm near Sawyer, Mich., a few weeks ago I counted from 30 to 89 strawberries to the plant. The Keith brothers, who have done perhaps more than anyone else to develop this new berry, say it is not uncommon to find a plant with 100 berries on it. One fruiting stem in the Keith patch had 24 berries in various stages from blossoms to ripe berries. Many plants this summer have produced from a pint to a quart of berries. It only takes a few of them to fill a quart cup or box, and they are highly flavored down to the center of the berry.

Mastodon is an everbearer, resulting from a cross between the Superba and a late ripening spring variety.

Berries of the Mastodon family, measuring 5 inches in circumference, were produced this year in the Keith patch. Nine of them covered the top of a quart size berry box and eighteen of them filled the box from side to side and bottom to brim. Three of the berries weighed two ounces and five placed end to end measured eight inches.

It is this large size and the great productiveness that makes the Mastodon stand out away ahead of other everbearers, growers say. Mastodon is a showy berry on the market stand, being red in color, and stands in the front row so far as flavor is concerned.

The Keith farm, near Sawyer, Mich., started with 3,000 plants and today the patch covers about six acres on moist, sandy loam soil. Up to October 20, more than 600 16-quart cases or 10,000 quarts of strawberries had been picked from the patch this season. Growers claim it is the most productive and profitable everbearing strawberry.

From plants set last April, ripe berries were picked on July 11, within 90 days after the plants were put in the ground. From the spring set plants berries were picked every three to five days, yielding by the first of August about 160 quarts per acre every five days, and at that time they sold at 30 cents a quart. Despite dry weather in early fall, 36 cases an acre were picked at one picking during the first week in September. These late picked berries sold at \$6 a 16-quart case, netting \$5.30 a case to the grower. Cold, cloudy weather brought the pickings down to 5 cases to the acre during the first week in October.

The Mastodon bears like the regular spring varieties and then comes out with another crop in the summer and fall. Light frosts do not hurt Mastodons. One year old plants springing up in the patch can be used to start a new bed. About 10,000 plants will be needed to each acre.

ASPARAGUS PLANTS

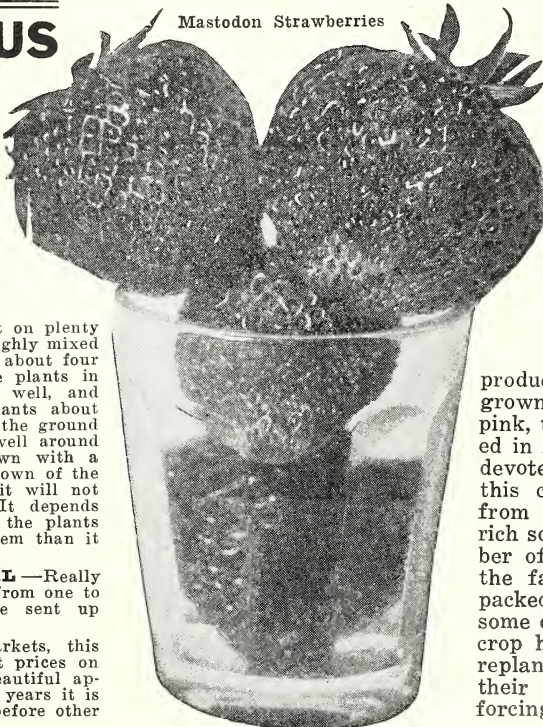

Price, \$1.00 per 25;
\$3.00 per 100;
\$12.50 per 1,000.
(For Asparagus Seed,
See Page 51.)

It is not necessary to tell the good qualities of the asparagus, as it is known to everybody. May be either planted in fall or spring. Dig up the ground deep, put on plenty of well-rotted manure, thoroughly mixed in the soil, throw out a bed about four to five inches deep, lay the plants in by spreading the roots out well, and scatter the dirt over the plants about four inches, or the depth of the ground thrown out, press the dirt well around the plant by patting it down with a spade or shovel. Keep the crown of the asparagus cut regularly so it will not get too large and woody. It depends much on the care taken of the plants and the plant food given them than it does the variety planted.

CONOVER'S COLOSSAL—Really colossal. Deep green shoots from one to two inches in diameter are sent up thickly from the crowns.

PALMETTO—In large markets, this asparagus brings the highest prices on account of the size, and beautiful appearance of its stalks. Some years it is on the market several days before other varieties

Mastodon Strawberries

PRICES ON MASTODON STRAWBERRIES

25 for	\$ 2.00
50 for	3.50
100 for	6.00
500 for	20.00
1000 for	37.50

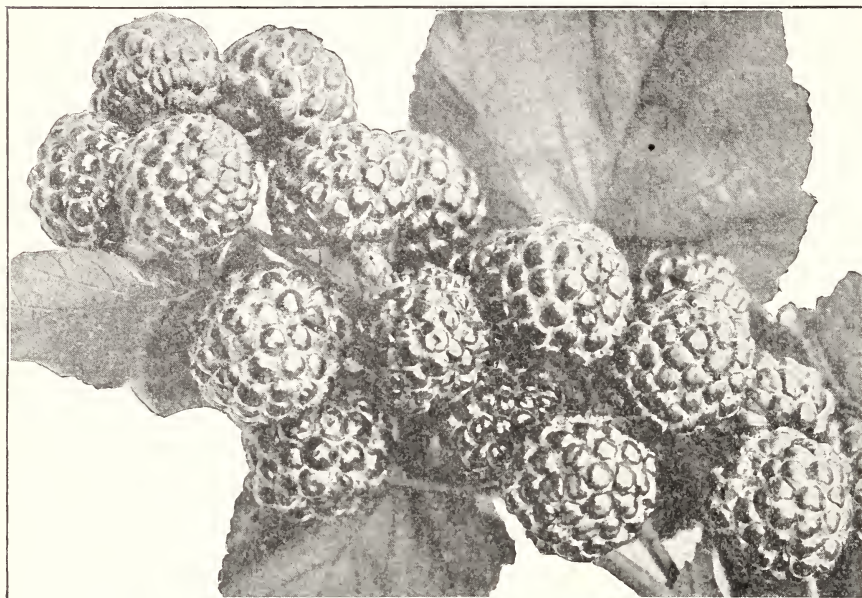

RHUBARB

Plants 15c each; \$1.00 per 10; \$7.50 per 100.

LINNAEUS—Leaf-stalks long, large, tender, juicy, produced quite early. Cellar-grown rhubarb with beautifully pink, tender stalks may be enjoyed in March by any one who will devote a little time to it. For this crop the plants are grown from spring until fall in very rich soil so as to establish a number of crowns on each root. In the fall a number of roots are packed together with rich soil in some cool, dark cellar. After the crop has been cut, the roots are replanted in the garden to regain their vigor for the next year's forcing.

SELECT RASPBERRIES

Cardinal Raspberries are heavy bearers

KANSAS—Plants are strong, vigorous grower, will stand extremes of drought and cold weather and still bear large crops. These will grow with less care than any others of the "tip" varieties.

GROWN FROM ROOTS (CALLED SUCKER PLANTS)

CUTHBERT—Considered the queen of the market, as they bring a higher price on the market than any other of the red raspberries. The fruit is large, dark, crimson, firm sweet rich, highly flavored and as beautiful as strawberries. This is one of the hardiest of the red raspberries and endures the extreme northern climates or the southern summers with equal vigor and productiveness.

MILLER'S RED—A very healthy grower that bears a good quality of bright red berries throughout the entire raspberry season. In fact during some seasons, they bear fruit as late as August. An excellent shipper.

ST. REGIS—This new raspberry of recent introduction stands in a class alone. It will produce fruit from June until the berries freeze in the fall or early winter. The fruit begins to ripen very early and continues on the

new canes throughout the remainder of the summer and fall months. Berries are a bright crimson, good size, rich, sugary, with excellent raspberry flavor. Flesh firm and meaty, a good shipper. Canes stocky, of strong growth, with an abundance of dark green leathery foliage. St. Regis is a heavy bearer and has proven one of the most profitable of the red varieties, also a producer of fruit during the summer and fall. 10c each; 75c per 12; \$4.00 per 100.

RASPBERRY PRICES

\$1.25 for 25; \$3.00 for 100;
\$12.00 for 500.

GROWN FROM TIPS

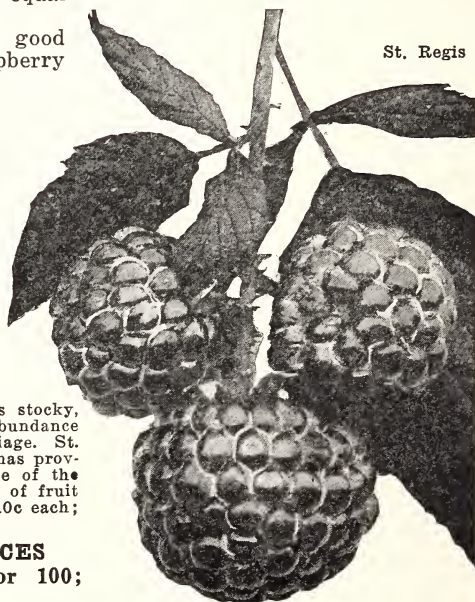

CARDINAL — One of the most vigorous growers and one of the hardiest of all the raspberries. In fact, it is considered one of the very best purple berries. The best proof of this is that nearly all growers discard the other purple varieties after the Cardinals are once established. They produce a fine quality of dark red or almost purple berries through a long season. Of very fine quality for family use.

CUMBERLAND — The fruit of this variety is largest of all the black caps;

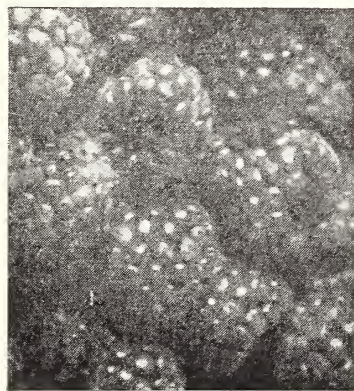

firm, a good shipper, and one of the most profitable as a market berry. Very choice black cap.

GREGG—Known for many years by more people than is any other raspberry on the market. Large, showy, black, firm, and will ship well. Hardy and vigorous grower. Ripens about mid-season.

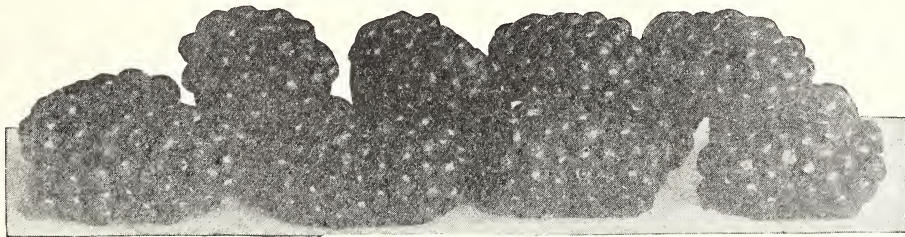

HAYMAKER—Very large, firm berry, good shipper, and one of the best for home use. A lighter red than the Cardinal. Plants are very hardy and a good crop may be depended upon each year.

St. Regis

Cuthbert

Blower

CHOICE SELECT BLACKBERRIES

The Blackberry thrives well in almost any soil but to reach perfection demands a strong loam tending towards clay, rather than sand.

In many parts of the country, winter protection is a necessity, and often adds greatly to the yield where not considered really essential. The blackberry, as a rule, outyields all other members of this family and is usually one of the most profitable to grow when properly managed, providing the climate conditions are favorable. Planting is best done in the spring. If however, plants are set in the fall, each plant should be covered with a mulch of earth or straw manure, which should be removed in the spring. The pruning of the blackberry is not a difficult task, yet success depends upon the proper method. The old canes should be removed yearly; it is preferable in the summer after they have borne their crop of fruit. Cultivation should be frequent but shallow, as deep cultivation disturbs the roots and induces them to sucker. Pinch back canes when three or four feet high. It is best not to allow more than three or four canes to a hill.

Blackberries should be planted about four feet apart in rows seven feet apart. It will take about 1450 plants to the acre when planted this way. Those offered below are all tested varieties.

AGAWAM

Fruit medium size, jet black, sweet and tender to the core; a valuable variety for home use, being sweet as soon as black.

BLOWER

Originated in the celebrated small fruit belt of Chautauqua Co., N. Y. where it has been thoroughly tested for several seasons. Claimed to be the hardest, most productive, finest quality, and to bring on the market the highest price of all blackberries. Has produced 2694 berries on one bush, 2720 quarts on one-third acre. Large size, jet black, good shipping properties, best quality, and unexcelled productiveness are main features of this splendid new sort.

EARLY HARVEST

Best easily grown blackberry in cultivation. Fruit firm, of good quality; excellent shipper, good market variety. Needs some protection in winter.

ELDORADO

This is a comparatively new variety, and has proven itself to be the best of all blackberries under cultivation. After once fruiting, Eldorado berry growers discard almost all other varieties which they have. It is very hardy, claimed to have no equal in this respect. Fruit very large, jet black, good shipper, good quality, and a great producer. We personally recommend this variety above any other that is offered.

SNYDER

Very hardy, great producer, medium size and one of the best known varieties of blackberries, succeeding wherever planted. Over-production is its greatest fault.

TAYLOR

Berries of fine flavor, larger than Snyder, canes of vigorous growth, iron-clad hardiness, and wonderfully prolific. Ripens late.

PRICE OF BLACKBERRIES

All Blackberries—10 Plants, 50c; 100, \$4.25; 500, \$20.00. Plant Spring or Fall, 5 to 7 feet apart.

DELICIOUS DEWBERRIES

The Dewberry is a trailing or vine form of the Blackberry. May be trained to cover stone piles, over rough embankments or rocky hillsides, and sometimes produce a very large crop of fruit annually over land where no other crop could be grown. The fruit is very large and always at a premium with the commission men or the open market. If they are planted where they can be cultivated, they should be plowed, and in the winter a coarse litter of mulch thrown over them. The vines will grow up through this and keep the fruit from the ground. We are only offering one variety which is considered the best of all Dewberries now in cultivation.

LUCRETIA DEWBERRIES

Fruit of high quality and very large, often one or two inches long and one inch in diameter. Perfectly hardy and a great bearer. 10 plants for 50c; 100 plants for \$3.00; 500 for \$12.00.

Eldorado

VEGETABLE SEED DEPARTMENT

We are offering to our customers this year choice new crops of vegetable and flower seeds. These seeds have been selected because they are the best of their type or kind, and are backed by our reputation gained in over 70 years of honorable business dealings. On their quality and on the success they bring to you depends our entire future business. We want you to have every confidence in our seeds, and to know that they are the best seeds that can be grown.

Remember that regardless of price, good seeds are cheapest in the long run.

Guerande

BEETS

CROSBY'S EGYPTIAN (40 days)—Can be used either for forcing or outside planting. One of the most popular varieties with gardeners because of its fine shape and beautiful dark red, almost black color. This variety matures before any other. Packet, 5 cents; 1 ounce, 15c; $\frac{1}{4}$ lb., 50c, postpaid.

DETROIT DARK RED (50 days)—An ideal beet for home use. Is a heavy yielder and fine keeper. Has few side roots, grows to uniform size. Is ideal for pickling. Price: Packet, 10 cents; 1 ounce, 15c; $\frac{1}{4}$ lb., 45c, postpaid.

EARLY BLOOD (45 days)—A globe-shaped beet, fine for early spring crop, flesh tender, rich and crisp. This variety has coarse tops and is one of the best. Packet, 5 cents; 1 ounce, 15 cents; $\frac{1}{4}$ lb., 50 cents, postpaid.

GREEN POD AND WAX BEANS

BURPEE'S SHIMLIMA (65 days)—This is the earliest of the bush Limas. It is a tremendous yielder grows only 18 inches high. Excellent quality. Big packet, 10c; $\frac{1}{2}$ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25, postpaid.

BURPEE'S STRINGLESS GREEN POD—This is the best stringless green pod variety in existence. It is well flavored, a great yielder, and has a long bearing season. Big packet, 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 5 lbs., \$1.85, postpaid.

BOUNTIFUL—One of the best all-around bush beans in cultivation. Very hardy. The flat green pods are strictly stringless. They produce very early in the season and continue to bear for a long time. Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 45c; 5 lb., \$1.80.

FORDHOOK BUSH LIMA—This new dwarf form of the Potato Lima grows stiffly erect bearing the pods well above the ground. The pods measure 4 to 5 inches and are juicy and sweet in flavor when cooked. Pkt., 15c; $\frac{1}{2}$ lb., 30c; 1 lb., 55c.

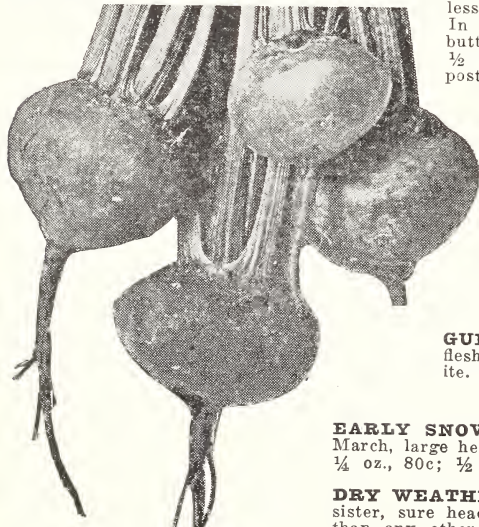

GIANT STRINGLESS—The plants are of strong growth with compact bushes and bear a fine crop of pods. The pods are nearly round and in color a light green. Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 45c; 5 lb., \$1.80.

KING OF THE GARDEN—Best of the Lima pole varieties. A strong grower and large podded. The pods contain 4 to 5 large beans of excellent quality easily shelled. Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 45c.

PENCIL POD BLACK WAX—A very fine wax bean of true bush growth, bearing an enormous crop of pods, the beans measure 6 to 7 inches in length. Early maturing of a bright golden yellow color. Pkt. 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 5 lb., \$1.60.

OLD HOMESTEAD OR KENTUCKY WONDER (65 days)—An excellent green podded bean of the pole or running variety. It is an enormous producer, the long pods hanging in great clusters along the entire vine. Seed dark brown. Price: Big packet, 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 5 lb., \$1.85 postpaid.

IMPROVED GOLDEN WAX (40 days)—One of the earliest wax beans. It is stringless, thick and pods are of good length. In color it is clear, waxy, golden, fine buttery flavor. Price: Big packet, 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 5 lbs., \$1.85, postpaid.

Detroit Dark Red Beet

Improved Golden Wax

CARROTS

CHANTENAY (60 days)—Best for table use or market gardener's trade. Rich orange color; flesh crisp, tender and of an extra delicious flavor. Packet, 5c; 1 oz., 20c; $\frac{1}{4}$ lb., 60c, postpaid.

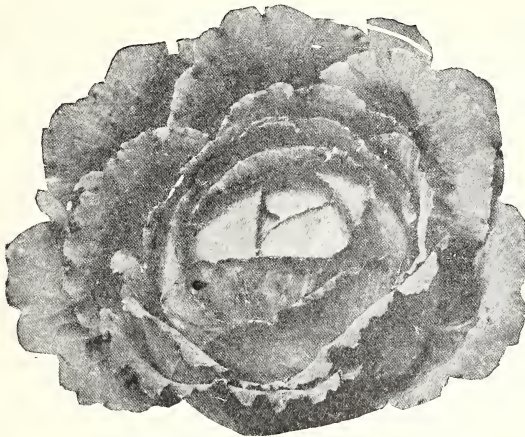

DANVERS HALF LONG—An excellent table carrot of uniform size, about 6 inches long. The flesh is a rich orange color throughout. Pkt., 10c; Oz., 20c.

GUERANDE OR OX HEART (75 days)—Short, chunky variety; flesh is a bright orange color, fine grained and of good flavor, a favorite. Packet, 5c; 1 oz., 15c; $\frac{1}{2}$ lb., 55c, postpaid.

CAULIFLOWER

EARLY SNOWBALL (90 days)—Earliest, sure to head; if seed is sown in March, large heads produced early in June. Good variety for forcing. Pkt., 10c; $\frac{1}{4}$ oz., 80c; $\frac{1}{2}$ oz., \$1.50, postpaid.

DRY WEATHER OR DANISH GIANT (100 days)—Late variety drought resister, sure heads best for pickling. This variety withstands dry weather better than any other sort; heads large, very solid, snow-white, and of the most delicate flavor. Pkt., 10c; $\frac{1}{4}$ oz., 80c; $\frac{3}{4}$ oz., \$1.50, postpaid.

Hollander Cabbage

IF YOU CAN NOT FIND WHAT YOU
WANT IN OUR CATALOG. WRITE

CABBAGE

HOLLANDER OR BALLHEAD (120 days)—The heads are of medium size and very solid, they average in weight nearly 8 pounds. They are just as solid in the spring as when put away in the fall. Pkt., 5c; 1 oz., 35c; ¼ lb., 95c, postpaid.

EARLY JERSEY WAKEFIELD (75 days)—This is the earliest and hardest heading of the early varieties and should be depended upon for the first crop. Our seed is selected, choice stock. Pkt., 5c; 1 oz., 30c; ¼ lb., 85c, postpaid.

PREMIUM LATE FLAT DUTCH (110 days)—This is considered to be the best of the late standard varieties. It is a sure header, good keeper, very flat and solid. Pkt., 5c; 1 oz., 35c; ¼ lb., 85c, postpaid.

CELERY

WHITE PLUME (120 days)—One of the earliest and quickest growing varieties and the most crisp of all. It has white feather-like plumage making it a great table ornament. Price: Packet, 5c; ½ oz., 40c; 1 oz., 75c, postpaid.

GOLDEN SELF-BLANCHING (110 days)—This is finest quality seed and as its name implies it is entirely self blanching. The stocks are a rich golden color, stringless and of the finest flavor. Good seed of this variety costs more to grow than ordinary seed and is worth the money. Price: Packet, 10c; ½ oz., 60c; 1 oz., \$1.00, postpaid.

SWEET CORN

GOLDEN BANTAM (60 days)—This variety for the last twenty years has been considered the standard variety of all sweet corn in cultivation. It succeeds well anywhere in the United States, the flavor is exceptionally sweet and pleasing, the ears are eight rowed, six to seven inches long and the sweetest of all corn. Big packet, 10c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.50, postpaid.

STOWELL'S EVERGREEN (80 days)—This is an old popular variety, hardy, productive, tender and sugary. It is especially adapted to home use because of its remaining a long time in suitable eatable condition. Big packet, 10c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.50, postpaid.

COUNTRY GENTLEMAN (70 days)—This is sometimes known as shoe-peg from the small peg-like kernels, irregularly placed on the cob. Medium sized ear, with small cob, giving great depth to the kernels. The quality of this variety is fine and is preferred by some to all others. Big packet, 10c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.50, ppd.

CUCUMBER

CUCUMBER IMPROVED LONG GREEN—One of the long varieties used for slicing. Its dark color makes it desirable for marketing. This variety is a very strong grower, when maturing will measure 12 inches in length. Pkt., 10c; oz., 25c; ¼ lb., 50c.

CHICAGO PICKLER (68 days)—This is the best known pickling variety and is generally used by all big pickling factories. It can be relied upon to produce a big crop. Pkt., 5c; 1 oz., 15c; ¼ lb., 40c, postpaid.

IMPROVED WHITE SPINE (55 days)—This variety is rich green in color and very productive. It is a continuous bearer and possibly the best for general use. Pkt., 5c; 1 oz., 15c; ½ lb., 45c, postpaid.

EARLY FORTUNE (52 days)—This is probably the best and finest cucumber introduced. The fruit when matured averages eight inches in length and retain their color for a remarkable length of time. The seed cavities are very small and the vines very generous and disease resisting. It bears equally as good as the pickling varieties and as enormous yielder. Pkt., 5c; 1 oz., 20c; ½ lb., 60c, postpaid.

ENDIVE

LARGE GREEN CURLED (40 days) Endive is very useful as a salad late in the year. Leaves are also eaten boiled and are very good. Plant them out when six inches high in shallow trenches. Try them this year. Price: Packet, 5c; 1 oz., 15c, postpaid.

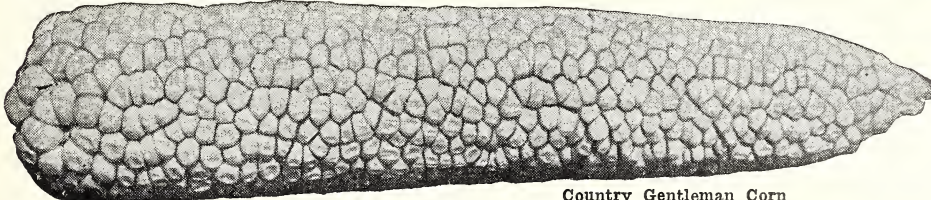

KOHL RABI

EARLY WHITE VIENNA (50 days)—A useful cousin of the cabbage, in flavor it is very much like a turnip and is in satisfactory table condition during July and August when it is impossible to grow turnips. Use them young. Packet, 5c; 1 oz., 30c; ¼ lb., \$1.00, postpaid.

LETTUCE

BLACK SEEDED SIMPSON (40 days)—The best known and perhaps the most used of any other variety of leaf lettuce. It is very early and hardy with thick curly and very tender leaves. Stands the summer heat well. Pkt., 5c; 1 oz., 15c; ¼ lb., \$1.00, postpaid.

GRAND RAPIDS (38 days)—One of the best forcing varieties, but will do equally well outdoors. Similar to the Black Seeded Simpson only the leaves are more crimp and curled. Price, Pkt., 5c; 1 oz., 15c; ¼ lb., 90c, postpaid.

BIG BOSTON (45 days)—The most popular variety of head lettuce both North and South. Heads are large and compact, light green with slightly ruffled edges. Pkt., 10c; 1 oz., 20c; ¼ lb., \$1.20, postpaid.

PRIZE HEAD (50 days)—Color bright green, is tinged with brownish red. It is of superb flavor, tender and hardy. Pkt., 5c; 1 oz., 15c; ¼ lb., 90c, postpaid.

ONIONS

SOUTHPORT WHITE GLOBE (120 days)—This variety gets the highest market price. They are good shaped with clear white skin. Should be dried in the shade. Price, Big Pkt., 5c; 1 oz., 20c; ¼ lb., 85c; postpaid.

DANVERS YELLOW GLOBE (100 days)—A well known and standard variety, heavy cropper and excellent keeper. Will ripen early and very firm and solid. Big Pkt., 5c; 1 oz., 20c; ¼ lb., 85c, postpaid.

PRIZETAKER (100 days)—The largest but also latest maturing. A yellow, American onion, globular in shape with light yellow color. If they are planted in hot beds in early spring and replanted outdoors, onions weighing 4 to 5 lbs., are not uncommon. Big pkt., 5c; 1 oz., 20c; ¼ lb., 85c, postpaid.

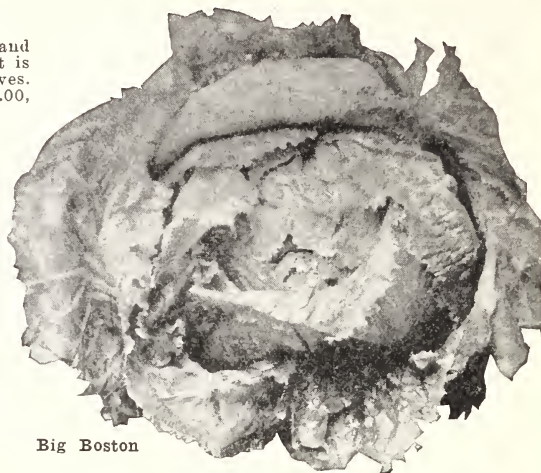

PARSLEY

DWARF MOSS CURLED (65 days)—A compact growing and beautifully curled variety, to be used for either outdoors or greenhouse culture. Pkt., 5c; 1 oz., 15c; ¼ lb., 60c, postpaid.

EGG PLANT

BLACK BEAUTY—This is a very handsome early and prolific variety. The fruits mature very early and is the best variety for northern and southern states, very beautiful. Pkt., 10c; oz., 45c; ¼ lb., \$1.25.

NEW YORK IMPROVED PURPLE (125 days)—The fruit of this variety is remarkably large often weighing from 5 to 6 lbs. The skin is deep purple and is adapted to many soils and conditions. Pkt., 5c; ½ oz., 40c; 1 oz., 70c, postpaid.

Big Boston

PEPPERS

MAMMOTH RUBY KING (130 days)—The blocky almost scarlet fruits average 4½ inches in length and the flesh is thick and sweet. Pkt., 5c; ½ oz., 35c, postpaid.

CHINESE GIANT (130 days)—The largest of all the peppers and early. Grows from four to five inches across at the base and equally as long, divided into four large sections. Fruits are of a thick, chunky form, very thick and meaty. Fine for stuffing and makes excellent salads. Price, Pkt., 5c; ½ oz., 35c, postpaid.

Ruby King

WATERMELONS

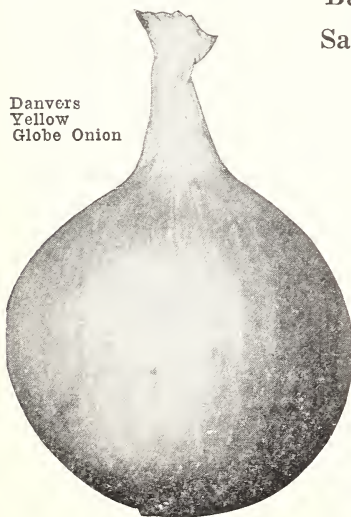

HALBERT HONEY—A medium early melon and can be successfully raised in the northern states. The rind is very thin and the meat is of deep red and very sweet and juicy, one of the best for home use. Pkt., 5c; oz., 10c; ¼ lb., 25c.

KLECKLEY'S SWEET (70 days)—Skin is rich dark green and the flesh is a bright scarlet and ripens very close to the rind. Price, Pkt., 5c; 1 oz., 15c; ¼ lb., 45c, postpaid.

COLE'S EARLY (60 days)—A choice melon for the home garden. The flesh is bright red, crisp, sweet and of fine flavor, of medium size, but solid, with thin rind. Pkt., 5c; 1 oz., 15c; ¼ lb., 50c, postpaid.

SQUASH

HUBBARD (65 days)—This is a favorite because of its many good qualities. It keeps well, bakes or boils dry and is very sweet and richly flavored. An excellent market variety for which there is always a ready sale. Price, Pkt., 5c; 1 oz., 15c; ¼ lb., 65c, postpaid.

STIM-U-PLANT

PLANT STIMULANT TABLET

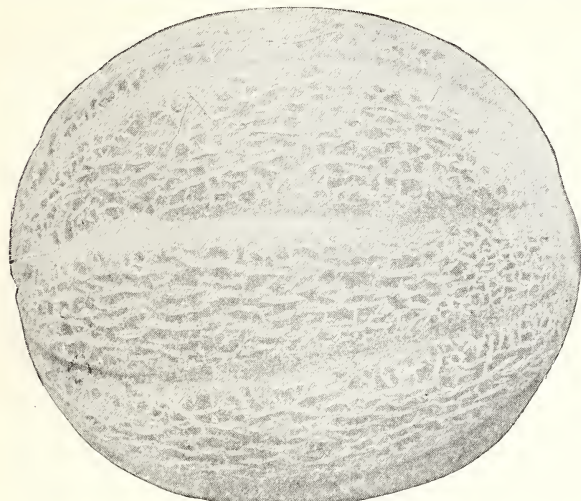

These Tablets are the Last Word in Modern Gardening Efficiency.

All growing plants must be fed if you expect them to produce results, and they respond in a remarkable way to proper feeding. Everything you grow depends on fertilization. STIM-U-PLANT will make flowering plants bloom freely and hold their blossoms longer; foliage plants quickly put on new growth; vegetable crops, berry bushes, fruit and other trees increase production, so it pays for itself many times over in a season.

Easy to Use—Immediate Results—Directions with Every Package.

This wonderful fertilizer and plant food is odorless—has no obnoxious, messy characteristics. To use, simply insert a tablet in soil near each plant; or dissolve in water at the rate of four tablets per gallon and use as liquid manure. For plants in drills, put tablets a foot apart along row; in beds, a foot apart each way. Complete, easy directions with every package. Tablets dissolve readily, insuring that the richest kind of plant food goes at once to the plant feeder; roots exactly where and when food is needed.

Prices, postpaid: Small size, 25 cents; 100 tablets, 75 cents; 1,000 tablets, in bucket, \$3.50.

Osage Muskmelon

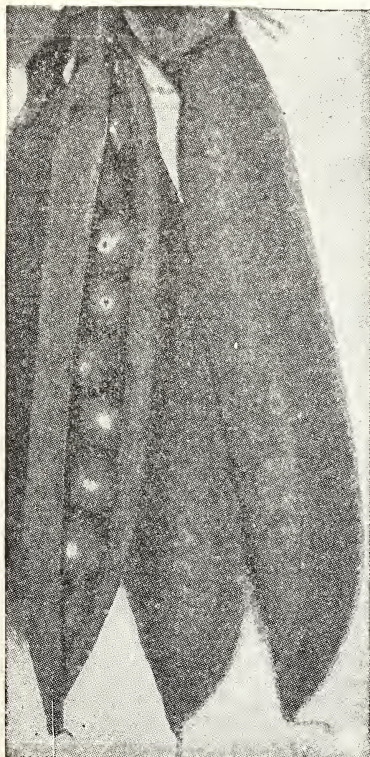

SALSIFY OR VEGETABLE OYSTER

SANDWICH ISLAND (95 days)—This is often called the oyster plant and is one of the most delicious and nutritious of vegetables as it produces a distinct oyster flavor when cooked. They look something like parsnips and the roots are hardy and can remain outside all winter. Try some of these this year. Price: Packet, 5c; 1 oz., 35c, postpaid.

PUMPKINS

SUGAR OR PIE (65 days)—This is a handsome and very prolific variety, deep orange yellow, good keeper, sweet in taste and as its name implies is excellent for pies. Price: Packet, 5c; 1 oz., 15c; ¼ lb., 35c, postpaid.

JAPANESE PIE—A crook-necked variety, deep green with darker stripes, which turn to a rich golden yellow. The fruit sets and matures very early, the best for pies. Pkt., 10c; oz., 20c; ¼ lb., 50c.

Telephone Peas

SPINACH

BLOOMSDALE (45 days)—The leaves of this variety are crumpled and very hardy. Will stand out all winter south of the Ohio river, one of the most popular. Price: Packet, 5c; 1 oz., 15c, postpaid.

MUSKMELLON

BENDERS SURPRISE—The Bender melon ripens medium early. The flesh is deep orange colored, very thick, deliciously sweet and of high flavor, they are of oval shape light green of coarse netting, when ripe the melon turns to a golden tint which shows through the netting. These melons will keep a week after picking and will stand shipping better than any other variety of melon. Pkt., 10c; oz., 25c; ¼ lb., 70c.

OSAGE—Perhaps the most popular salmon fleshed variety grown. Skin very dark green, slightly netted flesh rich salmon color and very thick and meaty, excellent sweet flavor. Packet, 5c; 1 oz., 15c; ¼ lb., 55c postpaid.

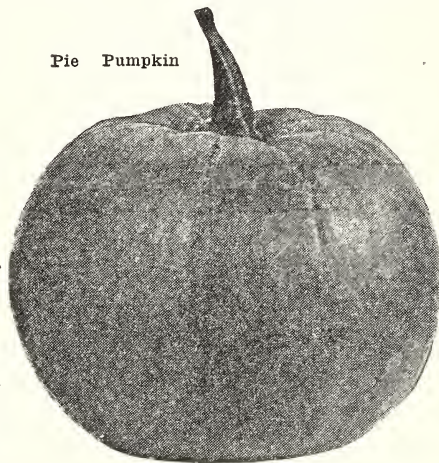

HONEY DEW—New melon; has become very popular. About 10 inches long, 8 inches diameter. Surface smooth without ribs or netting. It is very sweet. Pkt., 5c; 1 oz., 15c; ¼ lb., 50c, postpaid.

TIP TOP (80 days)—Very productive melon, medium to large size, nearly round, slightly ribbed, fairly well covered with shallow netting. Packet, 5c; 1 oz., 15c; ¼ lb., 60c, postpaid.

PARSNIPS

HOLLOW CROWN (85 days)—The roots are very long and end abruptly with a tapered root. Our strain has a very smooth white skin. Packet, 5c; 1 oz., 15c; ¼ lb., 50c, postpaid.

Pie Pumpkin

PEAS

LITTLE GEM (55 days)—This is an extra early, wrinkled pea, grows about 15 inches high and is a prolific bearer. Big packet, 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.85, postpaid.

FIRST AND BEST (50 days)—The pods of this variety are filled with round, smooth peas of excellent flavor. Very early producer and hardy. Grows to the height of 2½ feet. Big packet, 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.85, postpaid.

MAMMOTH MELTING SUGAR—This is the best known edible podded pea. The vines reach a height of 6 to 7 feet. The whole pod is fleshy and tender and should be gathered when the seeds are just beginning to form. They are broken in pieces the same as stringless beans and make a delicious dish. Pkt., 10c; ½ lb., 35c; 1 lb., 50c.

AMERICAN WONDER (55 days)—Early wrinkled pea, growing up to 12 inches high, and producing well filled pods of the finest flavor. Big packet, 10c; ½ lb., 30c; 1 lb., 55c; 5 lbs., \$2.50, postpaid.

TELEPHONE (70 days)—This variety is a leader with market gardeners and is very hardy and productive. Pods are 4 to 5 inches long with a fine quality of peas. Grows to a height of about four feet. Price: Big packet, 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.85, postpaid.

POP CORN

IMP. BABY RICE—A new variety of the Rice Pop Corn, that matures very early of medium rice size. The kernels are deep flesh white. Very prolific and of excellent quality when popped. Price, pkt., 5c; ½ lb., 15c; 1 lb., \$2.50.

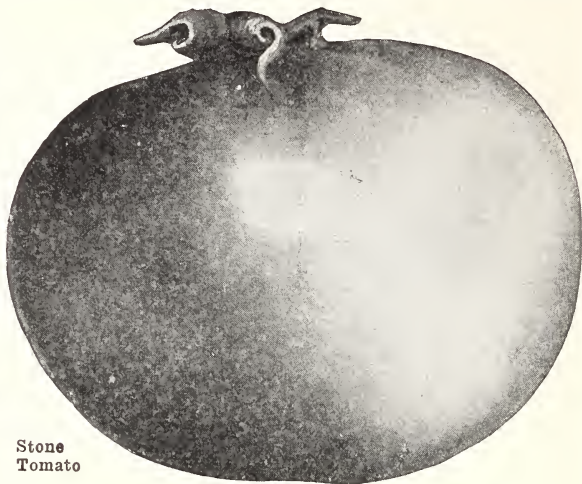

TOMATOES

JOHN BAER (85 days)—This variety grows to a very large size, free from core and is an attractive bright red. It is one of the most profitable varieties, one plant often having from 50 to 70 fruits which ripen evenly and seldom burst. Price: Pkt., 10c; 1 oz., 40c; ¼ lb., \$1.25, postpaid.

PONDEROSA (110 days)—In addition to its enormous size this tomato is very solid as it has but few seeds. It is a beautiful crimson, solid throughout and is quite early. Price: Pkt., 10c; 1 oz., 60c; ¼ lb., \$2.00 postpaid.

SPARK'S EARLIANA (85 days)—Remarkable for its earliness, large size, uniform shape, attractive red color and productiveness. The fruit is solid and the quality is all that could be desired. The leading early market variety. Price: Pkt., 10c; 1 oz., 40c; ¼ lb., \$1.25, postpaid.

STONE (125 days)—A fine tomato for main crop, for market or canning. The fruit is perfectly smooth, of a beautiful red color and very large. It ripens evenly and is free from rot, even in wet seasons when other sorts have rotted badly. Price: Pkt., 10c; 1 oz., 40c; ¼ lb., \$1.25, postpaid.

Stone
Tomato

RADISH

CINCINNATI MARKET (28 days)—Very fine extra early variety, bright red and transparent. Very tender and delicious when full grown. Has long smooth root, small top. Packet, 5c; 1 oz., 15c; ¼ lb., 45c, postpaid.

WHITE ICICLE (25 days)—This radish grows about 4 inches long, transparent white with short leaves. It makes its growth very quickly, is of excellent flavor and desirable either for home or gardeners' use. Price: Packet, 5c; 1 oz., 15c; ¼ lb., 45c, postpaid.

SCARLET GLOBE (20 days)—This is the most quickly matured variety, oval in shape and a brilliant red with white flesh, solid, crisp and mild. Price: Packet, 5c; 1 oz., 15c; ¼ lb., 50c, postpaid.

SCARLET TURNIP WHITE TIP (21 days)—An early variety of medium size and excellent flavor; and of handsome appearance. The best of the round varieties. Price: Packet, 5c; 1 oz., 15c; ¼ lb., 50c, postpaid.

CHINA ROSE OR SCARLET CHINA—Of medium size, 4 to 5 inches long. Skin deep rose. Flesh pure white, firm and compact. Free from any hard fiber or strings. Easily stored for winter. Pkt., 10c; oz., 20c; 4 oz., 45c.

Scarlet Globe Radish

SPRING HILL NURSERIES:

September 27.

We are very well satisfied with the trees and seeds we got from you.

The collection of seeds was wonderful. I think we shall want some seeds and a few shrubs in the Spring.

Thanking you for the catalog and all past favors, I am with best wishes,

GEORGE WOLF,
Edwardsville, Ill.

R. R. No. 4

TURNIPS

PURPLE TOP STRAP LEAVED (55 days)—One of the most popular sorts and is largely grown for markets. It is purple or dark red on top with a white base. Price: Pkt., 5c; 1 oz., 15c; ¼ lb., 40c, postpaid.

EARLY SNOWBALL (45 days)—This pure white variety that is very popular, cooks up sweet and tender and is considered one of the best white early turnips grown. Pkt., 5c; 1 oz., 15c; ¼ lb., 40c, postpaid.

PURPLE TOP WHITE GLOBE (70 days)—This is the most popular turnip grown and is in much demand in all the markets. Of globular shape, very handsome and of superior quality either for table or stock. It is early, of rapid growth and an excellent keeper. Flesh pure white, skin white with purple top. Price: Pkt., 5c; 1 oz., 15c; ¼ lb., 40c, postpaid.

Seneca Falls, N. Y., April 16.

Spring Hill Nurseries, Tippecanoe City, Ohio.

Dear Sirs:—The Poplar Trees ordered from you came safely and in good condition. Have them planted, and am much pleased with their looks. The other two ordered from you a year ago are doing wonderfully well; are just ready to leaf; am afraid they are a little precocious and will get nipped by frosts.

Respectfully,

Miss Ethyl Frye.

Early Snowball Turnip

LAWN GRASS SEED

EVERGREEN MIXTURE FOR A GOOD, CLEAN QUICK LAWN

This mixture is composed of the choicest grasses for lawn purposes, and is especially made to produce a crop of grass very quickly.

We have had where conditions were extremely favorable a good stand ready for the mower in 3 weeks. This mixture contains no trash and is adapted to either clay, sandy or loam soil, and should be applied at the rate of 1 pound to 300 square feet, or in the case of renovating old lawn 1 pound to 600 square feet, depending upon how thin the grass is. Price, per pound, 50c, postpaid; 4 pounds for \$1.80, postpaid by freight or express; 10 pounds at \$4.20; 20 pounds at \$8.00.

READ THIS

Spring Hill Nurseries:

Oct. 1.

The "Evergreen Mixture" grass seed I bought from you in the spring is fine, surely a good crop and was ready for the mower in three weeks time, after planting.

Harry Langford.

WHITE DUTCH CLOVER

This is very good seed to use in renovating old lawns, especially on sandy soil, as this plant roots deeper than any other variety of grass and is not effected so much by drought. Price per pound, 85c; 3 pounds, \$2.40, postpaid.

KENTUCKY BLUE GRASS

One of the most fancy grasses that we have today. Is largely used in lawn making and starts growing early in the spring, continuing until the ground freezes late in the fall. Price per pound, 55c; 4 pounds, \$2.00, postpaid.

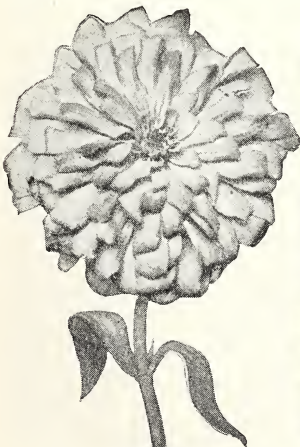

SHADY NOOK MIXTURE

Have you a lawn that is shaded by trees. If so try a few pounds of our Shady Nook Grass Mixture which is just what you need in order to raise a patch of fine, compact, velvety grass under such conditions. Shaded ground often becomes sour and in this case it would be necessary to give it an application of Crushed Limestone before seeding, applied at the rate of 25 pounds for 500 square feet. Seed at the rate of 1 pound to about 250 square feet. Price per pound, 55c; 4 pounds for \$2.00, postpaid.

FLOWER SEEDS

Everybody loves flowers, and we honestly believe that in no other way can you procure as much flower pleasure and satisfaction, and at such a trifling cost as you can by ordering seeds from this department.

Aster, Crego Giant White

EVERLASTING FLOWERS

STRAW FLOWER—One of the best of the "everlastings." They succeed in any good garden soil. The large, double flowers of rich, glittering colors make a fine display in beds or borders, but are especially grown to dry for winter use in baskets, vases, etc. Large pkt., 10c; 3 pkts., 25c, postpaid.

CALLIOPSIS, OR COREOPSIS

(Large Flowered Mixed)—One of the easiest grown of the garden annuals. These new sorts form perfect little bushes about 10 inches high by 1 foot across and are a perfect mass of bloom from early summer until cut down by frost. Flowers range in color through yellow, golden and crimson colors. Price, Pkt., 5c; 3 pkts., for 10c, postpaid.

CHRYSANTHEMUMS

Of all the annuals these pretty flowers perhaps hold the leading position. They are beautiful in beds and borders and good for window boxes or cutting. They also make useful pot plants and when used for this purpose they should be sown under glass or indoors. They grow to a height of 1 to 1½ feet. Pkt., 5c; 3 pkts., 10c, postpaid.

BACHELOR'S BUTTON

They bear their artistic flowers on long stems and will last a long time after being cut, making it an ideal plant for cut flowers. Price: Packet, 5c; 3 pkts., 10c, postpaid.

Snapdragon

ASTERS

CREGO'S GIANT

Flowers are very large, often measuring 5 inches in diameter.

The Rose, bright rose	Pkt. 10c
Peach Blossom Beauty, peach blossom	Pkt. 10c
Carmine Rose, very rich	Pkt. 10c

One packet each above for 60c.

QUEEN OF THE MARKET

These asters are the first of all asters to bloom and are excellent for cutting. Mixed colors, Pkt. 10c, 3 for 25c.

ANTIRRHINUM

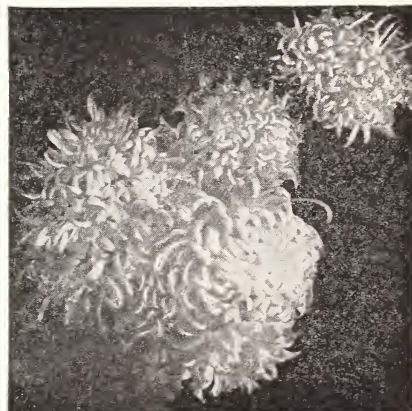

SNAP DRAGON—Another real old favorite which you can see growing in all the best gardens throughout the country. These plants withstand both wet and drought and produce beautiful stems of every shade and color and continue to bloom in increasing profusion until frost cuts them off. Especially valuable for bedding. Pkt., 10c; 3 pkts., 25c, postpaid.

COSMOS

NEW DOUBLE FLOWERING—The best variety of the cosmos and blooming early. The flowers are full double and crested. Mixed colors. Pkt., 20c; 3 for 50c.

RADIO

Be sure to listen in our radio program. Each Thursday evening at 8 o'clock we will broadcast our "Garden of Music" program. Each morning during the woman's hour at the same station, we will give talks of interest to garden lovers.

Chrysanthemum

FLOWER SEEDS-CONTINUED

BALSAM

CAMELLA OR LADY SLIPPER—Not only one of the most beautiful flowers, but also one of the easiest to grow. The branches make perfect pyramids of bloom and under good conditions carry as many as 500 blooms to the plants. They are strained and are of the most gorgeous colors and a bed of these is truly a remarkable sight. Price: 5c; 3 pkts., 10c, postpaid.

COCKSCOMB

A very attractive annual. The crested heads of flowers resemble a cock's comb. The plumed heads are like great feathers. Sow the seed directly in the garden or start early and transplant. Price: Pkt., 10c; 3 pkts., 25c, postpaid.

KOCHIA

CYPRESS OR MEXICAN FIRE BUSH—This splendid annual plant grows very quickly from seed sown in the open ground, as soon as weather permits in the spring. These plants also make attractive globe-shaped bushes as large sometimes as 3 ft. high and 2 ft. across. Leaves are slender and are a light pea green color until September, when they become carmine or blood red in color. At the same time the ends of branches are thickly set with small bright scarlet flowers and produces a very striking effect. Price: Pkt., 5c; 3 pkts., 10c, postpaid.

HELIOTROPE

Both the flowers and foliage of this plant are deliciously fragrant. They are easily raised from seed and spring planting will give you fine summer blooming plants. Are very good for cut flowers. Price: Pkt., 10c; 3 pkts., 25c, postpaid.

CANDYTUFT

WHITE ROCKET—One of the oldest annuals in existence and more popular than ever. It grows from 4 to 5 inches high, which makes it an exceptionally fine border plant. It is perfectly hardy, easily grown, extremely fragrant. Is splendid for cut flowers which the plants produce in wonderful profusion throughout the whole season. Pkt., 5c; 3 pkts., 10c, postpaid.

MORNING GLORY

JAP GIANT FLOWERING—The flowers of this variety are of enormous size with beautiful colorings and markings that are quite beyond description. They include every shade and color from snow white to deep purple. Price, packet, 5c; 3 packets, 10c, postpaid.

MIGNONETTE

Our Mammoth Flowering Mignonette is much superior to the common variety so often bought in the stores. The flowers are a magnificent bright red, extremely showy and of enormous size

foliage beautiful rich green. It is a splendid flower for cutting and will remain fresh and fragrant for ten to twelve days in the house. Price: Pkt., 5c; 3 pkts., for 10c, postpaid.

MARVEL OF PERU

FOUR O'CLOCK—This old time free flowering garden favorite does well in any soil and under almost all conditions. Produces large flowers of many brilliant colors which are at their best during the afternoon when the flowers are fully expanded. Height, 2 feet. Packet, 5c; 3 pkts., 10c, postpaid.

**BUY DIRECT
AND SAVE MONEY**

Cockscomb

LARKSPUR

DWARF ROCKET—One of the easiest flowers to grow and certainly one of the prettiest. It is the Annual Delphinium, grows 1½ to 2 feet high. It is especially fine for cut flowers and produces blue, rose, white, pink, carmine and purple flowers. Do not miss the real pleasure to be derived from these beautiful plants. Price: Pkt., 5c; 3 pkts., 10c, postpaid.

HOLLYHOCKS

DOUBLE FLOWERING—This is comparatively a new variety and flowers very quickly from seed. Plants from seed sown in May will bloom in July and will flower profusely until frost. They are very beautifully formed and there is a great variety of colors, including maroon, pink, rose, crimson, white, and scarlet of dainty and exquisite blending. Packet, 10c; 3 pkts., 25c, postpaid.

PANSY

GIANT BUTTERFLY—This is the largest flowering Pansy in the world and is a superb mixture of the best types in every known class. Will produce enormous blooms. Packet, 15c; 3 pkts., 35c, postpaid.

Hollyhocks

Mignonette

FLOWER SEEDS-CONTINUED

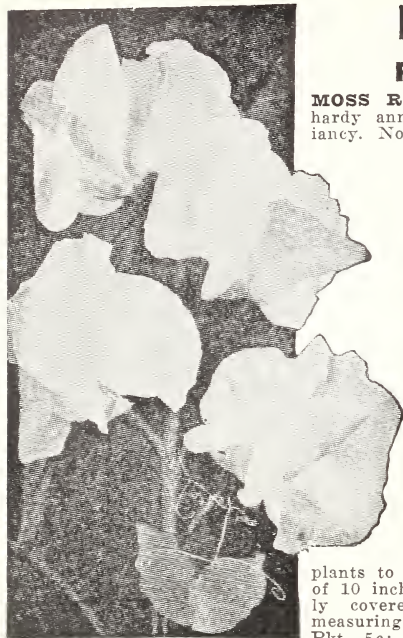

PORTULACA

MOSS ROSE—This charming little hardy annual is unrivaled for brilliancy. Nothing is prettier for beds, edging and rockwork, and it is frequently used to sow broadcast over sunny banks, etc., As an undergrowth for taller plants is also valuable. The flowers are of the richest colors and will bloom from July until frost. Stands dry weather. Price: Packet, 5c; 3 pkts., 10c, postpaid.

NASTURTIUMS

GIANT FLOWERING TALL—This fine strain contains a wealth of color, from crimson and rose to yellow, orange, white, spotted, etc. Very fine for bedding. Packet, 5c; 1 oz. 15c; ¼ lb., 40c, postpaid.

GIANT FLOWERING TOM THUMB—Very best dwarf nasturtium and are among the easiest plants to grow. They reach a height of 10 inches to 1 foot, are completely covered with mammoth flowers measuring from 2 to 3 inches across. Pkt., 5c; 1 oz., 15c; ¼ lb., 40c, postpaid.

Spencer Sweet Peas

AFRICAN MARIGOLD

The old fashioned favorites are annuals of the easiest cultivation. This type is the enormous flowered one, blooming very large in showy orange or lemon shades. The flowers are as regular and perfect as the Dahlia. For a garden display during the summer and fall nothing can surpass it. **Orange**—Large, very double flowers. **Lemon**—Large, very double flowers. Price, Pkt., 10c; 2 for 15c.

LOVE IN A MIST

NIGELLA—This beautiful annual is very pretty, interesting and easy to grow. The foliage is fine and feathery and the flowers are most in shades of blue and are surrounded by a border resembling green lace. They are very good for cut flower purposes. Price: Packet, 5c; 3 pkts., 10c, postpaid.

MOON VINE

MOON VINE—This is a splendid annual climber of most rapid growth. It has beautiful flowers of various colors. Often grows 30 feet in a year. It blooms on cloudy days and at evenings. Good for terraces, verandas and for covering unsightly objects. The seed should be soaked in water 34 hours and a notch cut in the end of the seed before planting. Price, 10c; 3 pkts., 25c, postpaid.

Giant Flowering Nasturtiums

African Marigold

PETUNIAS

MODEL MIXED—This mixture is unequalled for size of bloom and diversity of color. The flowers are beautifully striped and blotched and include all the best colors. Pkt., 10c; 3 pkts., 25c, postpaid.

SWEET PEAS

SPENCER VARIETIES

Price any of varieties below. 10c per pkt., Oz., 40c; ¼ lb., \$1.25; One each of 5 named kinds 40c.

BLANCHE FERRY—The best bi-color. The standard is a real rose-pink while the wings are white, occasionally flushed with delicate pink. A big waved type of the old popular Blanche Ferry.

CRIMSON KING—A true rich crimson. Flowers are large beautifully waved and carried on long strong stems. One of the finest crimsons.

KING WHITE—A mammoth glistening white of perfect form. Not as free a bloomer as Constance Hinton, but a purer white and larger flowered.

ROYAL PURPLE—Beautiful flowers of a rich warm purple. A free grower and profuse bloomer.

MRS. TOM JONES—A bright delphinium-blue that is considered one of the best light blues. Large flowers on vigorous free-blooming vines.

GRANDIFLORA SWEET PEAS

MIXED COLORS—For those who want some good mixed Sweet Peas, but do not wish to pay the necessarily high prices for the Extra Early and Spencer varieties we have an exceptionally fine mixture of the Grandiflora varieties. These are large handsome flowers and are just as pretty colors as the higher priced sorts. Pkt., 5c; 3 pkts., 10c, postpaid.

FLOWER SEED

CONTINUED POPPIES

SHIRLEY OR GHOST POPPIES—It is impossible to do these flowers full justice in a description. This is a wonderful strain of single poppies which often attain a size of four to five inches across. Individual flowers are exquisitely colored, ranging from pure white to deep blood red. Packet, 5c; 3 packets, 10c, postpaid.

Shirley Poppies

SALVIA

SCARLET SAGE—A bed or border of Scarlet Sage always attracts attention and this variety has long been a leading favorite. We know of nothing that can equal the effect of a bed of these scarlet flowers when in full bloom. We offer only the large flowered variety which produces flowers twice the size and twice as numerous as the old varieties. They grow to a height of about 3 feet with flowering stems from base to tip of plant. Pkt., 10c; 3 pkts., 25c, postpaid.

ZINNIA

RED RIDING HOOD—A very pretty dwarf Zinnia about 1 foot high with bright scarlet flowers an inch across and very double. Pkt. 10c; 3 for 25c.

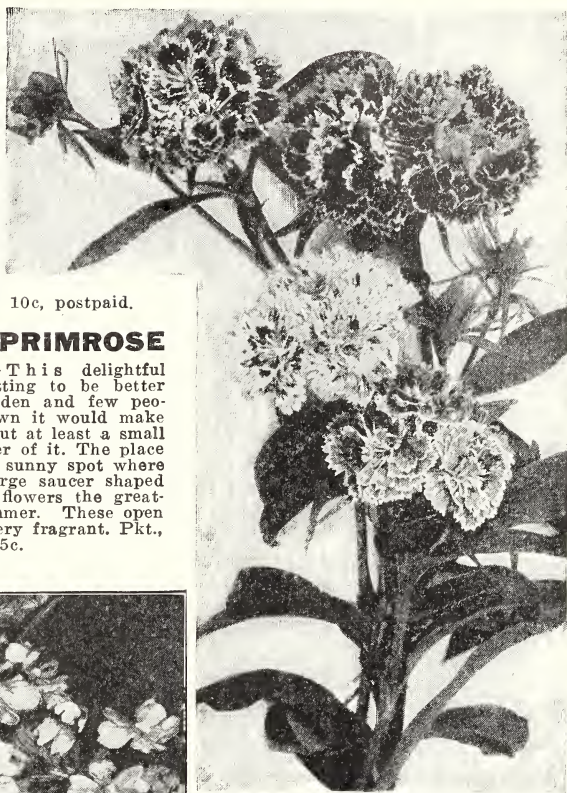

Salvia

EVENING PRIMROSE

OENOTHEA—This delightful little plant is getting to be better known in the garden and few people who have grown it would make their garden without at least a small bed or short border of it. The place to grow it is in a sunny spot where it will bear its large saucer shaped white and yellow flowers the greater part of the summer. These open at dusk and are very fragrant. Pkt., 10c; 3 pkt., for 25c.

Evening Primrose

Sweet William

SWEET WILLIAM

DIANTHUS—Positively one of the loveliest of flowers and there is probably no better known flower than this one. They are unequalled for color and fragrance and produce an immense wealth of bloom. A bed of these beautiful flowers will attract the attention of all who see them; for cut flowers they cannot be surpassed. Price: Pkt., 5c; 3 pkts., 10c, postpaid.

TEN WEEK STOCKS

DOUBLE

GIANT FLOWERING MIXED—This stock is one of the most popular annuals, either for bedding or pot culture; for brilliancy and diversity of color, fragrance, profusion and duration of bloom it is unsurpassed. Start the seeds in February and March, and as soon as the plants have their second pair of leaves, prick out into shallow boxes and in about four weeks the plants will be ready to pot; from which they should be transferred to the open ground in May or June. Large pkt., 10c; 3 large pkts., 25c.

VERBENAS

MAMMOTH FLOWERING

	Pkt.
Pink—Clear Pink10
White—Snow white10
Blue—Dark blue10
Variegated—no two alike..	.10
Crimson—Rich red10

PHLOX

PHLOX DRUMMONDI—An improved giant flowering mixture of Phlox Drummondii. Contains every shade of color and is without doubt the best mixture that can be bought. Be sure to include some of these old favorites in your order. Pkt., 5c; 3 pkts., 10c, postpaid.

Zinnia, Red Riding Hood

GOOD VARIETIES OF CANNAS

The Cannas with their large, various-colored leaves, easily hold first place for producing a tropical effect on the lawn. Excellent effects may be secured by planting them singly or by planting in small clumps in the hardy shrubbery border. Against a heavy background of green, the bright colored, variously-marked leaves show to their best and are very attractive and interesting.

LIST OF THE BEST VARIETIES

THE PRESIDENT—Height four feet. In color, a rich, glowing scarlet and the immense firm, rounded flowers, 7 inches across when open, are produced on strong, erect stalks well above the large, rich green foliage. The 'President' is superior to any other red variety in the quantity and also the quality of bloom, and the firm flowers resist drought and heat to a remarkable degree. 25c each; 6 for \$1.20.

ALLEMANIA—Ground color yellow, heavily dotted and overlaid with blood-orange. 5 ft. 10c each; 12 for \$1.00; \$7.50 per 100.

AUSTRIA—Pure yellow with crimson markings in throat. A beautiful shade; the color of light. Four and one-half feet. 10c each; 12 for \$1.00; \$7.50 per 100.

GAIETY—Reddish orange, mottled with carmine and edged with yellow. The tongue is yellow and densely spotted with carmine. Four feet 15c each; 12 for \$1.40; \$12.00 per 100.

GENERAL MERKEL—Scarlet, suffused with orange; base and edge of flower marbled with golden-yellow. 4 feet. 10c each; 12 for \$1.00; \$7.50 per 100.

GLADIOLORA—Remarkable on account of the unusual shape of its flowers which look like a Gladiolus; color crimson changing to carmine-rose, with an irregular edge of gold. 15c each; 12 for \$1.40; \$12.00 per 100.

GOLDEN GATE—4 feet. The flowers open almost pure gold but soon become richly rayed with orange-crimson and apricot centering to the throat. 10c each; 12 for \$1.00; \$7.50 per 100.

INDIANA—Glistening golden orange flowers, with silky texture. Very attractive. 10c each; 12 for \$1.00; \$7.50 per 100.

KING HUMBERT—In this grand Italian Canna we have a combination of the highest type of flower with the finest bronze foliage. Its flowers, which under ordinary cultivation will measure six inches in diameter, and which are produced in heavy trusses of gigantic size, are of a brilliant orange-scarlet, with bright red markings, while the foliage is broad and massive and of a rich coppery bronze with brownish-green markings. Five feet. 15c each; 12 for \$1.40; \$12.00 per 100.

MEPHISTO—A brilliant, deep rich red; a wonderfully satisfactory canna. Five feet. 10c each; 12 for \$1.00; \$7.50 per 100.

METEOR—Immense trusses of large rounded flowers, well displayed above the massive foliage; brilliant crimson. Flowers keep well and are self-cleaning. Five feet. 10c each; 12 for \$1.00; \$7.50 per 100.

MRS. ALFRED CONARD—Grandest flesh-pink, most striking and beautiful; height four feet. 15c each; 12 for \$1.40; 12.00 per 100.

QUEEN HELEN—Immense flowers that are as large as the Orchid-flowering Cannas. Color golden-yellow evenly and distinctly spotted red. This Canna ranks up with King Humbert. We have no hesitancy in saying there is no better Canna grown. 4½ feet. 15c each; 12 for \$1.40; \$12.00 per 100.

RICHARD WALLACE—A light shade of canary-yellow, almost an ecru, with delicate flecks of red; a lovely Canna. Four feet. 15c each; 12 for \$1.40; \$12.00 per 100.

SECRETAIRE CHABANNE—(Green) A distinct and pleasing salmon; a fine bedder. Three and one-half feet. 10c each; 12 for \$1.00; \$7.50 per 100.

SOUV. DE A. CROZY—Scarlet crimson bordered yellow. 15c each; 12 for \$1.40; \$12.00 per 100.

UNCLE SAM—The most stately of all Cannas; bears three or four enormous bunches of brilliant orange-scarlet flowers on each stalk. Received an award of merit from the Royal Horticultural Society of England. Six feet. 15c each; 12 for \$1.40; \$12.00 per 100.

WILLIAM BATES—A light canary-yellow; fine bloomer. Four feet. 10c each; 12 for \$1.00; \$7.50 per 100.

Lily Speciosum Album

THE BEST IN GLADIOLUS

The gladiolus has so many good points, aside from its great beauty, to recommend it, that if a vote of our customers were to determine the national flower, we believe the gladiolus would be a winner. It adapts itself to all climates, and almost any kind of soil. It thrives beautifully among the perennials and shrubbery, but is grown to best advantage in masses or rows in the garden.

The greatest usefulness of this wonderful flower is as a cut flower. The range of colors is complete, from pure white to deepest purple and maroon, and we know of no other flower with such lasting qualities.

Gladioli are so easily grown that they are almost "fool-proof." Give them good garden soil, plenty of sun and water, and apply liquid manure just before blooming time. Plant in trenches 5 inches deep, any time after the ground warms up, about April 15th. Bulbs should bloom in 10 to 15 weeks, depending on the variety and season.

	Each	12	100
ALBANIA —White, large open flowers	.15	\$1.60	\$12.00

DAY LILIES

FUNKIA (Day Lily or Plaintain Lily)—Plantaginea Sub Cordata—Wide circle of broad heartshaped leaves of pretty green. Flowers, large, 4 to 6 inches long, with an open bell-shaped perianth, waxy-white, fragrant, borne on large trusses. 25c each; \$2.50 per doz.

FUNKIA, VARIEGATA UNIVITTA—A very attractive subject for the border even when not bearing its dainty blue flowers. 25c each; \$2.50 per dozen.

JAPANESE LILIES

The Lilies have always been looked upon as among the noblest of the garden flowers. Their conspicuous and beautiful flowers and stately forms appeal strongly to the eye. Most varieties are very fragrant and are especially desirable for cut flowers.

AURATUM (Gold Banded Japan Lily)—This variety has ever been a great favorite. The flower heads are large, with broad petals gracefully recurved. White, thickly studded crimson-maroon, with a wide gold band down the center of each petal. Improves with age, and produces a vast amount of bloom.

SPECIOSUM ALBUM—Pure white with a green band traversing the center of each petal.

SPECIOSUM RUBRUM—This is one of the joys of August; ruby spots distributed over a broad expanse of white.

TIGRINUM SPLENDENS—The dear old single "Tiger Lily."

All Lilies, blooming size bulbs, 35c each; 3 for \$1.00.

REGAL LILY

SEE INSIDE OF
FRONT COVER

The Sensation of the year. Charming and delicate. Regal Lily, being a native of northwestern China, is hardy. Bailey's Cyclopaedia of Horticulture says of it: "One of the most beautiful of all known lilies, the exquisite blending of tints and colors forming a charming contrast with the rich, deep-green foliage. Highly recommended for general culture both for the open ground and for pots." Our prices on Regal Lily are unusually low, due to the fact that we now have a large stock of plants for the first time since its introduction. Blooming size bulbs, 35c each; 3 for \$1.00; 12 for \$3.50.

Romance

Golden Measure

FINE NEW DAHLIAS

We are offering our customers a special treat this year in our Dahlias. The varieties below include some very rare sorts and are really worth more than the price we are asking.

Maude Adams

Queen of Hearts

SHERLOCK HOLMES (New)—A lovely shade of mauve; this is known as the Blue Dahlia.

REINE CAYEAUX—Brilliant Geranium-red; early and free. A great favorite.

RUTH FORBES (Hybrid)—The massive, clear pink flowers, composed of heavy petals, are often accompanied by stems measuring 2 feet in length; excel any other variety for large vase purposes.

STORM KING—The most reliable white show Dahlia to date. Color a pure white. Flowers produced on good stems, well above the foliage.

All varieties of Dahlias listed above.

PRICE STRONG BULBS

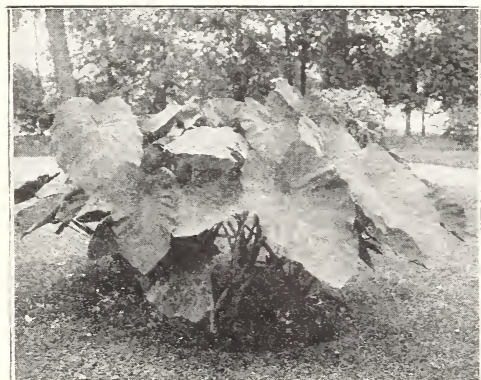

30c each; 6 for \$1.50; 12 for \$2.75.

TUBEROSES 10c

FRAGRANT DOUBLE—The flower spikes attain a height of about 2 feet, and are compactly filled for two-thirds of their length with very large, perfectly double flowers. 1½ to 2 inches across. The flowers have the wax-like substance of a Camellia, are glistening white and deliciously fragrant. Price, 10c each; 3 for 28c; 6 for 50c; 96c per dozen; \$7.75 per 100. (25 at 100 rate.)

ELEPHANT'S EAR

MAMMOTH LEAVES (*Caladium Esculentum*)—Very effective. The growth is very rapid, and the ground must be made rich. Watering will help develop large leaves. Bulbs can be stored in dry sand in winter and kept from year to year. A very widely grown lawn plant. Price, large bulbs, 30c each; 3 for 85c. Mammoth bulbs, 46c each; 3 for \$1.82.

Caladium or Elephant's Ear

OREGON BEAUTY—Intense Oriental red. Large flowers on long stems and plenty of them. A very desirable variety for any garden. Has been rightly characterized as a brilliant, gorgeous flower. Makes any garden look conspicuous.

QUEEN MARY—This is a stronger grower than Delice. A large flower with full rounded center. The color is a soft shade of pink.

PRINCE OF YELLOWS—One of the best canary-yellows for cutting.

QUEEN OF HEARTS—(New) The best white Cactus ever introduced. Pure white, shading to lemon-yellow at base of the petals; very free bloomer.

QUEEN VICTORIA—Pure canary-yellow. One of the freest bloomers. Good for cutting.

QUEEN WILHELMINA—The flowers of this grand variety are snow white, with a center of golden-yellow. They look like huge butterflies on the plant. They are so light and airy. Extra fine.

Storm King

Tuberoses

WATCH EM GROW PLANT FOOD

Don't Worry About Sickly House-Plants and Ferns.

"Watch-Em-Grow" will make them strong and healthy.

IT IS ODORLESS "Watch-Em-Grow" is made of the purest chemicals and so deodorized that it is not unpleasant to work with.

IT IS CONCENTRATED "Watch-Em-Grow" is so highly concentrated that a little goes a long way and therefore is very inexpensive.

CHRISTMAS TREES

PLANT ONE ON YOUR LAWN FOR AN
OUTSIDE CHRISTMAS TREE

IT IS A BEAUTIFUL CUSTOM

Trees and plants can be planted for various purposes. For shade, for screens, for windbreaks, for beauty and for many other purposes. But of all the reasons for growing a tree on your grounds, planting one to be used as an outside Christmas Tree would probably give you most pleasure, would have most sentiment, and would give most cheer to everyone who passes by your home at Christmas time.

It should be planted where it could be seen by everyone, where it will have plenty of room to grow, and in rich soil so it will develop rapidly.

Lighting and trimming an outside tree for Christmas is becoming very popular, but the popularity of the custom is hindered because of the lack of these trees, growing in good locations on the home grounds.

So prepare ahead to have a tree of Christmas cheer on your own lawn. Plant one this spring and enjoy the happiness derived from bringing the spirit of Christmas to others.

SPECIALLY SELECTED TREES 18
to 24 inches \$1.50;
2 to 3 ft., \$2.50.

CUSTOMERS ARE ALL DELIGHTED

Vevay, Ind., Dec. 15th, 1927.

I must drop you a line to tell you how delighted I am with my Christmas Tree. Indeed it is beautiful. I ordered on the 12th and had the tree planted on the morning of the 15th. Thanks for your promptness. Mrs. H. E. H.

NEW GIANT DAHLIA FLOWERED ZINNIA

The Dahlia-Flowered Zinnias are a grand new giant-flowering strain of high quality. The plants are exceedingly vigorous, growing fully 3 feet high, while the flowers which are similar in shape to the double Decorative Dahlia will range from 6 to 8 inches in diameter. They are the largest Zinnias known. Price of any of the following varieties: Pkt., 20c; 2 for 35c.

A New Shrub From China

KOLKWITZIA AMABILIS

Or Beauty Bush

Following is a description of this new shrub, taken from a bulletin of the Arnold Arboretum Harvard University, of June 14, 1927, in which they say:

Kolkwitzia Amabilis is now in blossom on Bussey Hill, where a young and vigorous plant is flowering. Every succeeding year emphasizes the garden value of this plant for which the descriptive title of Beauty-Bush has been aptly coined.

It is a twiggly shrub, growing from 6 to 8 feet tall, with the inner stems erect or ascending and the outer ones arching to the ground, the whole plant forming a dome-shaped mass. The flowers are produced along the whole length of the branches in clusters at the ends of short, leafy shoots. They are tubular with a gaping mouth, deep pink without, stained with yellow-brown on the lower throat and lip.

The graceful habit of the plant, its free-flowering qualities and pleasing color, combined with perfect hardiness, make this one of the most beautiful, as well as most useful shrubs that China has given to the gardens of this country. Related to the Weigelas or Diervillas, it is far more beautiful than any of them, and is destined to become one of the most familiar plants in our gardens.
